ELASTIC PROPERTIES

SUBJECT INDEX

Computer program for determination of natural frequencies of closed spherical sandwich shells MSC-1246	B67-10279	06	
Two-functional seal for hose connection M-FS-14062	B69-10588	05	
ELASTIC PROPERTIES			
Pressure transducer 3/8-inch in size can be faired into surface W00-065	B64-10021	05	
Valve designed with elastic seat JPL-442	B65-10040	05	
Metal tube can be folded for compact storage, is self-erecting LEWIS-288	B66-10450	05	
Tungsten fiber-reinforced copper composites form high strength electrical conductors LEWIS-338	B66-10572	03	
Lateral ring metal elastic wheel absorbs shock loading M-FS-1312	B66-10663	05	
Improved computer program for elastic analysis of highly redundant structural configurations M-FS-13087	B67-10330	06	
Vibration testing and dynamic studies of relays M-FS-14542	B68-10268	01	
Conceptual hermetically sealed elbow actuator M-FS-14710	B68-10300	05	
Torsion system for creep testing with multiple stress reversals HQ-10039	B69-10147	03	
Optimum structural design based on reliability and proof-load testing NFO-11228	B69-10723	31	
ELASTIC SCATTERING			
Computer program ETC improves computation of elastic transfer matrices of Legendre polynomials P/0/ and P/1/ NUC-10070	B67-10566	06	
Computer program /P1-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a monatomic gas NUC-10141	B67-10678	06	
GAMBIT program NUC-10243	B69-10433	06	
ELASTIC SHEETS			
Impact and puncture resistant material protects parts from damage MSC-747	B66-10375	05	
Thin plastic sheet eliminates need for expensive plating M-FS-1896	B66-10681	03	
ELASTIC SYSTEMS			
Rigid-body motion extracted from total motion of a flexible body ARC-63	B67-10081	05	
ELASTIC WAVES			
Unmanned seismometer levels self, corrects drift errors GSFC-100	B63-10551	01	
Pneumatic pressure wave generator provides economical, simple testing of pressure transducers NUC-10024	B67-10664	05	
ELASTOHYDRODYNAMICS			
Tester for study of rolling element bearings LEWIS-305	B67-10009	01	
High-temperature bearing lubricants LEWIS-10408	B68-10249	05	
Study of high-speed angular-contact ball bearings under dynamic load M-FS-20562	B69-10367	05	
ELASTOMERS			
Chain friction system gives positive, reversible drive ARC-8	B63-10009	05	
Elastic orifice automatically regulates gas bearings JPL-135	B63-10123	05	
Plastic molds reduce cost of encapsulating electric cable connectors M-FS-69	B63-10568	05	
Molded elastomer provides compact ferrite-core holder, simplifies assembly JPL-584	B64-10084	05	
Elastomers bonded to metal surfaces seal electrochemical cells GSFC-168	B64-10113	03	
Gas diffusion cell removes carbon dioxide from occupied airtight enclosures MSC-118	B64-10319	03	
Flexible curtain shields equipment from intense heat fluxes M-FS-48	B65-10044	03	
Compact assembly generates plastic foam, inflates flotation bag LANGLEY-96	B65-10090	05	
Shock mount isolates pressure transducers from vibration JPL-631	B65-10113	05	
Testing device subjects elastic materials to biaxial deformations JPL-616	B65-10189	03	
Silazane polymers show promise for high-temperature application M-FS-466	B66-10194	03	
Extensometer automatically measures elongation in elastomers M-FS-517	B66-10284	05	
Large diameter metal ring seal prevents gas leakage at 5000 psi M-FS-1064	B66-10422	05	
Silazane elastomer remains resilient at 400 deg C M-FS-1144	B66-10667	05	
Self-sealing closure enables access to several fluid containers NFO-10123	B67-10207	04	
Compressible sleeve provides automatic centering for grinding or turning of cylinders SAN-10021	B68-10318	05	
Simple switch actuated by force applied over wide solid angle XNP-09808	B69-10032	01	
Flared-tube fittings with replaceable seat inserts MSC-15372	B69-10519	05	
Development of improved potting and conformal coating compounds M-FS-20219	B69-10559	03	

SUBJECT INDEX

ELECTRIC BRIDGES

Silphenylene elastomers have high thermal stability and tensile strength M-FS-20250	B69-10580	03	M-FS-14661	B68-10218	01
Glass fabric fire barrier for silicone rubber parts MSC-15555	B69-10629	03	Recharge unit provides for optimum recharging of battery cells GSFC-10688	B68-10273	01

ELECTROLYTES

ELECTROFORMING

High purity electroforming yields superior metal models
ARC-6 B63-10007 05

Vacuum forming of thermoplastic sheet results in low-cost investment casting patterns
ARC-7 B63-10008 05

Ellipsoidal optical reflectors reproduced by electroforming
GSFC-92 B63-10547 05

Nickel solution prepared for precision electroforming
WOO-070 B65-10303 03

Pressure vessels fabricated with high-strength wire and electroformed nickel
M-PS-580 B66-10218 05

Electrical upsetting of metal sheet forms weld edge
M-PS-720 B66-10248 05

Electroformed screens with uniform hole size
LEWIS-10117 B68-10107 05

ELECTROHYDRAULIC FORMING

High-energy-rate magnetohydraulic metal forming system
M-PS-2142 B67-10126 02

ELECTROKINETICS

Fundamental electrode kinetics
ARG-10067 B68-10196 03

ELECTROLUMINESCENCE

Pneumotachometer counts respiration rate of human subject
MSC-92 B64-10259 01

Legibility of electroluminescent instrument panels investigated
MSC-494 B66-10316 02

Panels illuminated by edge-lighted lens technique
MSC-871 B66-10507 02

Plotter design simplifies determination of image sensor transfer characteristic
NPO-10164 B67-10206 01

Improved radiographic image amplifier panel
M-PS-14522 B68-10363 02

Silicon carbide diode for increased light output
M-PS-20063 B69-10096 01

Improved method of fabricating planar gallium arsenide diodes
INP-04235 B69-10271 01

ELECTROLYSIS

Regenerative fuel cell combines high efficiency with low cost
WOO-090 B65-10363 01

ELECTROLYTES

Level of super-cold liquids automatically maintained by levelometer
JPL-397 B63-10250 01

Elastomers bonded to metal surfaces seal electrochemical cells
GSFC-168 B64-10113 03

Filler device for handling hot corrosive materials
MSC-85 B64-10166 03

Improved technique for localizing electropolishing features novel nozzles
WOO-101 B64-10271 01

Fuel cell serves as oxygen level detector

JPL-SC-072 B65-10066 01

Apparatus measures swelling of membranes in electrochemical cells
GSFC-280 B65-10087 01

Nickel solution prepared for precision electroforming
WOO-070 B65-10303 03

Reaction heat used in static water removal from fuel cells
M-PS-532 B66-10013 01

Resilient clamp holds fuel cell stack through resilient clamp holds fuel cell stack through thermal cycle
MSC-313 B66-10035 05

Gelatin coated electrodes allow prolonged bioelectronic measurements
MSC-153 B66-10088 01

New energy storage concept uses tapes
LEWIS-239 B66-10098 02

Vapor diffusion electrode improves fuel cell operation
LEWIS-187 B66-10281 03

Simple, nondestructive test identifies metals
MSC-525 B66-10305 03

Device removes hydrogen gas from enclosed spaces
GSFC-495 B66-10340 03

Electrochemical milling removes burrs and solder from tubing ends
M-PS-714 B66-10358 03

Rubber and alumina gaskets retain vacuum seal in high temperature EMF cell
ARG-17 B66-10472 05

Study shows effect of surface preparations on improving thermionic emission
JPL-SC-140 B66-10493 01

Primary cells utilize halogen-organic charge transfer complex
JPL-926 B66-10682 02

New electrolyte may increase life of polarographic oxygen sensors
MSC-1049 B67-10003 03

Primary cell uses neither liquid nor fused electrolytes
NPO-10001 B67-10275 01

Sensitive bridge circuit measures conductance of low-conductivity electrolyte solutions
ARG-147 B67-10294 01

Development of low temperature battery
LEWIS-10326 B67-10546 01

Fundamental electrode kinetics
ARG-10067 B68-10196 03

Nondestructive method for measuring residual stresses in metals, a concept
KSC-10237 B68-10378 03

Electromotive series established for metals used in aerospace technology
M-PS-18327 B68-10385 03

System for measuring spatial distribution of ejected droplets, a concept
NPO-10185 B68-10402 01

Frangible electrochemical cell and sealing technique
XGS-10010 B69-10056 01

Corrosion protection of aluminum alloys in

ENGINE TESTS

SUBJECT INDEX

ENGINE TESTS

In-tank shutoff valve is provided with maximum blast protection
M-PS-1529 B66-10514 05

Rocket engine vibration accurately measured by photography
M-PS-1916 B66-10652 02

ENGINEERING DRAWINGS

Built-in templates speed up process for making accurate models
LANGLEY-23 B63-10526 05

Use of photographs speeds inspection of printed-circuit boards
MSC-72 B64-10118 01

Equations provide tubular information on effects of uniform and variable loads on thin, flat, circular plates
ARG-151 B66-10601 05

Concept for modifying drafting instruments to minimize smearing
KSC-10056 B67-10283 05

Photographic and drafting techniques simplify method of producing engineering drawings
MSC-716 B68-10128 02

Welding, brazing, and soldering handbook
M-PS-20504 B69-10264 05

ENGINES

Device measures reaction engine thrust vector deviations
JPL-SC-163 B66-10642 05

Cooled miniature pressure transducers effective at high temperatures
LEWIS-10401 B68-10370 01

Improved high-temperature silicide coatings
LEWIS-10817 B69-10266 03

ENGRAVING

Technique for abrasive cutting of thick-film conductors for hybrid circuits
MSC-13242 B69-10235 03

ENTHALPY

Experimental investigation of megawatt dc arc heating of nitrogen
LEWIS-313 B66-10508 02

Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by torsion-effusion technique
ARG-277 B67-10324 03

Pure xenon hexafluoride prepared for thermal properties studies
ARG-10056 B67-10577 03

Study of thermal effects on nickel-cadmium batteries
GSFC-10003 B67-10614 01

Real fluid properties of normal and parahydrogen
LEWIS-10458 B68-10361 06

The thermodynamic properties of the wustite phase are studied
ARG-10200 B68-10408 03

A mass flux probe for measurement in a supersonic stream
LEWIS-10695 B68-10533 02

Isothermal drop calorimeter provides measurements for alpha active, pyrophoric materials
ARG-10186 B69-10002 02

Plasma-heating by induction
LEWIS-10528 B69-10185 02

Computer program for high pressure real gas effects
LEWIS-10820 B69-10222 06

Thermophysical properties of sodium
ARG-10363 B69-10240 03

ENTIRE FUNCTIONS

Water-glycol system volume calculation
MSC-15193 B69-10563 02

ENTRAINMENT

Study made of Raney nickel technology
M-PS-2054 B67-10208 03

Improved sample capsule for determination of oxygen in hemolyzed blood
MSC-11017 B67-10408 04

ENTROPY

Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by torsion-effusion technique
ARG-277 B67-10324 03

Thermodynamic properties of saturated liquid parahydrogen charted for important temperature range
NUC-10018 B67-10346 03

Real fluid properties of normal and parahydrogen
LEWIS-10458 B68-10361 06

The thermodynamic properties of the wustite phase are studied
ARG-10200 B68-10408 03

Investigation of temperature dependence of development and aging
ARG-10145 B69-10022 04

Computer program for high pressure real gas effects
LEWIS-10820 B69-10222 06

Thermophysical properties of sodium
ARG-10363 B69-10240 03

Experimental design for research on shock-turbulence interaction
M-PS-20031 B69-10604 02

ENVELOPES

X-ray film holder permits single continuous picture of tubing joint
LEWIS-10382 B68-10343 05

Method of making conical fiber optical components
XNP-09745 B69-10020 02

ENVIRONMENT SIMULATION

Miniature piezoelectric triaxial accelerometer measures cranial accelerations
ARC-71 B66-10534 01

Method for X-ray study under extreme temperature and pressure conditions
MSC-11232 B67-10474 02

ENVIRONMENT SIMULATORS

Simulator effects partial gravity conditions
MSC-152 B66-10339 05

Heat-load simulator for heat sink design
MSC-15170 B68-10510 02

ENVIRONMENTAL CONTROL

Self-contained clothing system provides protection against hazardous environments
M-PS-536 B66-10201 05

Critical parts are stored and shipped in environmentally controlled reusable container
M-PS-703 B66-10258 05

Portable lightweight cell provides controlled environment

FILAMENTS

Buckling strength of filament-wound cylinders under axial compression investigated
HQ-10032

Solid state high-voltage pulser oper with low supply voltage
M-FS-14034

Analysis of filament reinforced metal pressure vessels
LEWIS-10352

Adhesive for cryogenic temperature applications
LEWIS-10264

FILAMENTS

Radiant heater for vacuum furnaces structural rigidity, low heat loss
LEWIS-39

Precision gage measures ultrahigh levels
GSFC-114

Lamp automatically switches to new on burnout
M-FS-498

Hot-wire detector for chemically active materials used in gas chromatography
MSC-269

Mechanism facilitates coating of internal surfaces of metal cylinders
GSFC-515

Electron beam parallel X-ray generator
MSC-11022

Application of the solid lubricant molybdenum disulfide by sputtering
LEWIS-10544

Fiber glass reinforced structural material for aerospace application
M-FS-14806

Electrothermal linear actuator
NPO-10637

Concept for improved vacuum pressure measuring device
M-FS-20172

Flexible high-voltage supply for experimental electron microscope
ARG-10482

Solar activity history model
M-FS-20529

FILLERS

Inorganic paint is durable, fireproof to apply
GSFC-366

Aluminum oxide filler prevents obstruction in tubing during welding
MSC-222

Brazing process using Al-Si filler reliably bonds aluminum parts
MSC-448

Thermoplastic rubberlike material at low cost
JPL-793

Composite weld rod corrects individual filler weaknesses
M-FS-1923

Static electricity of polymers reduced treatment with iodine
NPO-10062

Closed circuit TV system monitors

FINS

LEWIS-10280

FINS

Program computes zero lift wave drag of entire aircraft
LANGLEY-10079

Solving nonlinear heat transfer constant area fin problems
M-FS-14851

FIRE CONTROL

Dispersion of borax in plastic is excellent fire-retardant heat insulator
ARG-5

FIRE EXTINGUISHERS

Fire extinguisher control system provides reliable cold weather operation
M-FS-13031

Fire retardant foams developed to suppress fuel fires
ARC-10098

FIRE PREVENTION

Saran film is fire-retardant in oxygen atmosphere
MSC-11604

Ambient temperature catalyst for hydrogen ignition
LEWIS-10551

Technique for assessing potential fire hazards
HQ-10279

Improved fire resistant radio frequency anechoic materials
M-FS-16600

FIREPROOFING

Inorganic paint is durable, fireproof, easy to apply
GSFC-366

Glass fabric fire barrier for silicone rubber parts
MSC-15555

FIRES

Infrared television used to detect hydrogen fires
M-FS-654

Hydrogen fire detection system features sharp discrimination
M-FS-643

Emergency escape system protects personnel from explosion and fire
KSC-66-12

FIRING (IGNITING)

Computer program provides steady state analysis for liquid propellant propulsion systems
MSC-10064

Preparation of silver-activated zinc sulfide thin films
GSFC-10687

FIRST AID

Buoyant Stokes litter assembly used for sea rescue operations
MSC-131

Miniature oxygen resuscitator
KSC-10398

FISHES

Concentrations of the naturally occurring radionuclides Pb-210, Po-210, and Ra-226 in aquatic fauna
ARG-10345

Inhibition of browning in foodstuffs

SUBJECT

HQ-10177

Airborne Fraunhofer Line
MSC-13146

Discrimination of fish oil slicks on sea water
HQ-10412

FISSION

Portable, high intensity source provides increased accuracy

SUBJECT INDEX

FREQUENCY SYNTHESIZERS

Remote preamplifier circuit maintains stability over wide temperature range WOO-278	B66-10432	01			
Miniature capacitive accelerometer is especially applicable to telemetry ARC-72	B66-10491	01			
Miniature piezoelectric triaxial accelerometer measures cranial accelerations ARC-71	B66-10534	01			
Computer programs perform spectral analyses of up to seven time series M-FS-1133	B66-10539	01			
Pressure probe compensates for dimensional tolerance variations LEWIS-302	B66-10599	01			
High frequency wide-band transformer uses coax to achieve high turn ratio and flat response ARG-107	B66-10600	01			
Local measurements in turbulent flows through cross correlation of optical signals M-FS-1268	B67-10030	01			
Voltage regulator/amplifier is self-regulated MSC-1240	B67-10156	01			
Computer program for network synthesis by frequency response fit M-FS-12686	B67-10406	06			
General frequency response program calculates frequency response of system, open at any specified element M-FS-12817	B67-10521	06			
DYANA - An advanced programming system for large classes of dynamic and equivalent systems M-FS-12084	B67-10524	06			
Cardiotachometer with linear beat-to-beat frequency response ARC-10033	B67-10598	01			
VICAR-DIGITAL image processing system NPO-10770	B69-10139	06			
New type pressure transducer for severe thermal environments M-FS-20208	B69-10652	01			
FREQUENCY SHIFT					
An investigation of phase-lock loop swept-frequency synchronization M-FS-656	B66-10423	01			
Plotter design simplifies determination of image sensor transfer characteristic NPO-10164	B67-10206	01			
FM carrier deviation measured by differential probability method M-FS-2166	B67-10213	01			
Concept for automatic Doppler compensation in two-way communication systems GSFC-10213	B67-10643	01			
Laser-Doppler gas-velocity instrument M-FS-20039	B68-10349	02			
Data processing method for a weak, moving telemetry signal NPO-11003	B69-10639	01			
FREQUENCY SHIFT KEYING					
Frequency-shift-keyer circuit improves PCM conversion for radio transmission GSFC-80	B63-10511	01			
Unique frequency-shift-keyed demodulation system GSFC-217	B67-10668	01			
FREQUENCY STABILITY					
Temperature-sensitive network drives astable multivibrator GSFC-137	B63-10609	01			
Oscillator circuit measures liquid level in tanks M-FS-245	B65-10209	01			
Electronic phase-locked-loop speed control system is stable JPL-SC-084	B66-10232	01			
Damping technique gives accelerometer flat frequency response M-FS-471	B66-10293	01			
Dielectrometer design permits measurement in vacuum under irradiation M-FS-359	B66-10401	01			
TV synchronization system features stability and noise immunity JPL-915	B67-10118	01			
Design concepts using ring lasers for frequency stabilization M-FS-2448	B67-10143	01			
Hydrogen maser as a highly stable frequency reference M-FS-2437	B67-10146	01			
Glow discharge density sensor probe life is extended M-FS-1707	B67-10229	01			
Absolute frequency stabilization of laser oscillator against laser amplifier M-FS-2559	B67-10255	01			
Apparatus makes klystron operating frequency adjustable from remote point NPO-09831	B67-10514	01			
General frequency response program calculates frequency response of system, open at any specified element M-FS-12817	B67-10521	06			
Highly stable microwave delay line NPO-09828	B67-10642	01			
Simple, accurate automatic frequency control circuit KSC-10393	B69-10323	01			
FREQUENCY STANDARDS					
Hydrogen maser as a highly stable frequency reference M-FS-2437	B67-10146	01			
Electronic frequency discriminator M-FS-2434	B67-10151	01			
Highly stable microwave delay line NPO-09828	B67-10642	01			
Improved atomic resonance gas cell for use in frequency standards MSC-11666	B68-10230	01			
FREQUENCY SYNCHRONIZATION					
TV synchronization system features stability and noise immunity JPL-915	B67-10118	01			
FREQUENCY SYNTHESIZERS					
Phase shift frequency synthesizer is efficient, small in size M-FS-250	B65-10169	01			
An improved nuclear magnetic resonance spectrometer JPL-762	B67-10234	01			
Oscillator circuit operates as digitally controlled frequency synthesizer GSFC-570	B67-10447	01			

FRESNEL DIFFRACTION

SUBJECT INDEX

GUARDS (SHIELDS)

SUBJECT INDEX

GUARDS (SHIELDS)

Key-locked guard prevents accidental switch
actuation
MSC-419 B66-10235 05

GUIDANCE (MOTION)

Visual attitude orientation and alignment
system
MSC-647 B67-10120 02

Earth orbit rendezvous evaluation program
M-FS-13016 B67-10407 06

Conceptual nonorthogonal gyro configuration
for guidance and navigation
MSC-11363 B67-10433 01

Closed circuit TV system automatically
guides welding arc
M-FS-20084 B68-10357 01

GUIDANCE SENSORS

The Quantasyn, an improved quantum
detector
ERC-10148 B69-10443 01

Hermetically sealed vibration damper
MSC-10959 B69-10634 05

Image position sensor
M-FS-14101 B69-10783 02

GUNS (SUBSTANCES)

Sea dye marker provides visibility for 20
hours
MSC-714 B66-10313 03

GUNS

Shoulder adapter steadies spot welding gun
M-FS-321 B66-10076 05

Fingertip current control facilitates use
of arc welding gun
MSC-289 B66-10092 05

GUY WIRES

Oceanborne transponder platform has good
stability
M-FS-171 B65-10035 05

GYPSUM

Epoxy-resin patterns speed shell-molding of
aluminum parts
M-FS-303 B65-10177 05

GYRATION

Study of high-speed angular-contact ball
bearings under dynamic load
M-FS-20562 B69-10367 05

GYRATORS

Gyrator-type circuits replace ungrounded
inductors
IAC-10608 B68-10084 01

Energy-storage of a prescribed impedance
ARG-10428 B69-10431 02

GYROSCOPE FLUIDS

Improved gyro-flotation /damping/ fluids
MSC-13217 B69-10360 03

GYROSCOPES

Slit feeds reduce unbalanced torques in
gas-lubricated bearings
JPL-264 B65-10099 05

Electron beam seals outer surfaces of porous
bodies
M-FS-562 B66-10033 03

Developmental instrument supplies accurate
attitude and attitude-rate data
HQ-57 B66-10607 01

Conceptual nonorthogonal gyro configuration
for guidance and navigation
MSC-11363 B67-10433 01

Stable ac phase and amplitude comparator
M-FS-13086 B67-10459 01

Squeeze-film gas bearing technology
M-FS-14821 B68-10180 05

Laser system used for dynamic balancing of
gyros
M-FS-12218 B68-10225 05

Improved gas ring laser
MSC-11584 B68-10304 02

Compensation of pulse-rebalanced inertial
instruments
MSC-13098 B69-10216 01

H

HAFNIUM

High-strength tungsten alloy with improved
ductility
LEWIS-10257 B67-10340 03

HAFNIUM ALLOYS

New tungsten alloy has high strength
at elevated temperatures
LEWIS-336 B66-10551 03

HAFNIUM OXIDES

Protective coating withstands high temperature
in oxidizing atmosphere
M-FS-529 B66-10044 03

HAIL

Simulated hailstone fabrication and use in
testing weatherability of structures
NFO-10783 B68-10552 03

HALIDES

Welding, bonding, and sealing of refractory
metals by vapor deposition
LEWIS-123 B67-10232 03

Improved high-temperature silicide coatings
LEWIS-10817 B69-10266 03

Improved gyro-flotation /damping/ fluids
MSC-13217 B69-10360 03

Improved retort for cleaning metal powders
with hydrogen
LEWIS-10718 B69-10468 03

Analysis of secondary cells with
lithium anodes and immobilized
fused-salt electrolytes
ARG-10452 B69-10613 01

HALL EFFECT

System measures arc energy dissipated in
relay contact cycling
M-FS-14541 B68-10312 01

HALOGEN COMPOUNDS

Xenon fluoride solutions effective as
fluorinating agents
ARG-217 B67-10133 03

Fire retardant foams developed to suppress
fuel fires
ARC-10098 B68-10358 03

Zone purification of potassium chloride
ARG-10377 B69-10241 03

HALOGENATION

Synthesis of various highly halogenated
monomers and polymers
M-FS-2143 B67-10100 03

Fire retardant foams developed to suppress
fuel fires
ARC-10098 B68-10358 03

HALOGENS

Silazane elastomer remains resilient at
400 deg C
M-FS-1144 B66-10667 05

HARDENING (MATERIALS)

HARDENING (MATERIALS)

Removable preheater elements improve oxide induction furnace
JPL-288 B63-10193 01

Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application
LANGLEY-6A B63-10318 03

Boron-deoxidized copper withstands brazing temperatures
M-FS-762 B66-10273 03

Quick-set temporary bonding clamps
NPO-10695 B69-10406 03

HARDNESS

Dry film lubricant is effective at extreme loads
M-FS-628 B66-10256 03

Valve seat pores sealed with thermosetting monomer
M-FS-900 B66-10322 03

Traveling wire electrode increases productivity of Electrical Discharge Machining /EDM/ equipment
ARG-136 B67-10238 05

A new method for producing optical mirrors
HQ-10227 B69-10529 02

HARDWARE

Composite bulkhead fabrication development
M-FS-1264 B66-10582 05

Computer program determines chemical equilibria in complex systems
LEWIS-281 B66-10671 01

Data retrieval system provides unlimited hardware design information
MSC-1144 B67-10170 01

Chemical milling solution reveals stress corrosion cracks in titanium alloy
LANGLEY-10077 B67-10322 03

Multiple correlation computer program determines relationships between several independent and dependent variables
M-FS-13024 B67-10327 06

Test device prevents weld joint damage by eliminating axial pin forces on unpotted modules
LEWIS-10201 B67-10359 01

Eccentric drive mechanism is adjustable during operation
M-FS-2576 B67-10373 05

Reidentifying hardware after loss of serial number
M-FS-18133 B69-10059 05

Technique for assessing potential fire hazards
HQ-10279 B69-10287 03

A method for using surface tension to determine the size of holes in hardware
MSC-15194 B69-10595 03

Investigation of the development of cracks in solder joints
M-FS-20444 B69-10807 01

HARMONIC ANALYSIS

Harmonic distortion analyzer speeds setup of magnetic tape recorders
GSFC-10198 B68-10254 01

HARMONIC FUNCTIONS

Large-amplitude inviscid fluid motion in an accelerating container
MSC-11560 B68-10170 02

SUBJECT INDEX

HARMONIC GENERATIONS

Wide-band doubler and sine wave quadrature generator
NPO-11133 B69-10383 01

HARMONIC GENERATORS

Efficient millimeter wave 1140 GHz/ diode for harmonic power generation
HQ-61 B67-10166 01

Experimental coherent fractional frequency multiplier at S-band
M-FS-2427 B67-10250 01

HARMONIC OSCILLATION

Improved circuit for measuring capacitive and inductive reactances
M-FS-13083 B67-10513 01

HARMONIC OSCILLATORS

Synthesis of electro-optic modulators for amplitude modulation of light
M-FS-14268 B68-10275 02

HARMONICS

Double emitter suppressed carrier modulator uses commercially available components
M-FS-2494 B67-10101 01

Vibration damping composition has flush-away feature
M-FS-597 B67-10432 03

HARNESSES

Nylon shock absorber prevents injury to parachute jumpers
MSC-226 B66-10080 05

Body-fitted harness provides safe and easy component handling
M-FS-533 B66-10202 05

Simulator effects partial gravity conditions
MSC-152 B66-10339 05

Web belt load measuring instrument has excellent stability
MSC-921 B67-10242 01

Safety yoke would protect construction workers from falling
KSC-10075 B67-10445 05

HASTELLOY (TRADEMARK)

Composite weld rod corrects individual filler weaknesses
M-FS-1923 B67-10107 05

Weld procedure produces quality welds for thick sections of Hastelloy-X
NUC-10048 B67-10195 05

Hastelloy X properties, data, and metallurgical characteristics
NUC-10302 B68-10023 03

Magnetic forming of resistive materials
M-FS-20417 B69-10397 03

Technique for predicting the thermal expansion coefficients of cryogenic metallic alloys
NUC-10554 B69-10707 02

HATCHES

Concealed hinge permits flush mounting of doors and hatches
MSC-623 B66-10336 03

Inflatable O-ring seal would ease closing of hatch cover plate
MSC-740 B66-10385 05

Interior servicing platform simplifies maintenance of storage tanks
M-FS-1300 B66-10425 05

HAULING

Detachable caster adapter

HIGH VACUUM

Thermionic diode switching has high temperature application NFO-10404	B67-10672	01	High-temperature thermionic emission microscope NFO-10584	B68-10516	01
Asbestos and Inconel combined to form hot-gas seal M-PS-14004	B68-10162	05	Metallic diffusion measured by a modified Knudsen technique HQ-10145	B69-10309	03
High temperature alloy LEWIS-10377	B68-10253	03	Retention of ductility in high-strength steels ARG-10497	B69-10616	03
Ultrasonic temperature measuring device LEWIS-10446	B68-10319	01	Mass-spectrometric study of the rhenium-oxygen system ARG-10421	B69-10645	02
HIGH TEMPERATURE FLUIDS			HIGH TEMPERATURE TESTS		
Diaphragm valve for corrosive and high temperature fluid flow control has unique features LEWIS-304	B66-10365	05	Apparatus facilitates pressure-testing of metal tubing LEWIS-174	B65-10131	05
Flowmeter measures flow rates of high temperature fluids LEWIS-328	B66-10521	01	Evaluation of high temperature stranded hookup wire M-PS-2478	B67-10122	03
Consolidation and fabrication techniques for vanadium-20 w/o titanium /TV-20/ ARG-10148	B68-10368	03	Tensile testing grips ensure uniform loading of bimetal tubing specimens LEWIS-10267	B68-10248	05
Corrosion reduction of aluminum alloys in flowing high-temperature water ARG-10244	B69-10029	03	High-temperature bearing lubricants LEWIS-10408	B68-10249	05
HIGH TEMPERATURE GASES			Consolidation and fabrication techniques for vanadium-20 w/o titanium /TV-20/ ARG-10148	B68-10368	03
Probe measures characteristics of hot gas stream M-PS-240	B65-10133	02	Renewal of corrosion protection of coated aluminum after welding M-PS-20361	B69-10150	05
Self-balancing line-reversal pyrometer automatically measures gas temperatures LEWIS-348	B67-10268	01	Self-lubricating gear M-PS-14971	B69-10408	05
A method of determining combustion gas flow M-PS-13757	B67-10455	03	Engineering thermal analyzer /BETA 2/ M-PS-15055	B69-10760	06
Computer program calculates peripheral water injection cooling of axisymmetric subsonic diffuser NUC-10541	B67-10543	06	HIGH VACUUM		
HIGH TEMPERATURE LUBRICANTS			Gallium useful bearing lubricant in high-vacuum environment LEWIS-12	B63-10337	03
Lead oxide ceramic makes excellent high-temperature lubricant LEWIS-144	B64-10116	03	Molybdenum disulfide mixtures make effective high-vacuum lubricants M-PS-54	B63-10453	03
Solid-film lubricant is effective at high temperatures in vacuum LEWIS-228	B66-10087	03	Improved molybdenum disulfide-silver motor brushes have extended life M-PS-64	B63-10479	03
High-temperature bearing lubricants LEWIS-10408	B68-10249	05	Connector seals fluid lines at cryogenic temperatures and high vacuums GSFC-253	B64-10327	05
Evaluation of lubricants for ball bearings at high temperatures LEWIS-10578	B69-10025	03	Adhesive for vacuum environments resists shock and vibration MSC-56	B65-10016	03
HIGH TEMPERATURE NUCLEAR REACTORS			New alloy brazes titanium to stainless steel MSC-102	B65-10060	05
An ultrasonic method for studying elastic moduli as a function of temperature ARG-10187	B69-10082	02	Spherical electrode eliminates high-voltage breakdown LEWIS-155	B65-10139	01
HIGH TEMPERATURE PLASMA			Instrument accurately measures extremely low air densities M-PS-193	B65-10221	01
Imaging slitless spectrometer for X-ray astronomy M-PS-14309	B68-10546	02	Titanium diaphragm makes excellent amplitron cathode support GSFC-394	B65-10298	01
HIGH TEMPERATURE RESEARCH			Polytetrafluoroethylene lubricates ball bearings in vacuum environment M-PS-379	B66-10081	03
Modified thermocouple is effective from minus 250 deg to 5000 deg F MSC-420	B66-10461	01	Rod and dish cathode improves penning-type vacuum gage GSFC-447	B66-10082	01
Tungsten insulated susceptor cup for high temperature induction furnace eliminates contamination LEWIS-283	B66-10538	03			
Properties of optics at high temperature and their measurement, a study M-PS-14696	B68-10240	02			

HIGH VOLTAGES

SUBJECT INDEX

Solid-film lubricant is effective at high temperatures in vacuum LEWIS-228	B66-10087	03	forming system M-FS-2142	B67-10126	02
Gallium alloy films investigated for use as boundary lubricants LEWIS-245	B66-10165	03	Hybrid solid state switch replaces motor-driven power switch JPL-931	B67-10165	01
Bearing alloys with hexagonal crystal structures provide improved friction and wear characteristics LEWIS-320	B66-10373	03	Thermal neutron image intensifier tube provides brightly visible radiographic pattern ARG-120	B67-10296	02
Improved design provides faster response time in photomultiplier GSFC-451	B66-10526	01	High-voltage pulse generator developed for wide-gap spark chambers ARG-10136	B68-10283	01
Tantalum alloys resist creep deformation at elevated temperatures LEWIS-350	B66-10558	03	Solid state high-voltage pulser operates with low supply voltage M-FS-14034	B68-10308	01
Feed-thru flange is useful in vacuum applications to cryogenic temperatures JPL-846	B66-10615	02	High voltage pulse generator MSC-12178	B69-10548	01
Improved rolling element bearings provide low torque and small temperature rise in ultrahigh vacuum environment LEWIS-359	B66-10678	05	Automatic frequency control of voltage-controlled oscillators NPO-11064	B69-10569	01
Combination double door high-vacuum valve provides access to vacuum chamber JPL-849	B66-10697	05	Automated plotting of equipotentials NPO-11134	B69-10570	01
An improved soft X-ray photoionization detector GSFC-540	B67-10072	02	HIGHWAYS Thermophysical properties of sodium ARG-10363	B69-10240	03
Environmental study of miniature slip rings M-FS-2443	B67-10210	05	HINGES Concealed hinge permits flush mounting of doors and hatches MSC-623	B66-10336	03
Machine tests slow-speed sliding friction in high vacuum M-FS-12341	B67-10379	05	Device serves as hinge and electrical connector for circuit boards M-FS-743	B66-10359	01
Improved process for making thin-film sodium niobate capacitors MSC-11231	B68-10163	01	Simple motor drive system operates heavy hinged door NU-0093	B66-10712	05
High-emittance coatings on metal substrates LEWIS-10325	B68-10381	03	Adjustable hinge permits movement of knee in plaster cast M-FS-1756	B67-10056	04
Study of high temperature bearing materials LEWIS-10829	B69-10252	03	Welding torch and wire feed manipulator M-FS-13102	B67-10385	05
Evaluation of magnetic materials for static inverters and converters LEWIS-10343	B69-10306	01	HISTOGRAMS Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors M-FS-1887	B67-10434	01
HIGH VOLTAGES Efficient circuit triggers high-current, high-voltage pulses MSC-14	B64-10024	01	The response of monoenergetic gamma rays in finite media are investigated ARG-10295	B69-10080	02
Cold cathode ionization gage has rigid metal housing GSFC-445	B66-10041	01	HISTOLOGY Foot-operated cell-counter ARG-10315	B69-10351	01
Rod and dish cathode improves penning-type vacuum gage GSFC-447	B66-10082	01	HISTORIES Computer program FPIP-REV calculates fission product inventory for U-235 fission NUC-10089	B67-10450	06
Electric arc heater is self starting LANGLEY-208	B66-10230	03	LABCON - Laboratory Job Control program M-FS-18141	B69-10106	06
Dust particle injector for hypervelocity accelerators provides high charge-to-mass ratio GSFC-509	B66-10347	01	HOLDERS Molded elastomer provides compact ferrite-core holder, simplifies assembly JPL-584	B64-10084	05
Process reduces secondary resonant emission in electronic components JPL-934	B66-10685	01	Improved holder protects crystal during high acceleration and impact JPL-463	B65-10037	05
Low input voltage converter/regulator minimizes external disturbances GSFC-527	B66-10689	01	Carbon-arc rod holder has long life, reduces arc splatter MSC-144	B65-10095	03
High-energy-rate magnetohydraulic metal					

SUBJECT INDEX

HOMOGENIZING

Insulator-holder protects transistors in dense electronic assemblies MSC-214	B65-10389	01	X-ray film holder permits single continuous picture of tubing joint LEWIS-10382	B68-10343	05
Specimen holder design improves accuracy of X-ray powder analysis JPL-SC-165	B66-10075	02	Versatile impact hand tool M-FS-20140	B68-10371	05
Pipe cutting tool is useful in limited space MSC-36	B66-10102	05	Tape reading fixture M-FS-14146	B69-10008	05
Fixture aids soldering of electronic components on circuit board ARC-56	B66-10162	01	HOLDING Residual magnetism holds solenoid armature in desired position LEWIS-343	B67-10038	01
Multisurface fixture permits easy grinding of tool bit angles M-FS-586	B66-10171	05	Programmed schedule holds for improving launch vehicle holds M-FS-14502	B69-10602	03
Tool post modification allows easy turret lathe cutting-tool alignment M-FS-581	B66-10191	05	HOLE DISTRIBUTION (ELECTRONICS) Electroformed screens with uniform hole size LEWIS-10117	B68-10107	05
Soldering iron temperature is automatically reduced ARC-57	B66-10203	01	Nondestructive evaluation of printed wiring boards by microhm resistance measurements SAN-10034	B69-10272	01
Tool separates sleeve-type unions without heat MSC-497	B66-10253	05	HOLE DISTRIBUTION (MECHANICS) Gear drive automatically indexes rotary table M-FS-753	B66-10383	05
Fixed vacuum plate clamps styrofoam for machining M-FS-683	B66-10283	05	Computer program calculates and plots surface area and pore size distribution data GSFC-10362	B68-10009	06
Swiveling lathe jaw concept for holding irregular pieces M-FS-783	B66-10321	05	A method for using surface tension to determine the size of holes in hardware MSC-15194	B69-10595	03
Inflatable holding fixture permits X-rays to be taken of inner weld areas M-FS-856	B66-10327	03	HOLES Hole saw drill attachment has zero force reaction MSC-543	B66-10604	05
Inspection of fine wires simplified by capillary tube wire holder MSC-358	B66-10329	01	HOLLOW Plugged hollow shaft makes fatigue-resistant shear pin LANGLEY-195	B66-10077	05
Adapter assembly prevents damage to tubing during high pressure tests MSC-563	B66-10330	02	Hollow needle used to cut metal honeycomb structures MSC-486	B66-10244	05
Device serves as hinge and electrical connector for circuit boards M-FS-743	B66-10359	01	Self-sealing closure enables access to several fluid containers NPO-10123	B67-10207	04
Versatile machine mills, saws light materials M-FS-827	B66-10364	05	HOLOGRAPHY Improvement in recording and reading holograms ERC-10151	B68-10347	02
Special tool kit aids heavily garmented workers MSC-163	B66-10403	05	Fine-line sensitivity for holographic interferograms HQ-10348	B69-10663	02
Flexible drive allows blind machining and welding in hard-to-reach areas MSC-524	B66-10428	05	Long range holographic contour mapping concept HQ-10350	B69-10700	02
Heat-treatment of metal parts facilitated by sand embedment M-FS-1543	B66-10616	03	HOMOGENEITY Stationary device produces homogeneous mixture of fluids M-FS-525	B66-10570	05
Holding fixture facilitates pipe thread gage measurements M-FS-2009	B67-10066	05	Improved compression molding process LANGLEY-10027	B67-10302	03
Cable clamp bolt fixture facilitates assembly in close quarters KSC-67-80	B67-10244	05	Spectrographic analysis of bismuth-tin eutectic alloys by spark-ignited low-voltage ac-arc excitation ARG-10288	B69-10081	03
Tensile testing grips ensure uniform loading of bimetal tubing specimens LEWIS-10267	B68-10248	05	HOMOGENIZING Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by torsion-effusion technique ARG-277	B67-10324	03
Application of the solid lubricant molybdenum disulfide by sputtering LEWIS-10544	B68-10340	03			
Indium adhesion provides quantitative measure of surface cleanliness SAN-10024	B68-10342	01			

HONEYCOMB CORES

SUBJECT INDEX

Sintering characteristics and properties of PuS and PuP are determined ARG-10228	B69-10058	03	Instrumentation for nondestructive testing of composite honeycomb materials M-FS-20405	B69-10366	03
HONEYCOMB CORES			Nondestructive determination of cohesive strength of adhesive-bonded composites M-FS-20397	B69-10464	03
Flexible honeycomb structure can bend to fit compound curves M-FS-13	B63-10385	05	Freon, T-B1 cutting fluid MSC-11486	B69-10485	05
Fastener distributes stress evenly from sandwich-panel-hung items MSC-236	B65-10358	05	HONING		
Apparatus measures thermal conductivity of honeycomb-core panels LANGLEY-202	B66-10127	01	Run-in with chemical additive protects gear surface M-FS-548	B66-10069	05
Insulation for cryogenic tanks has reduced thickness and weight M-FS-326	B66-10183	02	HOOKS		
Ultrasonic emission method enables testing of adhesive bonds M-FS-799	B66-10341	01	Heavy-duty staple remover operated by hand JPL-IT-1004	B63-10292	05
Aluminum core structures brazed without use of flux M-FS-659	B66-10360	05	Simple mechanism combines positive locking and quick-release features WOO-4	B63-10420	05
Composite bulkhead fabrication development M-FS-1264	B66-10582	05	Threading hook facilitates safe recovery of heavy loads MSC-46	B64-10185	05
HONEYCOMB STRUCTURES			Tool pre-tensions covers prior to lacing MSC-631	B66-10301	05
Refractory ceramic has wide usage, low fabrication cost M-FS-67	B63-10481	03	Detachable caster adapter MSC-91215	B69-10164	05
Apparatus permits flexure testing of specimens at cryogenic temperatures M-FS-257	B65-10129	02	Quick-release hook-and-loop fastener MSC-10950	B69-10388	05
Adjustable knife cuts honeycomb material to specified depth MSC-475	B66-10237	05	HOOPS		
Hollow needle used to cut metal honeycomb structures MSC-486	B66-10244	05	Hollow plastic hoops protect thermocouple in storage and handling NU-0023	B65-10256	05
Ultrasonic quality inspection of bonded honeycomb assemblies is automated MSC-859	B66-10544	01	Analysis of stability-critical orthotropic cylinders subjected to axial compression M-FS-12869	B67-10375	03
Study made to control depth of potting compound for honeycomb sandwich fasteners LEWIS-370	B66-10677	05	Single-source mechanical loading system produces biaxial stresses in cylinders M-FS-12530	B67-10380	05
Detection of entrapped moisture in honeycomb sandwich structures MSC-1103	B67-10116	01	Quick-acting backup tool for welding ducts M-FS-18404	B69-10396	05
Application of distorted models in developing scaled structural models M-FS-2540	B67-10321	05	HORIZON		
Analysis of stability-critical orthotropic cylinders subjected to axial compression M-FS-12869	B67-10375	03	Star/horizon simulator used to test space guidance system MSC-407	B67-10110	02
Heavy-gage bonded honeycomb sandwich as primary load-bearing structure M-FS-12060	B67-10427	05	HORIZON SCANNERS		
Nondestructive testing techniques used in analysis of honeycomb structure bond strength M-FS-1214	B67-10574	01	Sextant measures spacecraft altitude without gravitational reference MSC-200	B66-10143	02
Honeycomb seal backing ring increases turbopump disk life M-FS-13303	B67-10607	05	Special purpose reflectometer uses modified ulbricht sphere MSC-1135	B67-10109	02
Repair of honeycomb panels with welded breakaway studs MSC-15046	B69-10261	05	Automatic star-horizon angle measurement system MSC-11585	B69-10597	01
Technique for anchoring fasteners to honeycomb panels LEWIS-10888	B69-10265	03	HORN ANTENNAS		
			Novel horn antenna reduces side lobes, improves radiation pattern JPL-425	B63-10264	01
			Shortened horn-reflector antenna GSFC-502	B67-10017	01
			HOSES		
			Special pliers connect hose containing liquid under pressure JPL-IT-1003	B63-10291	05
			Safety restrainer prevents whipping of ruptured high-pressure hose LEWIS-99	B64-10348	05
			Dispensing system eliminates torsion in		

SUBJECT INDEX

HUMAN FACTORS ENGINEERING

deployed hoses MSC-80	B65-10185	05	Seismometer designed for remote operation in random orientation JPL-320	B66-10085	01
Rubber-coated bellows improves vibration damping in vacuum lines LEWIS-273	B66-10187	02	High temperature thermocouple operates in reduction atmosphere NU-0046	B66-10134	01
Rotational fluid coupling eliminates hose entanglements MSC-312	B66-10585	05	Solid state thermostat has integral probe and circuitry M-FS-434	B66-10193	01
Plastic tubing protects flexible copper hose M-FS-772	B66-10588	05	Segmented ball valve is easy to open and close WOO-248	B66-10195	05
Method for predicting frictional loss in metal bellows and flexible hose M-FS-883	B66-10662	05	Temperature responsive valve withstands high impact loading NPO-10186	B67-10225	05
Hand-tightened, high-pressure seal M-FS-18416	B68-10417	05	Tool samples subsurface soil free of surface contaminants MSC-10988	B67-10473	05
Teflon-packed flexible joint LEWIS-90252	B69-10049	03	Computer program analyzes whirl critical speeds and bearing loads for shafts coupled by nonlinear springs to machine housing NUC-10308	B69-10034	06
TFE-fluorocarbon liners for flexible hoses M-FS-16480	B69-10288	05	Improved mouse cage provides versatility and ease in handling laboratory mice MSC-12250	B69-10124	04
Flexible rivet-set M-FS-20317	B69-10459	05	Hermetically sealed pump LEWIS-10837	B69-10320	05
Torsional tubular disconnect NPO-10704	B69-10499	05	HUBS		
Two-functional seal for hose connection M-FS-14062	B69-10588	05	Device measures curved surface finish on gear teeth WOO-112	B65-10064	05
HOSPITALS			Computer program performs flow analysis through turbines LEWIS-236	B66-10496	01
Electrocardiograph transmitted by RF and telephone links in emergency situations FRC-10031	B68-10233	01	Improved design of item in high speed rotating machinery M-FS-18441	B69-10373	05
HOT CATHODES			HUMAN BEHAVIOR		
Vacuum gage system for radiation environment LEWIS-10797	B69-10156	01	Modified algometer provides accurate depth measurements MSC-616	B66-10647	04
HOT ELECTRONS			HUMAN BEINGS		
Vacuum gage system for radiation environment LEWIS-10797	B69-10156	01	Gelatin coated electrodes allow prolonged bioelectronic measurements MSC-153	B66-10088	01
HOT PRESSING			Electrocardiograph transmitted by RF and telephone links in emergency situations FRC-10031	B68-10233	01
Aluminum/steel wire composite plates exhibit high tensile strength M-FS-401	B66-10262	05	HUMAN BODY		
HOT-WIRE ANEMOMETERS			Novel shock absorber features varying yield strengths MSC-63A	B64-10138	03
Cooling method prolongs life of hot-wire transducer LEWIS-41	B63-10344	02	HUMAN FACTORS ENGINEERING		
Experimental design for research on shock-turbulence interaction M-FS-20031	B69-10604	02	Optical projectors simulate human eyes to establish operator's field of view WOO-250	B66-10010	02
HOT-WIRE FLOWMETERS			Shoulder adapter steadies spot welding gun M-FS-321	B66-10076	05
Study of hot wire techniques in low density flows with high turbulence levels M-FS-1269	B66-10687	01	Fingertip current control facilitates use of arc welding gun MSC-289	B66-10092	05
Thermal conductivity probe M-FS-20566	B69-10780	03	Body-fitted harness provides safe and easy component handling M-FS-533	B66-10202	05
HOT WORKING			Legibility of electroluminescent instrument panels investigated MSC-494	B66-10316	02
Development of technology for hot-drape forming of large torus sections M-FS-12141	B67-10341	05	Portable lightweight cell provides controlled environment		
Magnesium-lithium alloys developed for low temperature use M-FS-1541	B67-10365	03			
Basal-plane metallography of deformed pyrolytic carbon NPO-11196	B69-10488	03			
HOUSINGS					
Cold cathode ionization gage has rigid metal housing GSPC-445	B66-10041	01			

HUMAN PATHOLOGY

SUBJECT INDEX

MSC-648 B66-10370 05
 One-piece transparent shell improves design of helmet assembly
 MSC-187 B66-10390 05
 Special tool kit aids heavily garmented workers
 MSC-163 B66-10403 05
 A phonocardiogram simulator
 KSC-67-94 B67-10239 01
 Electronic dummy for acoustical testing
 MSC-206 B67-10298 01

HUMAN PATHOLOGY
 Carbon offers advantages as implant material in human body
 M-FS-18207 B69-10087 04
 Direct reading of electrocardiograms and respiration rates
 KSC-10233 B69-10188 04

HUMAN PERFORMANCE
 Spray-on electrodes enable EKG monitoring of physically active subjects
 FRC-36 B66-10649 04
 Effect of surface irregularities on bellows fatigue life
 M-FS-14480 B68-10229 05

HUMAN REACTIONS
 Improved electrode paste provides reliable measurement of galvanic skin response
 MSC-146 B66-10049 04
 Human transfer functions used to predict system performance parameters
 LANGLEY-203 B66-10379 01

HUMAN TOLERANCES
 Concentrations of the naturally occurring radionuclides Pb-210, Po-210, and Ra-226 in aquatic fauna
 ARG-10345 B69-10258 02

HUMIDITY
 Materials physically tested in variable-environment chamber
 JPL-789 B66-10130 01
 Dewpoint temperature inversions analyzed
 ARG-10316 B69-10057 02
 Multilayer infrared beamsplitter film system
 XGS-11036 B69-10260 02

HUMIDITY MEASUREMENT
 Fluidic oscillator used as humidity sensor
 LEWIS-340 B67-10063 05
 Connector shorting cap provides pin alignment, inspection, and stray voltage protection
 M-FS-13111 B67-10635 01
 Millimeter-wave atmospheric loss prediction method
 NPO-11054 B69-10584 01

HYBRID COMPUTERS
 Hybrid computer technique yields random signal probability distributions
 ARC-34 B65-10208 01

HYDRATES
 Hydrated multivalent cations are new class of molten salt mixtures
 ARG-211 B67-10033 03
 New class of compounds have very low vapor pressures
 ARG-115 B67-10184 03
 Primary radical yields in pulse irradiated

alkaline aqueous solution
 ARG-10322 B69-10167 02
 Production of solvated electrons
 ARG-10416 B69-10430 03

HYDRATION
 Rate constants measured for hydrated electron reactions with peptides and proteins
 ARG-10195 B68-10424 04

HYDRAULIC CONTROL
 Flow ring valve is simple, quick-acting
 M-FS-752 B66-10255 05
 Rotary valve controls multiple hydraulic leveling cylinders
 M-FS-361 B66-10402 05
 Miniature valve accurately controls small volume fluid flow
 ARG-66 B66-10473 05
 Hydraulically controlled flexible arm can bend in any direction
 KSC-66-20 B66-10626 05
 Pump simulator provides variable pressure-flow characteristics
 LEWIS-10122 B67-10453 05
 Low-cost, fast-response drive circuit for electromagnetic torque motors
 LEWIS-10143 B68-10386 01

HYDRAULIC EQUIPMENT
 Upsetting butt edge increases weld-joint strength
 M-FS-175 B64-10164 05
 Device disconnects several couplings simultaneously
 JPL-226 B65-10163 05
 New nut and sleeve improve flared connections
 M-FS-194 B65-10180 05
 Hydraulic device provides accurate displacements to microinches
 MSC-112 B65-10230 05
 Shock absorber operates over wide range
 MSC-168 B65-10241 05
 Hydraulic drive system prevents backlash
 JPL-371 B65-10351 05
 Electrically heated diaphragm eliminates use of pyrotechnics
 MSC-241 B65-10400 01
 O-ring tube fittings form leakproof seal in hydraulic systems
 M-FS-481 B66-10020 05
 Tool post modification allows easy turret lathe cutting-tool alignment
 M-FS-581 B66-10191 05
 Critical parts are stored and shipped in environmentally controlled reusable container
 M-FS-703 B66-10258 05
 Modified hydraulic braking system limits angular deceleration to safe values
 GSFC-476 B66-10310 05
 Friction loading device enables accurate testing of brittle materials
 NU-0051 B66-10345 05
 Bearing alloys with hexagonal crystal structures provide improved friction and wear characteristics
 LEWIS-320 B66-10373 03
 Rotary valve controls multiple hydraulic leveling cylinders

IMPACT RESISTANCE			IMPEDANCE		
Improved holder protects crystal during high acceleration and impact JPL-463	B65-10037	05	Transistorized trigger circuit is frequency-controllable GSFC-111	B63-10553	01
Seismometer designed for remote operation in random orientation JPL-320	B66-10085	01	High-pass RF coaxial filter rejects dc and low frequency signals GSFC-73	B64-10173	01
Critical parts are stored and shipped in environmentally controlled reusable container M-FS-703	B66-10258	05	Bandwidth switching is transient-free, avoids loss of loop lock WOO-054	B64-10349	01
Impact and puncture resistant material protects parts from damage MSC-747	B66-10375	05	Circuit improvement produces monostable multivibrator with load-carrying capability GSFC-34A	B65-10011	01
One-piece transparent shell improves design of helmet assembly MSC-187	B66-10390	05	Helical coaxial-resonator makes excellent RF filter GSFC-243	B65-10012	01
High impact pressure regulator withstands impacts of over 15,000 g WFO-10175	B67-10274	01	Zener diode function generator requires no external reference voltage JPL-0031	B65-10013	01
Damages in rolling element bearings may be detected early HQ-10031	B67-10658	01	Photoelectric semiconductor switch operates with low level inputs JPL-SC-068	B65-10033	01
Thermal protective visor for entering high temperature areas MSC-10285	B68-10277	05	Microparticle impact sensor measures energy directly GSFC-252	B65-10048	01
IMPACT STRENGTH			Zener diode is starter for transistor regulated power supply NU-0015	B65-10052	01
Heat treatment study of aluminum casting alloy M45 M-FS-2397	B67-10159	03	Vibrating-membrane electrometer has high conversion gain ARC-38	B65-10056	01
Study made of pneumatic high pressure piping materials /10,000 psi/ KSC-10133	B67-10437	03	Synchronized pulse generator needs no external power GSFC-274	B65-10072	01
Improved high-temperature-strength nickel-base superalloy LEWIS-10874	B69-10352	03	Tiny biomedical amplifier combines high performance, low power drain ARC-41	B65-10203	01
A sterilizable high-impact antenna WFO-10231	B69-10697	01	Electrometer preamplifier has drift correction feedback JPL-SC-074	B65-10267	01
IMPACT TESTS			Zener diode controls switching of large direct currents MSC-188	B65-10350	01
Break-up of metal tube makes one-time shock absorber, bars rebound LANGLEY-1A	B63-10304	05	Remote preamplifier circuit maintains stability over wide temperature range WOO-278	B66-10432	01
Analysis of problems related to slingshot shock machine high-velocity shock testing WFO-11193	B69-10506	05	Miniature electrometer preamplifier effectively compensates for input capacitance ARC-69	B66-10549	01
Strain-age cracking in Rene 41 alloy M-FS-18650	B69-10605	03	MOSFET analog memory circuit achieves long duration signal storage M-FS-860	B66-10603	01
IMPACT TOLERANCES			Transistor biased amplifier minimizes diode discriminator threshold attenuation ARG-163	B67-10311	01
Land landing couch dynamics computer program MSC-1210	B67-10233	06	Field effect transistors improve buffer amplifier M-FS-916	B67-10334	01
High impact pressure regulator withstands impacts of over 15,000 g WFO-10175	B67-10274	01	Multiplexer uses insulated gate-field effect transistors M-FS-13096	B67-10396	01
Nickel base alloy with improved stress rupture properties LEWIS-10283	B68-10344	03	Silicon strain sensors enable pressure measurement at cryogenic temperatures M-FS-14703	B68-10262	01
Balloon batteries, charged and heated by solar energy GSFC-10769	B69-10585	01			
IMPACTORS					
Pneumatic wrench retains or discharges nuts or bolts as desired NU-0085	B66-10707	05			
Air sampler collects and protects minute particles HQ-10037	B67-10661	01

INSULATION			Method of measuring thermal conductivity of high performance insulation M-FS-14088		
Low-cost insulation system for cryostats eliminates need for a vacuum LEWIS-64	B63-10365	03	Panelized high performance multilayer insulation M-FS-14023	B68-10031	03
Composite, vacuum-jacketed tubing replaces bellows in cryogenic systems LEWIS-67	B63-10368	05	Simple test for physical stability of cryogenic tank insulation M-FS-12547	B68-10048	03
Ionization vacuum gage starts quickly, is unaffected by spurious currents JPL-304	B65-10036	02	Lightweight heater generates high temperatures from low current SAN-10004	B68-10223	01
Cutter and stripper reduces coaxial cable connection time ARC-40	B65-10094	05	Moebius resistor is noninductive and nonreactive SAN-10020	B68-10267	01
Spherical electrode eliminates high-voltage breakdown LEWIS-155	B65-10139	01	Fiber glass prevents cracking of polyurethane foam insulation on cryogenic vessels M-FS-20058	B68-10406	02
Refractory oxides evaluated for high-temperature use LANGLEY-121	B65-10167	03	Device for diode tuning in a stripline varactor harmonic multiplier M-FS-20153	B69-10013	01
Electronic modules easily separated from heat sink MSC-142	B65-10186	02	Thermal radiation shields for piping in vacuum environments LEWIS-10899	B69-10262	03
Thin transparent films formed from powdered glass GSFC-352	B65-10217	03	Development of structural test articles from magnesium-lithium and beryllium M-FS-14959	B69-10417	03
Insulation accelerates rate of cooling with cryogenic fluid MSC-161	B65-10240	02			
Closed fluid system without moving parts controls temperature LEWIS-222	B65-10331	02			
Soluble undercoating facilitates removal of foamed-in-place insulation LEWIS-193	B65-10344	03			
Air-cured ceramic coating insulates against					

INSULATORS

SUBJECT INDEX

Automated plotting of equipotentials NPO-11134	B69-10570	01	Field-effect transistor replaces bulky transformer in analog-gate circuit GSFC-351	B65-10284	01
Balloon batteries, charged and heated by solar energy GSFC-10769	B69-10585	01	Frequency divider is free of spurious outputs GSFC-308	B65-10334	05
Liquid oxygen-compatible insulation system M-FS-16113	B69-10599	03	Miniature bioelectric device accurately measures and telemeters temperature ARC-52	B66-10057	01
Reducing contact resistance at semiconductor to metal or aluminum to metal interfaces ERC-10254	B69-10689	01	Diffusion technique stabilizes resistor values MSC-205	B66-10142	01
INSULATORS			Binary fluid amplifier solves stability and load problems ERC-15	B66-10177	01
Welded pressure transducer made as small as 1/8th-inch in diameter ARC-11	B63-10429	03	Solid state thermostat has integral probe and circuitry M-FS-434	B66-10193	01
Modified RF coaxial connector ends vacuum chamber wiring problem GSFC-150	B64-10010	01	FET comparator detects analog signal levels without loading analog device M-FS-503	B66-10224	01
Standoff tool speeds placement of friction-fit electrical terminals WOO-029	B65-10348	05	Electronic phase-locked-loop speed control system is stable JPL-SC-084	B66-10232	01
Insulator-holder protects transistors in dense electronic assemblies MSC-214	B65-10389	01	High-performance RC bandpass filter is adapted to miniaturized construction ARC-60	B66-10309	01
Rugged switch responds to minute pressure differentials M-FS-12704	B67-10389	01	Circuit provides accurate four-quadrant multiplication WOO-272	B66-10331	02
Technique eliminates high voltage arcing at electrode-insulator contact area LEWIS-10133	B67-10470	01	Single channel pulse-height analyzer operates in subnanosecond range LEWIS-267	B66-10377	01
Simple switch actuated by force applied over wide solid angle INP-09808	B69-10032	01	Video signal processing system uses gated current mode switches to perform high speed multiplication and digital-to-analog conversion MSC-781	B66-10429	01
Pulsed high-voltage dc RF sputtering LEWIS-10920	B69-10699	01	Integrator can easily be set and reset with an electronic switch ARC-10002	B67-10135	01
INTAKE SYSTEMS			Solid state phase detector replaces bulky transformer circuit MSC-11007	B67-10253	01
Packless valve with all-metal seal handles wide temperature, pressure range JPL-361	B63-10228	05	Solid state circuit averages multiple signals and rejects those varying significantly from the average NUC-10066	B67-10262	01
Spherical pipe joint delivers loads equally to mating flange M-FS-807	B66-10665	05	Sensitive bridge circuit measures conductance of low-conductivity electrolyte solutions ARG-147	B67-10294	01
Concept for sleeve induction motor with 1-msec mechanical time constant ARG-10124	B68-10185	01	Method of improving contact bonds in silicon integrated circuits M-FS-1753	B67-10335	01
Method for predicting pump cavitation performance LEWIS-10916	B69-10446	02	Digital-to-analog converter operates from low level inputs JPL-907	B67-10357	01
INTEGERS			Transient sensor development M-FS-13370	B67-10471	01
Linear systems of equations solved using mathematical algorithms ARG-10146	B68-10292	06	Test and inspection for process control of monolithic circuits M-FS-13084	B67-10507	01
INTEGRAL EQUATIONS			Logic realization of simple majority voting connectives JPL-727	B67-10511	06
Calculation of resonance neutron absorption in two-region problems /the GAROL code/ NUC-10045	B67-10223	06	Development of reliability prediction technique for semiconductor diodes GSFC-10231	B67-10651	06
Computer program calculates the effective temperature for a crystalline solid /DETS/ NUC-10161	B69-10036	06			
Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices ARG-10445	B69-10415	02			
Finite element formulation for linear thermoviscoelastic materials NPO-11229	B69-10660	03			
INTEGRATED CIRCUITS					
Crystal measures short-term, large-magnitude forces JPL-77	B65-10187	01			

SUBJECT INDEX

INTEGRITY

Low cost SCR lamp driver indicates contents of digital computer registers
GSFC-10221 B67-10656 01

Dc pin-to-pin testing of integrated circuits
GSFC-10284 B68-10001 01

Small, low power analog-to-digital converter
M-FS-13954 B68-10016 01

Accumulator for shaft encoder
M-FS-13599 B68-10093 01

Piggy-back mounting would increase microcircuit packaging density
MSC-12059 B68-10114 01

Active rc networks of low sensitivity for integrated circuit transfer function
ARC-10146 B68-10210 01

Random access-random release relay switching matrix
M-FS-12590 B68-10301 01

Improved process for epitaxial deposition of silicon on prediffused substrates
M-FS-14910 B68-10390 03

Amplifier improvement circuit
LEWIS-10712 B68-10456 01

Microelectronic oscillator
GSFC-10375 B69-10064 01

Simple demodulator for telemetry phase-shift keyed subcarriers
NPO-11000 B69-10095 01

Integrated circuit with multiple collector current source
M-FS-20177 B69-10126 01

Tunable bandpass filter with variable selectivity
ARC-10191 B69-10130 01

Low-cost voltage-level detector
LEWIS-10885 B69-10217 01

Multiple-mask chemical etching
MSC-13114 B69-10221 01

An integrated circuit switch
NPO-11073 B69-10326 01

Automatic calorimetry system monitors RF power
NPO-11033 B69-10384 01

Dielectric materials for use in thin-film capacitors
M-FS-20471 B69-10387 02

Leads integral with the internal interconnection that penetrate the molded wall of a package
LANGLEY-10228 B69-10436 01

Improved method of dicing integrated circuit wafers into chips
ERC-10138 B69-10441 01

Modular packaging technique for combining integrated circuits and discrete components
GSFC-10369 B69-10453 01

Special purpose computer provides programmable digital filter for sampled-data control systems
M-FS-20290 B69-10454 06

Literal readout of identification signals in Morse code
LANGLEY-10222 B69-10479 01

Phase-locked-loop phase modulator with

high modulation index, low distortion
MSC-12247 B69-10487 01

Folded stick module
NPO-10854 B69-10498 01

Automatic frequency control of voltage-controlled oscillators
NPO-11064 B69-10569 01

Highly stable high-rate discriminator for nuclear counting
ARG-10483 B69-10614 01

Pulse-height analyzer with digital readout
ARG-10503 B69-10640 01

Microelectronic device data handbook
ERC-10322 B69-10687 01

INTEGRATORS

Inexpensive, stable circuit measures heart rate
MSC-95 B65-10010 01

System selects framing rate for spectrograph camera
LANGLEY-55 B65-10086 01

Simple circuit functions as frequency discriminator for PFM signals
GSFC-267 B65-10102 01

Solid-state switching used to speed up capacitive integrator
LANGLEY-104 B65-10159 01

Frequency correction device uses digital circuitry
GSFC-268 B65-10307 01

Electronic ampere-hour integrator is accurate to one percent
GSFC-203 B65-10308 01

Automatic system determines moments of inertia of asymmetrical objects
M-FS-1769 B66-10636 01

Integrator can easily be set and reset with an electronic switch
ARC-10002 B67-10135 01

Accuracy of laser measurements improved by pulse autocorrelator electronic system
MSC-10033 B67-10338 01

Digital voltage-controlled oscillator
GSFC-512 B67-10449 01

Recharge unit provides for optimum recharging of battery cells
GSFC-10688 B68-10273 01

Solution of differential equations by application of transformation groups
M-FS-14802 B68-10276 02

System measures arc energy dissipated in relay contact cycling
M-FS-14541 B68-10312 01

Improved phase-shift-keyed detector
M-FS-20064 B69-10101 01

Tracer of electrical conduit or pipes
MSC-15223 B69-10347 01

Measurement technique for the determination of antenna directivity
M-FS-12799 B69-10677 01

INTEGRITY

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile
ARC-10221 B69-10232 06

INTENSITY

SUBJECT INDEX

INTENSITY

Device to color modulate a stationary light beam gives high intensity
HQ-44 B66-10476 01

High intensity radiation heat source is capable of sustained operation
ARC-61 B66-10547 02

A radiometer-pyrometer
LEWIS-284 B66-10606 01

INTERACTIONS

Fluid logic control circuit operates nutator actuator motor
LEWIS-294 B66-10593 05

Device measures reaction engine thrust vector deviations
JPL-SC-163 B66-10642 05

Four pi-recoil proportional counter used as neutron spectrometer
ARG-10101 B68-10326 02

Shock and vibration response of multistage structure
M-FS-14972 B68-10353 05

INTERFACES

Seal allows blind assembly and thermal expansion of components
NU-0005 B65-10053 05

Brazing method produces solid-solution bond between refractory metals
LEWIS-212 B65-10370 05

Study made to establish parameters and limitations of explosive welding
M-FS-13006 B67-10393 05

Study of behavior of sterols at interfaces
ARG-10085 B68-10281 03

Fluidic-thermochromic display device
ERC-10031 B68-10350 01

Electrochemical study of aluminum corrosion in boiling high purity water
ARG-10306 B69-10033 03

A method for predicting interfacial freezing of a liquid flowing over a cold surface
LEWIS-10813 B69-10321 02

INTERFACIAL TENSION

Aluminum alloys protected against stress-corrosion cracking
M-FS-235 B65-10172 03

Tool pre-tensions covers prior to lacing
MSC-631 B66-10301 05

Sprayable birefringent coating enables strain measurements on large surfaces
M-FS-1484 B66-10578 03

Improved method of edge coating flat ribbon wire
M-FS-902 B66-10684 03

Optimetric system facilitates colorimetric and fluorometric measurements
NPO-10233 B68-10316 01

Dynamics of moving bubbles in single and binary component systems
M-FS-14845 B68-10339 02

A method for using surface tension to determine the size of holes in hardware
MSC-15194 B69-10595 03

INTERFERENCE

Point-source light sensor circuit is insensitive to background light
JPL-778 B66-10502 01

Measuring coplanarity of surfaces
MSC-12044 B67-10371 02

Interference effects eliminated in random oriented space station antenna system
MSC-11004 B67-10435 01

Improvement in recording and reading holograms
ERC-10151 B68-10347 02

PCM bit detection with correction for intersymbol interference
GSFC-10155 B69-10153 01

INTERFERENCE FACTOR TABLE

Basic suppression techniques are evaluated
M-FS-867 B66-10449 01

INTERFEROMETERS

Interferometer combines laser light source and digital counting system
MSC-151 B65-10161 01

Interferometer construction assures parallelism of critical components
JPL-704 B65-10292 02

Unique construction makes interferometer insensitive to mechanical stresses
JPL-725 B65-10295 02

Communication system uses modulated laser beam
GSFC-377 B65-10333 01

Motion drive system is accurately controlled in the 1-micron range
JPL-864 B66-10695 05

Fresnel diffraction plates are simple and inexpensive
M-FS-12731 B67-10297 02

An interferometer tracking radar system
MSC-10956 B69-10523 01

Laser interferometer micrometer system
M-FS-14747 B69-10633 02

INTERFEROMETRY

Measuring coplanarity of surfaces
MSC-12044 B67-10371 02

Multilayer infrared beamsplitter film system
XGS-11036 B69-10260 02

Two-color holography
HQ-10349 B69-10662 02

Fine-line sensitivity for holographic interferograms
HQ-10348 B69-10663 02

INTERGRANULAR CORROSION

Boron-deoxidized copper withstands brazing temperatures
M-FS-762 B66-10273 03

Weld microfissuring in Inconel 718 minimized by minor elements
M-FS-18185 B68-10251 03

Effects of high frequency current in welding aluminum alloy 6061
M-FS-18337 B68-10383 05

INTERLAYERS

Technique for measuring magnetic tape interlayer adhesion
NPO-10011 B67-10417 03

INTERMEDIATE FREQUENCY AMPLIFIERS

Automatic gain control circuit handles wide input range
MSC-166 B66-10089 01

INTERMETALLICS

Brazing process provides high-strength bond

ION EMISSION

New apparatus increases ion beam power density
LEWIS-73 B63-10440 01

Suppressor plate eliminates undesired arcing during electron beam welding
M-FS-1126 B66-10357 05

Detecting hydrogen-containing contaminants on metal surfaces
M-FS-20456 B69-10192 03

ION ENGINES

New apparatus increases ion beam power density
LEWIS-73 B63-10440 01

Apparatus measures very small thrusts
WOO-048 B64-10284 05

Wire winding increases lifetime of oxide coated cathodes
LEWIS-154 B65-10032 03

Wire bundle formed into grids with minute interstices
WOO-089 B65-10372 03

Study made of destructive sectioning of complex structures for examination
LEWIS-341 B66-10676 05

High power dc/dc and dc/ac electrical power conversion techniques developed
M-FS-13227 B67-10390 01

Reducing bubbles in glass coatings improves electrical breakdown strength
LEWIS-10278 B68-10214 03

Glass coated single grid for charged particle acceleration
LEWIS-10106 B68-10215 03

Full wave dc-to-dc converter using energy storage transformers
LEWIS-10375 B69-10140 01

Precise gimbaling mechanism
NPO-11057 B69-10270 01

ION EXCHANGE MEMBRANE ELECTROLYTES

Improved inorganic ion exchange membranes
LEWIS-10737 B69-10451 03

ION EXCHANGE RESINS

Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
ARG-10065 B68-10425 03

ION EXCHANGING

Ion exchange determines iodine-131 concentration in aqueous samples
ARG-208 B67-10129 04

Improved fuel-cell-type hydrogen sensor
M-FS-14656 B68-10263 01

Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
ARG-10065 B68-10425 03

Separation of the rare earths by anion-exchange in the presence of lactic acid
ARG-10436 B69-10377 03

Novel multipurpose timer for laboratories
ARG-10147 B69-10410 01

ION EXTRACTION

Ion-retarding lens improves the abundance sensitivity of tandem mass spectrometers
ARG-10365 B69-10166 02

Separation of traces of metal ions from sodium matrices
ARG-10341 B69-10168 03

ION IRRADIATION

Complex surfaces plated by thin-film deposition in one operation
LEWIS-292 B67-10006 05

Hydrogen peroxide etching proves useful for germanium
ARG-10170 B68-10454 03

ION MICROSCOPES

High-temperature thermionic emission microscope
NPO-10584 B68-10516 01

ION PUMPS

Ion pump provides increased vacuum pumping speed
NEO-13 B65-10239 02

Method for X-ray study under extreme temperature and pressure conditions
MSC-11232 B67-10474 02

ION SCATTERING

Electrochemical study of aluminum corrosion in boiling high purity water
ARG-10306 B69-10033 03

ION SOURCES

New apparatus increases ion beam power density
LEWIS-73 B63-10440 01

Magnetically coupled emission regulator
GSFC-10056 B69-10213 01

Miniaturized high-resolution mass/charge spectrograph /design study/
MSC-13279 B69-10554 02

IONIC MOBILITY

Ionene membrane battery separator
NPO-11091 B69-10501 03

IONIC REACTIONS

Improved fuel-cell-type hydrogen sensor
M-FS-14656 B68-10263 01

IONIZATION

Rapid helium-air analyzer can measure other binary gas mixtures
LANGLEY-16 B63-10557 03

Magnetic field controls carbon arc tail flame
MSC-139 B65-10108 01

Radon gas, useful for medical purposes, safely fixed in quartz
ARG-2 B66-10468 04

Complex surfaces plated by thin-film deposition in one operation
LEWIS-292 B67-10006 05

Primary cell uses neither liquid nor fused electrolytes
NPO-10001 B67-10275 01

Self-discharge in bimetallic cells

IONIZATION CHAMBERS

SUBJECT INDEX

IRREGULARITIES

IRON

- Modified filter prevents conduction of microwave signals along high-voltage power supply leads
JPL-63 B63-10091 01
- Fine-mesh screen made by simplified method
WOO-104 B64-10282 03
- Submicron metal powders produced by ball milling with grinding aids
LEWIS-188 B66-10221 03
- Hollow spherical rotors fabricated by electroplating
JPL-SC-117 B66-10366 05
- A continuously operating source of vacuum ultraviolet below 500 angstrom
GSFC-545 B66-10576 01
- Zirconium alloys with small amounts of iron and copper or nickel show improved corrosion resistance in superheated steam
ARG-226 B67-10050 03
- RF inductor has high Q, is stable at higher temperatures
JPL-1019 B67-10106 01
- Iron serves as diffusion barrier in thermally regenerative galvanic cell
ARG-29 B67-10189 03
- Simplified technique demonstrates magnetic domain switching
M-FS-13153 B67-10342 02
- Eddy current probe measures size of cracks in nonmetallic materials
M-FS-14059 B67-10645 03
- High-emittance coatings on metal substrates
LEWIS-10325 B68-10381 03
- Improved ferrous shielding for flat cables
M-FS-14524 B69-10401 01
- Electron interaction in matter
M-FS-14886 B69-10674 02

IRON ALLOYS

- Improved variable-reluctance transducer measures transient pressures
LANGLEY-10 B63-10321 01
- Gage of 6.5 per cent Si-Fe sheet is chemically reduced
MSC-537 B66-10454 03
- Process yield Co-Fe alloys with superior high temperature magnetic properties
LEWIS-333 B66-10535 03
- Study reveals effect of aluminum on saturation moment of Fe-Ni alloys
ARG-90259 B68-10172 03
- Inspection criteria ensure quality control of parallel gap soldering
M-FS-14530 B68-10257 05
- Handbook for design of containers of fluids and gases for spacecraft
M-FS-20502 B69-10279 05

IRON CHLORIDES

- Crack detection method is safe in presence of liquid oxygen
M-FS-236 B65-10107 03
- Imprinting of confining sites for cell cultures on thermoplastic substrates
LANGLEY-10495 B69-10236 04

IRON COMPOUNDS

- New class of compounds have very low vapor pressures
ARG-115 B67-10184 03

- Ceric and ferrous dosimeters show precision for 50-5000 rad range
ARG-10173 B68-10426 02

IRON CYANIDES

- Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel
NUC-10047 B67-10194 03

IRON OXIDES

- Cryogenic filter method produces super-pure helium and helium isotopes
JPL-374 B63-10235 03
- Magnetic fluid readily controlled in zero gravity environment
LEWIS-126 B65-10335 03
- The thermodynamic properties of the wustite phase are studied
ARG-10200 B68-10408 03
- Ambient temperature catalyst for hydrogen ignition
LEWIS-10551 B68-10520 03

IRON 57

- Vibration analysis utilizing Mossbauer effect
M-FS-11974 B67-10339 01

IRRADIATION

- Irradiated gases transferred without contamination or dilution
LEWIS-278 B67-10044 03
- Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel
NUC-10047 B67-10194 03
- Simplified method measures changes in tensile yield strength using least number of specimens
NUC-10075 B67-10266 03
- Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures
NUC-10521 B67-10617 02
- High-voltage pulse generator developed for wide-gap spark chambers
ARG-10136 B68-10283 01
- Detection sensitivities in 3-8 MeV neutron activation
ARG-10210 B68-10298 02
- Consolidation and fabrication techniques for vanadium-20 w/o titanium /TV-20/
ARG-10148 B68-10368 03
- Shortened processing time technique for color industrial radiography
ARG-10235 B69-10001 02
- A prototype high power portable lamp
M-FS-20229 B69-10189 02
- Tungsten thermal neutron dosimeter
LEWIS-10880 B69-10249 02
- Heparin insolubilized with crosslinking agent
NPO-10834 B69-10299 03

IRREGULARITIES

- Swiveling lathe jaw concept for holding irregular pieces
M-FS-783 B66-10321 05
- Special mandrel permits uniform welding of out-of-round tubing
M-FS-706 B66-10323 05
- Special purpose reflectometer uses modified ulbricht sphere

ISENTROPIC PROCESSES

SUBJECT INDEX

MSC-1135 B67-10109 02

ISENTROPIC PROCESSES

Computer program for high pressure real gas effects
LEWIS-10820 B69-10222 06

High pressure real gas effects for helium and nitrogen
LEWIS-10819 B69-10669 06

Natural gas flow through critical nozzles
LEWIS-11031 B69-10712 02

ISOCYANATES

Storage-stable foamable polyurethane is activated by heat
LANGLEY-187 B66-10111 03

Process produces chlorinated aromatic isocyanate in high yield
M-FS-1658 B66-10646 03

Improved primer for bonding polyurethane adhesives to metals
M-FS-90591 B69-10540 03

ISOLATION

High-pass RF coaxial filter rejects dc and low frequency signals
GSFC-73 B64-10173 01

Field-effect transistor replaces bulky transformer in analog-gate circuit
GSFC-351 B65-10284 01

Transmission system isolates pressure transducer from severe environment
WOO-239 B66-10064 01

Mechanism isolates load weighing cell during lifting of load
MSC-297 B66-10071 05

Study of fast response thermocouple measurement of temperatures in cryogenic gases
M-FS-1659 B66-10661 01

Amplifier provides dual outputs from a single source with complete isolation
NUC-10056 B67-10221 01

Remotely operated high pressure valve protects test personnel
MSC-11010 B67-10291 05

Method of improving contact bonds in silicon integrated circuits
M-FS-1753 B67-10335 01

Pocket-size manual tape reader device aids computer tape checking
KSC-10058 B67-10361 01

Multiple meter monitoring circuits served by single alarm
MSC-10984 B67-10369 01

Conceptual nonorthogonal gyro configuration for guidance and navigation
MSC-11363 B67-10433 01

Biological isolation garment
MSC-12206 B68-10500 04

Isolated, multiple-output voltage dc-to-dc converter
M-FS-14976 B69-10014 01

Conceptual techniques for reducing parasitic current gain of lateral pnp transistors
MSC-13199 B69-10244 01

Self-shielding printed circuit boards for high frequency amplifiers and transmitters
HQ-10433 B69-10314 01

Modification to improve self-isolating transistor arrays
M-FS-20499 B69-10678 01

ISOLATORS

Electropneumatic rheostat regulates high current
ARC-44 B65-10299 01

Accumulator isolator prevents malfunctioning of faulty hydraulic system
M-FS-1415 B67-10528 05

Analog buffer isolates high impedance source from low impedance load
M-FS-13481 B67-10544 01

Solid state single-ended switching dc-to-dc converter
M-FS-13598 B67-10558 01

Improved traveling wave maser amplifier
NPO-10548 B68-10244 01

ISOPROPYL ALCOHOL

Thin transparent films formed from powdered glass
GSFC-352 B65-10217 03

ISOSTATIC PRESSURE

Isostatic compression process converts polyaromatics into structural material
JPL-892 B67-10168 03

Porous mandrels provide uniform deformation in hydrostatic powder metallurgy
M-FS-1972 B67-10209 03

ISOTHERMAL FLOW

Study of thermal effects on nickel-cadmium batteries
GSFC-10003 B67-10614 01

Improved calorimeter provides accurate thermal measurements of space batteries
GSFC-10003A B67-10615 01

ISOTHERMAL PROCESSES

Superconductivity in zirconium-rhodium alloys
ARG-10223 B69-10010 03

Prediction of thermal radiation from a rocket's exhaust plume
M-FS-20414 B69-10371 02

ISOTHERMS

Computer program calculates steady-state temperature distribution within plane or axisymmetric solids
NUC-10049 B67-10224 06

Real fluid properties of normal and parahydrogen
LEWIS-10458 B68-10361 06

Isothermal drop calorimeter provides measurements for alpha active, pyrophoric materials
ARG-10186 B69-10002 02

ISOTOPES

Calculation of resonance neutron absorption in two-region problems /the GAROL code/
NUC-10045 B67-10223 06

Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes
NUC-10143 B67-10665 06

Portable, high intensity isotopic neutron source provides increased experimental accuracy
ARG-90250 B68-10243 02

Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide

LEAD COMPOUNDS

SUBJECT INDEX

LEAD COMPOUNDS

Lead oxide ceramic makes excellent
high-temperature lubricant
LEWIS-144 B64-10116 03

Analyses of silicon dioxide, magnesium
oxide, lead fluoride, bismuth as low-pass
velocity filters for neutrons
ARG-10220 B69-10211 02

Segmented SiGe-PbTe couples
GSFC-10746 B69-10233 01

Quality-weld parameters for microwelding
techniques and equipment
M-FS-20484 B69-10303 05

LEAD ISOTOPES

Direct determination of lead-210 by
liquid-scintillation counting
ARG-10462 B69-10611 03

LEAD SULFIDES

Advances in aluminum anodizing
M-FS-14600 B69-10144 05

LEAD TELLURIDES

Thermoelectric elements diffusion-bonded to
tungsten electrodes
GSFC-346 B65-10309 01

LEAD TITANATES

Phonocardiograph microphone is rugged and
moistureproof
MSC-212 B66-10314 04

Ultrasonic wrench produces leaktight
connections
M-FS-12561 B67-10353 05

LEAKAGE

Vented piston seal prevents fluid leakage
between two chambers
JPL-179 B63-10141 05

Device transmits rotary motion through
hermetically sealed wall
JPL-303 B63-10198 05

Self sealing disconnect for tubing forms metal
seal after breakaway
JPL-354 B63-10226 05

Fluid-pressure meter can be calibrated without
removal from flow line
M-FS-98 B63-10502 05

Sensitive low-pressure relief valve has
positive seating against leakage
WOO-041 B64-10278 05

Valve designed with elastic seat
JPL-442 B65-10040 05

Fuel cell serves as oxygen level detector
JPL-SC-072 B65-10066 01

Low-cost seal compensates for surface
irregularities
NU-0016 B65-10160 05

Superconductor magnets used for stagger-tuning
traveling-wave maser
GSFC-292 B65-10165 01

Diaphragm eliminates leakage in cryogenic
fluid duct coupling
WOO-142 B65-10227 05

Weld leaks rapidly and safely detected
M-FS-362 B65-10265 01

Composite seal reduces alkaline battery
leakage
GSFC-337 B65-10271 01

O-ring tube fittings form leakproof seal in
hydraulic systems
M-FS-481 B66-10020 05

Resilient clamp holds fuel cell stack through
resilient clamp holds fuel cell stack through
thermal cycle
MSC-313 B66-10035 05

Control system maintains selected liquid level
M-FS-470 B66-10039 01

High-pressure, low temperature electrical
connector makes no-leak seal
MSC-276 B66-10079 02

Capacitive system detects and locates fluid
leaks
M-FS-478 B66-10099 01

Dispenser leak-tests and sterilizes rubber
gloves
MSC-285 B66-10166 03

Wide-range instrument monitors flow rates
of chemically active fluids
MSC-186 B66-10205 01

Special tool seals conductors with combination
of plastic sleeves
M-FS-579 B66-10209 05

Soft-seal valve holds hazardous fluids
safely
LEWIS-275 B66-10216 05

Expandable rubber plug seals openings for
pressure testing
NU-0048 B66-10229 05

Brazing process using Al-Si filler alloy
reliably bonds aluminum parts
MSC-448 B66-10241 05

Pressure-welded flange assembly provides
leaktight seal at reduced bolt loads
M-FS-640 B66-10247 05

Flow ring valve is simple, quick-acting
M-FS-752 B66-10255 05

Vacuum test fixture improves leakage rate
measurements
MSC-271 B66-10286 01

Flexible fastener effects airtight material
closure
JPL-684 B66-10304 05

Union would facilitate joining of tubing,
minimize braze contamination
MSC-777 B66-10311 05

Valve seat pores sealed with thermosetting
monomer
M-FS-900 B66-10322 03

Sniffer used as portable hydrogen leak
detector
M-FS-846 B66-10356 01

Diaphragm valve for corrosive and high
temperature fluid flow control has unique
features
LEWIS-304 B66-10365 05

Minimum permissible leakage resistance
established for instrumentation systems
M-FS-848 B66-10397 01

Leak locator for vacuum jacketed pipelines
eliminates need for removal of outer jacket
M-FS-888 B66-10412 01

Electroplating eliminates gas leakage in
brazed areas
M-FS-923 B66-10415 05

Large diameter metal ring seal prevents gas
leakage at 5000 psi
M-FS-1064 B66-10422 05

Gas leak detector is simple and

LEUCINE

Effect of preparation procedures on
intensity of radioautographic labeling is
studied
ARG-10032 B67-10500 04

LEVEL (HORIZONTAL)

Instrument quickly transposes ground reference
target to eye level
MSC-275 B66-10061 05

Alignment tool facilitates pin placement on
irregular horizontal surfaces
LANGLEY-219 B66-10410 05

LEVEL (QUANTITY)

Level of super-cold liquids automatically
maintained by levelometer
JPL-397 B63-10250 01

Low-cost voltage-level detector
LEWIS-10885 B69-10217 01

LEVELING

Sensitive level sensor made with spirit
level, gives electrical output
LANGLEY-49 B65-10067 01

Rotary valve controls multiple hydraulic
leveling cylinders
M-FS-361 B66-10402 05

Heavy duty precision leveling jacks expedite
setup time on horizontal boring mill
M-FS-1084 B66-10411 05

Steel test panel helps control additives in
pyrophosphate copper plating
LEWIS-10101 B67-10358 05

Automatic Gaussian random-noise limiter
NPO-10169 B69-10349 01

Automatic leveling and equalizing hoist
device
M-FS-16549 B69-10514 05

LEVERS

Solenoid permits remote control of stop watch
and assures restarting
FRC-17 B63-10024 01

Fatigue tester achieves true axial motion
through flex plates and bars
NU-0021 B66-10164 01

Tool facilitates installation of Marmon
clamps
M-FS-2039 B67-10105 05

Single-source mechanical loading system
produces biaxial stresses in cylinders
M-FS-12530 B67-10380 05

Technique for measuring magnetic tape
interlayer adhesion
NPO-10011 B67-10417 03

Battery case shear
GSFC-10783 B69-10127 05

Detachable caster adapter
MSC-91215 B69-10164 05

LEVITATION

Levitation-melting technique for metals
and alloys
ARG-10240 B69-10006 03

LEWIS BASE

Electrolytic separation of crystals of
transition-metal oxides
ARG-10506 B69-10642 03

LIBRARIES

JPKNIC - General key word in context and
subject index report generator
NPO-10589 B68-10208 06

LIE GROUPS

Solution of differential equations by
application of transformation groups
M-FS-14802 B68-10276 02

LIFE (DURABILITY)

New cobalt alloys have high-temperature
strength and long life in vacuum
environments
LEWIS-47 B63-10351 03

Improved fluid control valve extends diaphragm
life
JPL-345 B65-10147 05

Graphite element serves as radiant heat source
M-FS-105 B65-10218 01

Improved electrode paste provides reliable
measurement of galvanic skin response
MSC-146 B66-10049 04

New energy storage concept uses tapes
LEWIS-239 B66-10098 02

Plasma jet electrode has longer operating
life
NU-0098 B67-10024 02

Honeycomb seal backing ring increases
turbopump disk life
M-FS-13303 B67-10607 05

Predicting fatigue life of metal bellows
M-FS-14096 B68-10026 05

Study of fluoride corrosion of nickel alloys
ARG-10224 B65-10048 03

High-energy, high-power, long-life battery
LEWIS-10724 B69-10131 01

Design and sparing techniques to meet
specified performance life
HQ-10200 B69-10528 02

Monte Carlo simulation by computer for
life-cycle costing
M-FS-14754 B69-10590 05

LIFE DETECTORS

Life detection
NPO-10510 B69-10475 04

Quantitative determination of flavin nucleotide
using the bacterial bioluminescent reaction
GSFC-10565 B69-10715 04

LIFE RAFTS

New inflatable liferaft is nontippable
MSC-4A B64-10001 05

Storage-stable foamable polyurethane is
activated by heat
LANGLEY-187 B66-10111 03

LIFE SPAN

Investigation of temperature dependence of
development and aging
ARG-10145 B69-10022 04

LIFE SUPPORT SYSTEMS

One-piece transparent shell improves design of
helmet assembly
MSC-187 B66-10390 05

Computer program analyzes generalized
environmental control and life support
systems
MSC-1157 B67-10415 06

Concept to comfort-condition subjects
wearing restrictive clothing
MSC-10964 B68-10178 02

Electrolytic silver ion cell sterilizes
water supply
MSC-11827 B68-10555 01

SUBJECT INDEX

Miniature oxygen resuscitator KSC-10398	B69-10319	04	and velocity in fluid stream M-FS-1536	B66-10668	01
Rate of heat extraction controller for environmental control HQ-10318	B69-10516	01	Laser Doppler flowmeter measures gas velocity M-FS-1747	B66-10693	02
LIFT DEVICES			Design concept for improved photo-scan tube JPL-818	B67-10157	01
Buckle joins web straps quickly, adjusts easily LANGLEY-21	B64-10119	05	Simplified technique demonstrates magnetic domain switching M-FS-13153	B67-10342	02
Mechanism isolates load weighing cell during lifting of load MSC-297	B66-10071	05	Aerial-image enables diagrams and animation to be inserted in motion pictures ARG-165	B67-10398	02
Simulator effects partial gravity conditions MSC-152	B66-10339	05	Optical integrating sphere operates at visible and infrared wavelengths M-FS-14248	B68-10126	02
Self-actuating grapple automatically engages and releases loads from overhead cranes ARG-81	B66-10522	05	Improved gas ring laser MSC-11584	B68-10304	02
Hoist is automatically stopped at low deceleration rate M-FS-1639	B66-10545	05	System converts optical phase changes to RF phase changes M-FS-20091	B68-10430	01
Conceptual dead weight device to provide pressure calibration M-FS-14672	B68-10264	01	Occulting-filter method for obtaining flashing-light visibility data MSC-13097	B69-10107	02
Fifth-wheel fork truck adapter M-FS-14460	B69-10021	05	Method for copper staining of germanium crystals ARG-10403	B69-10257	03
Detachable caster adapter MSC-91215	B69-10164	05	Concept for improved vacuum pressure measuring device M-FS-20172	B69-10421	02
Automatic leveling and equalizing hoist device M-FS-16549	B69-10514	05	LIGHT AMPLIFIERS		
LIFTS			Synthesis of electro-optic modulators for amplitude modulation of light M-FS-14268	B68-10275	02
Hydrostatic force used to handle outsized, heavy objects HQ-90	B67-10167	05	LIGHT BEAMS		
Square tubing reduces cost of telescoping bridge crane hoist ARG-13	B67-10293	05	Servo system facilitates photoelastic strain measurements on resins JPL-504	B64-10280	01
LIGANDS			System measures angular displacement without contact LANGLEY-46	B65-10073	01
Aggregation of metallochlorophylls - Examination by spectroscopy ARG-10273	B69-10163	04	Light-sensitive potentiometer measures product of two variables GSFC-240	B65-10076	01
LIGHT (VISIBLE RADIATION)			Photoelectric system continuously monitors liquid level M-FS-417	B65-10382	01
Instrument accurately measures extremely low air densities M-FS-193	B65-10221	01	Device to color modulate a stationary light beam gives high intensity HQ-44	B66-10476	01
Unique construction makes interferometer insensitive to mechanical stresses JPL-725	B65-10295	02	High-speed camera synchronization M-FS-18062	B68-10282	02
Inexpensive infrared source improvised from flashlight M-FS-494	B66-10096	02	Modified sine bar device measures small angles with high accuracy GSFC-438	B68-10322	02
Plastic scintillator converts standard photomultiplier to ultraviolet range ERC-9	B66-10108	02	Improvement in recording and reading holograms ERC-10151	B68-10347	02
Optical device enables small detector to see large field of view WOO-253	B66-10263	02	Ring laser angle encoder MSC-13099	B69-10115	01
Sensors measure surface ablation rate of reentry vehicle heat shield LANGLEY-287	B66-10592	01	Laser interferometer micrometer system M-FS-14747	B69-10633	02
Optical automatic gain channel M-FS-1550	B66-10596	02	Fine-line sensitivity for holographic interferograms HQ-10348	B69-10663	02
Exposure Value /EV/ system expanded to include filter factors and transmittance LANGLEY-190	B66-10602	02	Optical frequency waveguide and ion		
Photographic method measures particle size

SUBJECT INDEX

LOADS (FORCES)

LITHIUM HYDRIDES

Iron serves as diffusion barrier in thermally regenerative galvanic cell
ARG-29 B67-10189 03

Vanadium diaphragm electrode serves as hydrogen diffuser in lithium hydride cell
ARG-10048 B67-10499 01

LITHIUM SULFATES

Trace levels of metallic corrosion in water determined by emission spectrography
MSC-1193 B66-10701 03

LOAD DISTRIBUTION (FORCES)

Equations provide tubular information on effects of uniform and variable loads on thin, flat, circular plates
ARG-151 B66-10601 05

Spherical pipe joint delivers loads equally to mating flange
M-PS-807 B66-10665 05

Elimination of rocket engine asymmetric loads during tests at sea level
M-PS-1730 B66-10674 05

Development of helical seal for high temperature /2000 degrees F/ application
M-PS-13304 B67-10655 05

Shock-absorbing caster wheel is simple and compact
SAN-10019 B68-10266 05

Modified Multhopp lifting surface loading program
LANGLEY-10375 B68-10452 06

Mechanical properties of a lap joint under uniform clamping pressure
M-PS-14538 B69-10141 05

Automatic leveling and equalizing hoist device
M-PS-16549 B69-10514 05

LOAD TESTING MACHINES

Apparatus permits flexure testing of specimens at cryogenic temperatures
M-PS-257 B65-10129 02

Friction loading device enables accurate testing of brittle materials
NU-0051 B66-10345 05

Device measures reaction engine thrust vector deviations
JPL-SC-163 B66-10642 05

Web belt load measuring instrument has excellent stability
MSC-921 B67-10242 01

LOAD TESTS

Apparatus permits flexure testing of specimens at cryogenic temperatures
M-PS-257 B65-10129 02

Tensile-strength apparatus applies high strain-rate loading with minimum shock
JPL-28 B66-10063 05

Analysis of stability-critical orthotropic cylinders subjected to axial compression
M-PS-12869 B67-10375 03

Study made of procedures for externally loading and corrosion testing stress corrosion specimens
M-PS-12064 B67-10451 03

Buckling strength of filament-wound cylinders under axial compression is investigated
HQ-10032 B67-10659 03

Shock and vibration response of multistage

structure
M-PS-14972 B68-10353 05

Calibrated water tank facilitates proof-loading of cranes and derricks
M-PS-15059 B69-10109 05

Optimum structural design based on reliability and proof-load testing
NPO-11228 B69-10723 31

LOADING

PTC thermistor protects multiloaded power supplies
GSFC-236 B64-10281 01

Experiments with ceramic coatings
M-PS-18150 B68-10355 03

LOADING OPERATIONS

Rapid billet loader aids extrusion of refractory metals
LEWIS-50 B63-10354 05

Self-balancing beam permits safe, easy load handling under overhang
M-PS-84 B63-10571 05

Speed-sensing device aids crane operators
WS-4 B64-10006 05

Compressed gas system operates semitrailer brakes during winching operation
JPL-0036 B64-10306 05

Universal transloader moves delicate equipment without stress
MSC-654 B66-10384 05

Self-actuating grapple automatically engages and releases loads from overhead cranes
ARG-81 B66-10522 05

Carriage system remotely moves drawer over extended distance
NU-0092 B66-10711 05

Hydrostatic force used to handle outsized, heavy objects
HQ-90 B67-10167 05

LOADING RATE

Shock absorber operates over wide range
MSC-168 B65-10241 05

Cut-through tester accurately measures insulation failure rates
M-PS-12506 B67-10354 03

Single-source mechanical loading system produces biaxial stresses in cylinders
M-PS-12530 B67-10380 05

LOADS (FORCES)

Elastic orifice automatically regulates gas bearings
JPL-135 B63-10123 05

Self-balancing beam permits safe, easy load handling under overhang
M-PS-84 B63-10571 05

Circuit controls transients in SCR inverters
GSFC-120 B63-10600 01

Buckle joins web straps quickly, adjusts easily
LANGLEY-21 B64-10119 05

Ring counter may be advanced or retarded by command signal
GSFC-101 B64-10144 01

Threading hook facilitates safe recovery of heavy loads
MSC-46 B64-10185 05

Shock absorber protects motive components

LOCKING

LOW PASS FILTERS

SUBJECT INDEX

LOW PASS FILTERS

Unmanned seismometer levels self, corrects drift errors
GSFC-100 B63-10551 01

Computer determines high-frequency phase stability
GSFC-113 B63-10555 01

Voltage variable oscillator has high phase stability
LANGLEY-123 B65-10204 01

Hybrid computer technique yields random signal probability distributions
ARC-34 B65-10208 01

PCM magnetic tape system efficiently records and reproduces data
GSFC-375 B65-10311 01

Noncontacting vibration transducer has constant sensitivity
LANGLEY-99 B65-10392 01

Compact microwave mixer has high conversion efficiency
GSFC-197 B66-10625 01

Polarimeter provides transient response in nanosecond range
JPL-890 B67-10021 02

Circuit multiplies pulse width modulation, exhibits linear transfer function
HQ-56 B67-10055 01

TV synchronization system features stability and noise immunity
JPL-915 B67-10118 01

Stable ac phase and amplitude comparator
M-FS-13086 B67-10459 01

Light-controlled resistors provide quadrature signal rejection for high-gain servo systems
WSO-340 B67-10552 01

Design of dissipative linear phase filters
M-FS-14698 B68-10572 01

Analyses of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass velocity filters for neutrons
ARG-10220 B69-10211 02

A method for reducing sampling jitter in digital control systems
NPO-11088 B69-10338 01

Phase-locked-loop phase modulator with high modulation index, low distortion
MSC-12247 B69-10487 01

Data processing method for a weak, moving telemetry signal
NPO-11003 B69-10639 01

LOW PRESSURE

Cryogenic filter method produces super-pure helium and helium isotopes
JPL-374 B63-10235 03

Sensitive low-pressure relief valve has positive seating against leakage
WOO-041 B64-10278 05

Transducer measures force in vacuum environment
LEWIS-218 B66-10161 01

Magnetic latches provide positive overpressure control
NU-0057 B66-10279 05

Low rate flow switch can be used for gas or liquid
JPL-867 B66-10696 01

Cryogenic seal remains leaktight during thermal displacement
ARG-96 B67-10134 02

Aspirator increases relief valve poppet stroke
HQ-77 B67-10154 05

New class of compounds have very low vapor pressures
ARG-115 B67-10184 03

Automated tester permits precise calibration of pressure transducers from 0 to 1050 psi
NUC-10067 B67-10263 01

Experiments to investigate particulate materials in reduced gravity fields
M-FS-13308 B67-10394 02

Absolute low-pressure calibration system
M-FS-13085 B68-10160 02

Performance of low-pressure thermionic converters is evaluated
ARG-10276 B69-10090 01

Concept for improved vacuum pressure measuring device
M-FS-20172 B69-10421 02

Measurement of gas flow at extremely low pressures
MSC-13261 B69-10522 03

Fluid sample collection and storage device
MSC-10962 B69-10816 05

LOW RESISTANCE

Thin film process forms effective electrical contacts on semiconductor crystals
M-FS-2343 B67-10142 01

LOW SPEED

Dry film lubricant is effective at extreme loads
M-FS-628 B66-10256 03

LOW TEMPERATURE

High-pressure, low temperature electrical connector makes no-leak seal
MSC-276 B66-10079 02

Cryostat modified to aid rotating beam fatigue test
M-FS-435 B66-10083 03

Storage-stable foamable polyurethane is activated by heat
LANGLEY-187 B66-10111 03

Compound improves thermal interface between thermocouple and sensed surface

MAGNETIC MEASUREMENT

SUBJECT INDEX

MAGNETIC MEASUREMENT

Thermal motor positions magnetometer sensors
ARC-51 B66-10078 05

Calibration of a resistance thermometer
down to 0.04 degrees K
ARG-10318 B69-10149 01

MAGNETIC MOMENTS

Magnetometer measures orthogonal components
of magnetic fields
GSFC-395 B65-10315 01

Neutron diffractometer allows both magnetic
and crystallographic analyses
ARG-191 B67-10131 02

MAGNETIC PERMEABILITY

Noncontacting transducer measures shaft torque
M-FS-474 B66-10048 01

Rod and dish cathode improves penning-type
vacuum gage
GSFC-447 B66-10082 01

Electron beam welding of copper-Monel
facilitated by circular magnetic shields
M-FS-569 B66-10215 05

Process yield Co-Fe alloys with superior
high temperature magnetic properties
LEWIS-333 B66-10535 03

Solenoid valve design has one moving part
NPO-10039 B67-10219 05

MAGNETIC PROPERTIES

Rotor position sensor switches currents in
brushless dc motors
GSFC-315 B65-10151 01

Hollow spherical rotors fabricated by
electroplating
JPL-SC-117 B66-10366 05

Thin-film ferrites vapor deposited by one-step
process in vacuum
MSC-259 B66-10398 03

Process yield Co-Fe alloys with superior
high temperature magnetic properties
LEWIS-333 B66-10535 03

Miniaturization of magnetic logic circuitry
LANGLEY-10037 B69-10148 06

MAGNETIC PUMPING

Rotating magnetic poles used to pump mercury
LEWIS-276 B66-10434 05

MAGNETIC RECORDING

Circuit converts AM signals to FM for
magnetic recording
GSFC-227 B65-10001 01

Hybrid computer technique yields random
signal probability distributions
ARC-34 B65-10208 01

PCM magnetic tape system efficiently records
and reproduces data
GSFC-375 B65-10311 01

An improved magnetic tape recorder
GSFC-08259 B67-10646 01

Damages in rolling element bearings may be
detected early
HQ-10031 B67-10658 01

Scan rate converter for tape recording and
playback of TV pictures
NPO-10166 B67-10676 01

Harmonic distortion analyzer speeds setup of
magnetic tape recorders
GSFC-10198 B68-10254 01

Method of reducing time base error in

digital magnetic recorders
GSFC-10108 B68-10317 01

MAGNETIC RESONANCE

Magnetometer measures orthogonal components
of magnetic fields
GSFC-395 B65-10315 01

Coordination chemistry in fused-salt
solutions
ARG-10469 B69-10423 03

MAGNETIC SHIELDING

Electron beam welding of copper-Monel
facilitated by circular magnetic shields
M-FS-569 B66-10215 05

Improved ferrous shielding for flat cables
M-FS-14524 B69-10401 01

MAGNETIC SIGNALS

Magnetometer measures orthogonal components
of magnetic fields
GSFC-395 B65-10315 01

A theoretical study of radar backscatter
from distributed targets with emphasis on
polarization dependence
M-FS-13775 B69-10560 02

MAGNETIC STORAGE

Transfluxor circuit amplifies sensing current
for computer memories
JPL-406 B63-10255 01

Density trace made with computer printout
GSFC-322 B65-10200 01

Multipulse current source offers low power
losses and high reliability
LANGLEY-66 B67-10603 01

Optically exciting a magnetic memory - A
feasibility study
M-FS-14854 B69-10060 02

MAGNETIC TAPES

Small digital recording head has parallel bit
channels, minimizes cross talk
JPL-0029 B63-10284 01

Low-cost tape system measures velocity of
acceleration
GSFC-85 B63-10512 01

Compact cartridge drives coded tape at
constant readout speed
JPL-472 B64-10222 01

Security warning system monitors up to
fifteen remote areas simultaneously
KSC-66-39 B66-10548 01

Digital computer processing of X-ray photos
JPL-792 B67-10005 04

Data retrieval system provides unlimited
hardware design information
MSC-1144 B67-10170 01

Structural Analysis and Matrix
Interpretive System /SAHIS/
NPO-10130 B67-10171 01

Computer program samples digital data for
CRT display
MSC-999 B67-10249 01

Transient Analysis Generator /TAG/
simulates behavior of large class of
electrical networks
NPO-10031 B67-10319 06

Saturn S-2 Automatic Software System
/SASS/
M-FS-1741 B67-10405 06

Computer program generates averaged value
data tapes

MERCURY AMALGAMS

SUBJECT INDEX

Cut-through tester accurately measures insulation failure rates
M-FS-12506 B67-10354 03

Improved sample capsule for determination of oxygen in hemolyzed blood
MSC-11017 B67-10408 04

Low energy ohmmeter can be used to test sensitive circuits, other meters
SAN-10013 B68-10269 01

Random access-random release relay switching matrix
M-FS-12590 B68-10301 01

Liquid-metal heat transfer in a cocurrent-flow, double-pipe heat exchanger is investigated
ARG-10261 B69-10091 02

Liquid gallium rotary electric contract
LEWIS-10828 B69-10138 03

A laboratory method for precisely determining the micro-volume-magnitudes of liquid efflux
ARC-10052 B69-10295 05

Measurement of gas flow at extremely low pressures
MSC-13261 B69-10522 03

Control for maintaining constant level of a cryogenic liquid
NPO-11177 B69-10573 05

Pocket-sized tone-modulated FM transmitter
NPO-11180 B69-10725 01

MERCURY AMALGAMS
Apparatus enables accurate determination of alkali oxides in alkali metals
LEWIS-256 B66-10296 03

MERCURY ARCS
Emission tester for high-power vacuum tubes
JPL-628 B64-10158 01

MERCURY COMPOUNDS
Multiple port pressure scanner valve features greater accuracy, quicker data
JPL-555 B64-10031 05

Development of low temperature battery
LEWIS-10326 B67-10546 01

MERCURY LAMPS
High-intensity flashing beacon powered by mercury cells
LANGLEY-80 B65-10361 01

MERCURY VAPOR
Igniting system for mercury lamps protects transistorized sustaining supply
JPL-421 B63-10262 01

MERIDIONAL FLOW
Computer program performs flow analysis through turbines
LEWIS-236 B66-10496 01

MESH
Fine-mesh screen made by simplified method
WOO-104 B64-10282 03

Combustion chamber struts can be effectively transpiration cooled
M-FS-1830 B66-10643 03

Mounting method improves electrical and vibrational characteristics of screen electrodes
M-FS-20169 B69-10097 01

Adding calcium improves lithium ferrite core
ERC-10036 B69-10686 06

MESOSPHERE
Rocket sonde measurements of ozone in the upper atmosphere
GSFC-10580 B69-10077 02

METABOLIC WASTES
Improved mouse cage provides versatility and ease in handling laboratory mice
MSC-12250 B69-10124 04

METABOLISM
Plant respirometer enables high resolution of oxygen consumption rates
HQ-47 B66-10406 04

Study made of relationship between growth and metabolism
ARG-10046 B67-10604 04

Study of behavior of sterols at interfaces
ARG-10085 B68-10281 03

Investigation of temperature dependence of development and aging
ARG-10145 B69-10022 04

Qualitative and quantitative analysis of mixtures of compounds containing both hydrogen and deuterium
ARG-10312 B69-10177 04

Life detection
NPO-10510 B69-10475 04

Quantitative determination of flavin nucleotide using the bacterial bioluminescent reaction
GSFC-10565 B69-10715 04

METAL BONDING
Electronic modules easily separated from heat sink
MSC-142 B65-10186 02

Refractory metals welded or brazed with tungsten inert gas equipment
LEWIS-219 B65-10319 05

Brazing method produces solid-solution bond between refractory metals
LEWIS-212 B65-10370 05

Assembly jig assures reliable solar cell modules
GSFC-455 B66-10040 05

Correlation established between heat transfer and ultrasonic transmission properties of copper braze bonds
ARG-247 B67-10037 02

Method of improving contact bonds in silicon integrated circuits
M-FS-1753 B67-10335 01

Integrated metal transistor leads
GSFC-90536 B68-10518 01

Study of high temperature bearing materials
LEWIS-10829 B69-10252 03

Explosive bonding of metal-matrix composites
M-FS-20657 B69-10804 05

METAL COATINGS
Nickel/tin coating protects threaded fasteners in corrosive environment
MSC-253 B65-10398 03

PTFE-aluminum films serve as neutral density filters
LANGLEY-189 B66-10017 02

Jig protects transistors from heat while tinning leads

MICROCRYSTALS

METHODOLOGY

Handbooks describe eddy current techniques used in nondestructive testing of metal parts and components
M-FS-13172 B67-10374 03

Tube welding and brazing
M-FS-20348 B69-10085 05

Conceptual techniques for reducing parasitic current gain of lateral pnp transistors
MSC-13199 B69-10244 01

METHYL ALCOHOLS

Corrosion of aluminum alloys by chlorinated hydrocarbon/methanol mixtures
MSC-11365 B67-10442 03

Viscosity and density of methanol/water mixtures at low temperatures
M-FS-14991 B68-10274 03

Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
ARG-10065 B68-10425 03

Coolants with selective optical filtering characteristics for ruby laser applications
M-FS-20188 B68-10508 02

Separation of the rare earths by anion-exchange in the presence of lactic acid
ARG-10436 B69-10377 03

METHYL COMPOUNDS

Stringent cleaning technique assures reliable epoxy bond
GSFC-161 B64-10142 03

Fabrication method produces high-grade alumina crucibles
M-FS-216 B65-10078 05

Flexible protective coatings made from silicon-nitrogen materials
M-FS-528 B66-10027 03

Sea dye marker provides visibility for 20 hours
MSC-714 B66-10313 03

High-energy, high-power, long-life battery
LEWIS-10724 B69-10131 01

Microdetermination of urea in urine using p-dimethylaminobenzaldehyde /PDAB/
NPO-10715 B69-10317 04

Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensers
MSC-15611 B69-10552 03

METHYLENE

Thermocouple-flexible cable connector insulator is highly reliable
NU-0082 B66-10709 01

Adhesives for laminating polyimide insulated flat conductor cable
M-FS-12066 B67-10429 03

MICA

Electro-optic modulator for infrared laser using gallium arsenide crystal
GSFC-10686 B68-10255 02

Device for diode tuning in a stripline varactor harmonic multiplier
M-FS-20153 B69-10013 01

MICARTA

Welding torch and wire feed manipulator
M-FS-13102 B67-10385 05

Standard surface grinder for precision machining of thin-wall tubing

ARG-10014 B67-10400 05

MICE

Improved mouse cage provides versatility and ease in handling laboratory mice
MSC-12250 B69-10124 04

MICHELSON INTERFEROMETERS

System enables more complete calibrations of dynamic-pressure transducers
M-FS-2063 B67-10099 01

System converts optical phase changes to RF phase changes
M-FS-20091 B68-10430 01

Fine-line sensitivity for holographic interferograms
HQ-10348 B69-10663 02

MICROANALYSIS

Corrosion of metal samples rapidly measured
NU-0041 B66-10140 03

Standards for electron probe microanalysis of silicates prepared by convenient method
GSFC-469 B66-10234 03

Apparatus enables automatic microanalysis of body fluids
JPL-962 B66-10515 04

Automated microsyringe is highly accurate and reliable
NPO-10142 B67-10203 01

Microprobe investigation of brittle segregates in aluminum MIG and TIG welds
M-FS-14720 B68-10334 03

Imaging slitless spectrometer for X-ray astronomy
M-FS-14309 B68-10546 02

Microdetermination of urea in urine using p-dimethylaminobenzaldehyde /PDAB/
NPO-10715 B69-10317 04

MICROBALANCES

Evaporant feed device facilitates flash vapor deposition process in vacuum
NPO-10232 B67-10320 03

MICROBIOLOGY

Tool samples subsurface soil free of surface contaminants
MSC-10988 B67-10473 05

Continuous microbial cultures maintained by electronically-controlled device
ARG-177 B67-10556 04

A microlagoon technique for the culture of mammalian cells
LANGLEY-10407 B68-10554 04

Imprinting of confining sites for cell cultures on thermoplastic substrates
LANGLEY-10495 B69-10236 04

Technique for highly efficient recovery of microbiological contaminants
MSC-13250 B69-10273 04

Sterilization training manual
M-FS-20437 B69-10277 04

Sampling and handling of desert soils
NPO-11171 B69-10304 04

Life detection
NPO-10510 B69-10475 04

Microbiological aspects of sterilization development laboratories
NPO-11197 B69-10593 04

MICROCRYSTALS

Laser action from a terbium beta-ketoenolate

MILLING MACHINES

MICROWAVE RESONANCE

Study of yttrium iron garnet rods reveals
new magnetostatic echo mode
ERC-37 B67-10153 01

Improved atomic resonance gas cell for use
in frequency standards
MSC-11666 B68-10230 01

MICROWAVE SWITCHING

Double-throw microwave device switches two
lines quickly
JPL-410 B63-10258 01

MICROWAVE TRANSMISSION

Traveling-wave tube circuit simplifies
microwave relay
GSFC-299 B65-10127 01

Composite filter steepens rejection slopes in
microwave application
GSFC-480 B66-10393 01

Feasibility study of wireless power
transmission systems
M-FS-14691 B68-10309 01

High-power microwave power divider concept
NPO-11031 B69-10290 01

MICROWAVES

Compact microwave mixer has high conversion
efficiency
GSFC-197 B66-10625 01

Dielectric prisms would improve performance
of quasi-optical microwave components
ERC-10011 B67-10416 01

Improved traveling wave maser amplifier
NPO-10548 B68-10244 01

Feasibility study of wireless power
transmission systems
M-FS-14691 B68-10309 01

Electrolytic separation of crystals of
transition-metal oxides
ARG-10506 B69-10642 03

A sterilizable high-impact antenna
NPO-10231 B69-10697 01

MIDCOURSE GUIDANCE

Midcourse maneuver operations program
NPO-10735 B69-10105 06

MIGRATION

Fiber length and orientation prevent migration
in fluid filters
M-FS-541 B66-10319 05

Substituting gold for silver improves
electrical connections
M-FS-2390 B67-10228 03

Experiments shed new light on
nickel-fluorine reactions
ARG-10008 B67-10397 03

Imprinting of confining sites for cell
cultures on thermoplastic substrates
LANGLEY-10495 B69-10236 04

MILITARY VEHICLES

Analysis of secondary cells with
lithium anodes and immobilized
fused-salt electrolytes
ARG-10452 B69-10613 01

MILK

Ion exchange determines iodine-131
concentration in aqueous samples
ARG-208 B67-10129 04

MILLIMETER WAVES

Microwave technique measures plasma
characteristics
LANGLEY-134 B65-10122 02

Ferroelectric bolometer measures RF absolute
power at submillimeter wavelengths
GSFC-422 B66-10051 01

Efficient millimeter wave 1140 GHz/ diode
for harmonic power generation
HQ-61 B67-10166 01

Mm-wave power meter mount
NPO-10348 B68-10152 01

Millimeter-wave atmospheric loss prediction
method
NPO-11054 B69-10584 01

MILLING

Heavy duty precision leveling jacks expedite
setup time on horizontal boring mill
M-FS-1084 B66-10411 05

MILLING (MACHINING)

Electroless nickel resist used in alkali
etching of aluminum
GSFC-284 B65-10162 03

Electron beam seals outer surfaces of porous
bodies
M-FS-562 B66-10033 03

Threaded pilot insures cutting tool
alignment
M-FS-527 B66-10074 05

Depth indicator and stop aid machining to
precise tolerances
M-FS-553 B66-10149 05

Electrical upsetting of metal sheet forms weld
edge
M-FS-720 B66-10248 05

Tool separates sleeve-type unions without heat
MSC-497 B66-10253 05

Process sequence produces strong,
lightweight reflectors of excellent quality
LEWIS-331 B67-10010 05

Continuous internal channels formed in
aluminum fusion welds
M-FS-2399 B67-10183 05

Acid spray technique mills aluminum alloy
materials without immersion
M-FS-12500 B67-10463 03

High temperature alloy
LEWIS-10377 B68-10253 03

Preparing rock powder specimens of
controlled size distribution
NPO-10007 B68-10297 05

Machining technique prevents undercutting
in tensile specimens
LANGLEY-10281 B68-10352 05

Vertical boring mill capacity is increased
M-FS-16196 B68-10530 05

MILLING MACHINES

Mill profiler machines soft materials
accurately
M-FS-692 B66-10254 05

Versatile machine mills, saws light materials
M-FS-827 B66-10364 05

Computer used to program numerically
controlled milling machine
M-FS-1608 B66-10541 01

Fast method for obtaining scale dimensions
on tape-controlled milling machine
MSC-11609 B68-10047 05

Thread cutting with 3-axis N/C milling
machine
LANGLEY-10017 B68-10055 06

MILLIVOLTMETERS

SUBJECT INDEX

MITOSIS

SUBJECT INDEX

MITOSIS

Study of radiation effects on mammalian cells
in vitro
ARG-10191 B68-10294 02

MIXING

Quick-hardening problems are eliminated with
spray gun modification which mixes resin and
accelerator liquids during application
LANGLEY-6A B63-10318 03

Plastic plus stainless-steel fibers make
resilient, impermeable material
WOO-246 B65-10374 03

Two-fluid, impinging-sheet injector
NPO-10547 B68-10338 05

An investigation of particle mixing in a
gas-fluidized bed
ARG-10182 B68-10407 05

Diffusion of trace gases for leak detection -
A study
M-FS-20254 B69-10067 03

Preparation of thorium magnesium-zinc
reduction
ARG-10245 B69-10079 03

Single-element coaxial injector for
rocket fuel
NPO-11095 B69-10547 05

MIXING CIRCUITS

Added diodes increase output of balanced
mixer circuit
GSFC-354 B65-10276 01

Single-sideband modulator accurately
reproduces phase information in 2-Mc signals
M-FS-664 B66-10437 01

Compact microwave mixer has high conversion
efficiency
GSFC-197 B66-10625 01

Electronic frequency discriminator
M-FS-2434 B67-10151 01

Voltage regulator/amplifier is self-regulated
MSC-1240 B67-10156 01

MNEMONICS

New computer system simplifies programming of
mathematical equations
M-FS-441 B66-10361 01

On-line computer system for use with low-
energy nuclear physics experiments is
reported
ARG-10257 B69-10094 01

MOBILITY

Special tool kit aids heavily garmented
workers
MSC-163 B66-10403 05

Integrated mobility measurement and notation
system
MSC-726 B67-10114 04

Improved head-controlled TV system produces
high-quality remote image
ARG-128 B67-10317 01

Movable RF probe eliminates need for
calibration in plasma accelerators
LEWIS-10127 B67-10362 01

Improved electromechanical master-slave
manipulator
ARG-10027 B68-10372 05

Detachable caster adapter
MSC-91215 B69-10164 05

MODAL RESPONSE

A modal combination computer program for

dynamic analysis of structures
NPO-10129 B67-10217 06

Computer program provides improved
longitudinal response analysis for
axisymmetric launch vehicles
LANGLEY-10093 B67-10531 06

Computer program determines vibration in
three-dimensional space of hydraulic lines
excited by forced displacements
M-FS-12226 B68-10159 06

Analysis of space vehicle structures using
the transfer-function concept
NPO-11162 B69-10337 06

MODE TRANSFORMERS

Improved gas ring laser
MSC-11584 B68-10304 02

MODELS

High purity electroforming yields superior
metal models
ARC-6 B63-10007 05

Pressure transducer 3/8-inch in size can be
faired into surface
WOO-065 B64-10021 05

System automatically provides dynamic
launch decision criteria
M-FS-13063 B67-10363 01

Probabilistic approach to long range
planning of manpower
MSC-11524 B67-10510 06

Development of lunar drill to take core
samples to 100-foot depths
M-FS-13015 B67-10529 05

Shell design computer program
LEWIS-10734 B69-10175 06

Technique for assessing potential fire
hazards
HQ-10279 B69-10287 03

Surface-renewal models for heat-transfer
between walls and fluidized beds
ARG-10372 B69-10772 02

MODERATORS

Neutron detector simultaneously measures
fluence and dose equivalent
ARG-10071 B67-10597 02

MODES

Quick-acting clutch disengages idle drive
motor
GSFC-143 B64-10028 05

Thermionic diode switching has high
temperature application
NPO-10404 B67-10672 01

Detection of molecular infrared spectra
HQ-10377 B69-10172 02

Identification and evaluation of linear
damping models in beam vibrations
ARG-10275 B69-10196 03

MODULATION

Nulling pyrometer uses Kerr cell shutter for
fast responses
NU-0010 B65-10050 01

Frequency offset in linear FM/CW transponder
eliminates clutter
M-FS-249 B65-10146 01

Instrument accurately measures extremely low
air densities
M-FS-193 B65-10221 01

An improved method for testing performance of
vidicons during vibration

JPL-SC-152	B66-10433	01	M-FS-280	B65-10098	05
Single-sideband modulator accurately reproduces phase information in 2-Mc signals			Computer program simplifies selection of structural steel columns		
M-FS-664	B66-10437	01	NU-0044	B66-10097	01
Device to color modulate a stationary light beam gives high intensity			Study made of mechanics of deformation and fracture of fibrous composites		
HQ-44	B66-10476	01	HQ-10035	B67-10660	03
Polarimeter provides transient response in nanosecond range			An ultrasonic method for studying elastic moduli as a function of temperature		
JPL-890	B67-10021	02	ARG-10187	B69-10082	02
Double emitter suppressed carrier modulator uses commercially available components			MOIRE EFFECTS		
M-FS-2494	B67-10101	01	Checking flat conductor cable spacing by means of a moire pattern		
Laboratory pulse modulator uses minority carrier storage diodes			M-FS-20426	B69-10456	05
M-FS-2442	B67-10226	01	MOISTURE		
Solid state phase detector replaces bulky transformer circuit			Metal sheath improves thermocouple using graphite in one leg		
MSC-11007	B67-10253	01	NU-0011	B65-10051	01
Interference effects eliminated in random oriented space station antenna system			Impact and puncture resistant material protects parts from damage		
MSC-11004	B67-10435	01	MSC-747	B66-10375	05
Laser communication system is insensitive to atmospherically induced noise			Minimum permissible leakage resistance established for instrumentation systems		
GSFC-10396	B67-10587	01	M-FS-848	B66-10397	01
Electro-optic modulator for infrared laser using gallium arsenide crystal			Double copper sheath multiconductor instrumentation cable is durable and easily installed in high thermal or nuclear radiation area		
GSFC-10686	B68-10255	02	NUC-10007	B67-10538	01
Analysis of magnetically-controlled processes in pulse-modulation systems			Instrumentation monitors transported material through variety of parameters		
GSFC-10241	B69-10070	01	M-FS-12938	B67-10545	01
Optically induced free carrier light					

MOISTURE METERS

SUBJECT INDEX

MOISTURE METERS

Detection of entrapped moisture in
honeycomb sandwich structures
MSC-1103 B67-10116 01

MOLDING MATERIALS

Plastic plus stainless-steel fibers make
resilient, impermeable material
WOO-246 B65-10374 03

Spray-on technique simplifies fabrication of
complex thermal insulation blanket
M-FS-497 B66-10053 03

Cork is used to make tooling patterns and
molds
MSC-425 B66-10328 01

Thermoplastic rubberlike material produced
at low cost
JPL-793 B66-10453 03

Improved compression molding process
LANGLEY-10027 B67-10302 03

Modular packaging technique for combining
integrated circuits and discrete components
GSFC-10369 B69-10453 01

A method for observing gas evolution during
plastic laminate cure
MSC-15592 B69-10530 03

MOLDS

Vacuum forming of thermoplastic sheet results
in low-cost investment casting patterns
ARC-7 B63-10008 05

Improved molybdenum disulfide-silver motor
brushes have extended life
M-FS-64 B63-10479 03

Refractory ceramic has wide usage, low
fabrication cost
M-FS-67 B63-10481 03

Plastic molds reduce cost of encapsulating
electric cable connectors
M-FS-69 B63-10568 05

Molded elastomer provides compact ferrite-core
holder, simplifies assembly
JPL-584 B64-10084 05

Plastic films for reflective surfaces
reproduced from masters
GSFC-188 B64-10151 03

Pressure molding of powdered materials
improved by rubber mold insert
WOO-100 B64-10270 03

Epoxy-resin patterns speed shell-molding of
aluminum parts
M-FS-303 B65-10177 05

Spray-on technique simplifies fabrication of
complex thermal insulation blanket
M-FS-497 B66-10053 03

Split glass tube assures quality in electron
beam brazing
M-FS-564 B66-10151 05

Cork is used to make tooling patterns and
molds
MSC-425 B66-10328 01

Strippable grid facilitates removal of
grid-surfaced conical workpiece from die
M-FS-716 B66-10334 01

Plug replaces weld filler as seal in complex
casting
NU-0049 B66-10489 05

Isostatic compression process converts
polyaromatics into structural material
JPL-892 B67-10168 03

Plastic preforms facilitate fabrication
of welded cordwood electronic modules
LEWIS-90339 B68-10063 01

Improved molding process ensures plastic
parts of higher tensile strength
LANGLEY-10033 B68-10132 05

Standards for compatibility of printed
circuit and component lead materials
M-FS-14531 B68-10310 01

Compressible sleeve provides automatic
centering for grinding or turning of
cylinders
SAN-10021 B68-10318 05

Tools made of ice facilitate forming of
soft, sticky materials
KSC-10262 B69-10199 05

Photomicrometrology
M-FS-14556 B69-10736 01

MOLECULAR CHAINS

New class of thermosetting plastics has
improved strength, thermal and chemical
stability
LEWIS-10108 B67-10197 03

Production of crystalline polymers via
liquid crystal monomers
HQ-10235 B69-10744 03

MOLECULAR COLLISIONS

Quantum mechanical calculations of reactive
scattering cross sections in bimolecular
encounters
M-FS-13594 B67-10527 03

MOLECULAR DIFFUSION

Large volume continuous counterflow
dialyzer has high efficiency
HQ-10055 B67-10395 04

MOLECULAR FLOW

Test device prevents molecular bounce-back
GSFC-82 B63-10546 03

MOLECULAR INTERACTIONS

Molecular radiation - Its application in
physical measurements and analyses
M-FS-14816 B69-10562 02

MOLECULAR SPECTRA

Detection of molecular infrared spectra
HQ-10377 B69-10172 02

MOLECULAR SPECTROSCOPY

Submicron holes in thin films increase
sampling range of mass spectrometers
JPL-SC-097 B66-10380 03

MOLECULAR STRUCTURE

The thermodynamic properties of the wustite
phase are studied
ARG-10200 B68-10408 03

The preparation, identification and
properties of chlorophyll derivatives
ARG-10205 B68-10409 03

Recent development in organic scintillators
ARG-10344 B69-10198 03

MOLECULAR WEIGHT

Irradiation improves properties of an
aromatic polyester
LANGLEY-115 B65-10164 03

Synthesis of polyethers of hexafluorobenzene
and hexafluoropentanediol
M-FS-14962 B69-10636 03

MOLECULES

Large volume continuous counterflow
dialyzer has high efficiency
HQ-10055 B67-10395 04

SUBJECT INDEX

MOMENTUM

MOLTEN SALT ELECTROLYTES

Hydrated multivalent cations are new class
of molten salt mixtures
ARG-211 B67-10033 03

Lithium-tellurium bimetallic cell has
increased voltage
ARG-10141 B68-10400 01

MOLTEN SALT NUCLEAR REACTORS

Induction probe determines levels of
liquid metals
ARG-10348 B69-10256 03

MOLYBDENUM

New apparatus increases ion beam power density
LEWIS-73 B63-10440 01

Titanium diaphragm makes excellent amplitron
cathode support
GSFC-394 B65-10298 01

Silver plating ensures reliable diffusion
bonding of dissimilar metals
M-FS-1975 B67-10124 03

Welding, bonding, and sealing of refractory
metals by vapor deposition
LEWIS-123 B67-10232 03

Extrusion of small-diameter, thin-wall
tungsten tubing
LEWIS-90335 B67-10355 05

Movable RF probe eliminates need for
calibration in plasma accelerators
LEWIS-10127 B67-10362 01

Reaction of steam with molybdenum is
studied
ARG-295 B67-10502 03

Lightweight heater generates high
temperatures from low current
SAN-10004 B68-10223 01

Graphite cloth facilitates vacuum
evaporation of silicon monoxide
M-FS-14764 B68-10256 03

Nickel base alloy with improved stress
rupture properties
LEWIS-10283 B68-10344 03

Study of high temperature bearing materials
LEWIS-10829 B69-10252 03

High strength, superplastic superalloy
LEWIS-10805 B69-10293 03

MOLYBDENUM ALLOYS

Brazing method produces solid-solution bond
between refractory metals
LEWIS-212 B65-10370 05

Etching process mills PH 14-8 Mo alloy
steel to precise tolerances
MSC-270 B66-10110 03

Nickel-base superalloys developed for high-
temperature applications
LEWIS-226 B66-10222 03

Single-crystal semiconductor films grown on
foreign substrates
WOO-076 B66-10225 01

Bearing alloys with hexagonal crystal
structures provide improved friction and wear
characteristics
LEWIS-320 B66-10373 03

High temperature alloy
LEWIS-10377 B68-10253 03

MOLYBDENUM COMPOUNDS

White primer permits a corrosion-resistant
coating of minimum weight
M-FS-304 B66-10207 03

Refractory-metal compound impregnation of
polytetrafluoroethylene
LEWIS-10733 B69-10072 03

MOLYBDENUM DISULFIDES

Molybdenum disulfide mixtures make effective
high-vacuum lubricants
M-FS-54 B63-10453 03

Improved molybdenum disulfide-silver motor
brushes have extended life
M-FS-64 B63-10479 03

Lightweight hinged bellows restraint has
high load capacity
WOO-151 B65-10341 03

Polytetrafluoroethylene lubricates ball
bearings in vacuum environment
M-FS-379 B66-10081 03

Dry film lubricant is effective at extreme
loads
M-FS-628 B66-10256 03

Improved rolling element bearings provide
low torque and small temperature rise in
ultrahigh vacuum environment
LEWIS-359 B66-10678 05

Machine tests slow-speed sliding friction in
high vacuum
M-FS-12341 B67-10379 05

One hundred angstrom niobium wire
LEWIS-10128 B68-10279 03

Application of the solid lubricant
molybdenum disulfide by sputtering
LEWIS-10544 B68-10340 03

A new solid lubricant
LEWIS-10812 B69-10250 03

MOMENTS

Equations provide tubular information on
effects of uniform and variable loads on
thin, flat, circular plates
ARG-151 B66-10601 05

Study made of large amplitude fuel sloshing
M-FS-12381 B67-10439 03

Computer program analyzes and designs
supersonic wing-body combinations
ARC-10141 B68-10335 06

MOMENTS OF INERTIA

Device enables measurement of moments of
inertia about three axes
GSFC-49 B65-10176 05

Switching mechanism senses angular
acceleration
GSFC-462 B66-10158 01

Instrument calculates moments of inertia of
complex plane figures
MSC-628 B66-10306 01

Automatic system determines moments of
inertia of asymmetrical objects
M-FS-1769 B66-10636 01

MOMENTUM

Ultra-sensitive transducer advances
micro-measurement range
ARC-26 B64-10004 01

Computer program MCAP provides for steady
state thermal and flow analysis of multiple
parallel channels in heat generating solid
NUC-10043 B67-10457 06

Axisymmetric two-phase perfect gas
performance program
MSC-11774 B68-10374 06

A magnifying scratch-gage force transducer

MOMENTUM TRANSFER

SUBJECT INDEX

MULTIPHASE FLOW

SUBJECT INDEX

MULTIPHASE FLOW

Signal generator converts direct current
to multiphase supplies
MSC-11043 B67-10368 01

Flowmeter determines mix ratio for viscous
adhesives
M-FS-2308 B67-10378 01

MULTIPLEXING

Microphone multiplex system provides multiple
outlets from single source
GSFC-426 B66-10308 01

Security warning system monitors up to
fifteen remote areas simultaneously
KSC-66-39 B66-10548 01

Multiplexer uses insulated gate-field
effect transistors
M-FS-13096 B67-10396 01

Seismographic recording of large rocket
engine operation
M-FS-20545 B69-10756 01

MULTIPLICATION

Binary system generates sidereal rate from
standard solar rate
GSFC-190 B64-10200 01

Video signal processing system uses gated
current mode switches to perform high speed
multiplication and digital-to-analog
conversion
MSC-781 B66-10429 01

Stress calculator speedily converts strain
data
M-FS-2021 B67-10182 03

Improved electromechanical master-slave
manipulator
ARG-10027 B68-10372 05

Numerical inversion of finite Toeplitz
matrices and vector Toeplitz matrices
ARG-10445 B69-10415 02

MULTIPLIERS

Computer determines high-frequency phase
stability
GSFC-113 B63-10555 01

Precision gage measures ultrahigh vacuum
levels
GSFC-114 B63-10597 01

Digital cardiometer computes and displays
heartbeat rate
MSC-93 B64-10258 01

Variable load automatically tests dc power
supplies
GSFC-291 B65-10105 01

Photoresistance analog multiplier has wide
range
GSFC-360 B65-10287 01

Circuit multiplies pulse width modulation,
exhibits linear transfer function
HQ-56 B67-10055 01

Improved dc voltage multiplier
M-FS-14042 B68-10074 01

Conceptual hermetically sealed elbow
actuator
M-FS-14710 B68-10300 05

System measures arc energy dissipated in
relay contact cycling
M-FS-14541 B68-10312 01

System measures response time of
photomultiplier tubes
LEWIS-10437 B68-10382 01

A 35 GHz solid state transmitter/driver
M-FS-20152 B68-10545 01

Device for diode tuning in a stripline
varactor harmonic multiplier
M-FS-20153 B69-10013 01

Automatic calorimetry system monitors RF
power
NPO-11033 B69-10384 01

MULTIPOLES

An improved atomic hydrogen frequency and
time standard
GSFC-10706 B69-10341 02

MULTISTAGE ROCKET VEHICLES

Shock and vibration response of multistage
structure
M-FS-14972 B68-10353 05

MULTIVIBRATORS

Temperature-sensitive network drives astable
multivibrator
GSFC-137 B63-10609 01

Inexpensive, stable circuit measures heart
rate
MSC-95 B65-10010 01

Stepping motor drive circuit designed for low
power drain
GSFC-198 B65-10026 01

Simulator produces physiological waveforms
MSC-94 B65-10091 01

Variable frequency transistor inverters use
multiple core transformers
GSFC-183 B65-10119 01

Variable frequency magnetic multivibrator
generates stable square-wave output
GSFC-AE-21 B65-10124 01

Auxiliary circuit enables automatic monitoring
of EKG's
MSC-106 B65-10142 01

Digital-output cardiometer measures rapid
changes in heartbeat rate
MSC-133 B65-10143 01

Solid-state switching used to speed up
capacitive integrator
LANGLEY-104 B65-10159 01

PCM magnetic tape system efficiently records
and reproduces data
GSFC-375 B65-10311 01

Frequency divider is free of spurious outputs
GSFC-308 B65-10334 05

Frequency discriminator with binary output
eliminates tuned circuits
M-FS-376 B65-10349 01

Circuit exhibits power efficiency greater
than 75 percent
MSC-254 B66-10034 01

Miniature bioelectric device accurately
measures and telemeters temperature
ARC-52 B66-10057 01

Electronic phase-locked-loop speed control
system is stable
JPL-SC-084 B66-10232 01

Electronic circuit delivers pulse of high
interval stability
MSC-673 B66-10501 01

Preregulator feedback circuit utilizes
light actuated switch
M-FS-1180 B66-10542 01

Security warning system monitors up to

SUBJECT INDEX

NITROGEN

NIOBATES

Improved process for making thin-film sodium niobate capacitors
MSC-11231 B68-10163 01

NIOBUM

Niobium thin films are superconductive in strong magnetic fields at low temperatures
JPL-SC-174 B66-10122 02

Simple pump maintains liquid helium level in cryostat
M-FS-1763 B67-10039 05

Tube-to-header joint for bimetallic construction
LEWIS-10282 B67-10464 05

One hundred angstrom niobium wire
LEWIS-10128 B68-10279 03

Superconductive thin film makes convenient liquid helium level sensor
LANGLEY-10289 B68-10341 01

Nickel-base superalloy*s excellent properties promote its service to 2200 degrees F
LEWIS-10355 B68-10380 03

High-emittance coatings on metal substrates
LEWIS-10325 B68-10381 03

Inverted grounding technique for electron beam heating
LEWIS-10543 B68-10411 01

Study of high temperature bearing materials
LEWIS-10829 B69-10252 03

High strength, superplastic superalloy
LEWIS-10805 B69-10293 03

Report on a cryogenic gyroscope
NPO-11200 B69-10504 02

NIOBUM ALLOYS

Protected, high-temperature connecting cable
LEWIS-10149 B67-10461 01

Application of the solid lubricant molybdenum disulfide by sputtering
LEWIS-10544 B68-10340 03

Improved high-temperature silicide coatings
LEWIS-10817 B69-10266 03

Niobium-uranium alloys with voids of predetermined size and total volume
ARG-10490 B69-10641 03

NIOBUM COMPOUNDS

Environmental study of miniature slip rings
M-FS-2443 B67-10210 05

Preparation of superconducting thin films of transition-metal interstitial compounds
HQ-10445 B69-10470 01

NITRATES

Didymium compound improves nickel-cadmium cell
GSFC-295 B65-10083 03

Crack detection method is safe in presence of liquid oxygen
M-FS-236 B65-10107 03

Chromium oxide coatings improve thermal emissivity of alumina
WOO-263 B66-10227 03

Special treatment reduces helium permeation of glass in vacuum systems
HQ-25 B66-10372 02

Coating protects magnesium-lithium alloys against corrosion
M-FS-2446 B67-10149 03

Cobalt improves nickel hydroxide electrodes for batteries
LEWIS-10760 B69-10228 01

NITRIC ACID

Method of welding joint in closed vessel improves quality of seam
JPL-170 B63-10139 05

Modification increases light output of injection-luminescent diodes
M-FS-192 B65-10006 01

Galvanic corrosion reduced in aluminum fabrications
M-FS-272 B65-10140 03

Nonhazardous acid etches weld samples
M-FS-975 B66-10378 05

Gage of 6.5 per cent Si-Fe sheet is chemically reduced
MSC-537 B66-10454 03

Copper-acrylic enamel serves as lubricant for cold drawing of refractory metals
ARG-54 B66-10471 05

Sodium perxenate permits rapid oxidation of manganese for easy spectrophotometric determination
ARG-262 B67-10421 03

Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
ARG-10065 B68-10425 03

Continuous analysis of nitrogen dioxide in gas streams of plants
ARG-10356 B69-10254 03

Improved nickel plating of Inconel X-750
M-FS-18604 B69-10463 05

A method for precision anodize stripping
MSC-15040 B69-10581 03

NITRIDES

Preparation of superconducting thin films of transition-metal interstitial compounds
HQ-10445 B69-10470 01

NITRILES

Coating permits use of strain gage in water and liquid hydrogen
M-FS-594 B66-10192 01

Gas chromatographic column enables analysis of propellant hydrazines
MSC-1161 B66-10586 03

NITROGEN

Helium tube separates nitrogen gas from liquid nitrogen
JPL-398 B63-10251 05

New method forms bond line free of voids
LANGLEY-20 B63-10558 05

Compressed gas system operates semitrailer brakes during winching operation
JPL-0036 B64-10306 05

Gas diffusion cell removes carbon dioxide from occupied airtight enclosures
MSC-118 B64-10319 03

Apparatus facilitates pressure-testing of metal tubing
LEWIS-174 B65-10131 05

Instrument accurately measures extremely low air densities
M-FS-193 B65-10221 01

Ceramic materials purified by experimental method
LEWIS-225 B65-10270 03

NITROGEN COMPOUNDS

Nondestructive test method accurately sorts
mixed bolts
M-FS-1426 B66-10574 01

Portable fixture facilitates pressure
testing of instrumentation fittings
M-FS-2032 B67-10121 03

Calibrating ultrasonic test equipment for
checking thin metal strip stock
NUC-10009 B67-10127 01

Weld procedure produces quality welds for
thick sections of Hastelloy-X
NUC-10048 B67-10195 05

Electron beam welder X-rays its own welds
LEWIS-10111 B67-10216 02

Liquid crystals detect voids in fiber glass
laminates
LEWIS-10104 B67-10286 03

Improved ultrasonic TV images achieved by
use of Lamb-wave orientation technique
ARG-203 B67-10295 02

Thermal neutron image intensifier tube
provides brightly visible radiographic
pattern
ARG-120 B67-10296 02

Braze joint quality tested
electromagnetically
M-FS-12795 B67-10333 01

Handbooks describe eddy current techniques
used in nondestructive testing of metal
parts and components
M-FS-13172 B67-10374 03

Camera lens adapter magnifies image
M-FS-11955 B67-10431 02

Surface-crack detection by microwave methods
ARC-10009 B67-10482 01

Study of stress corrosion in aluminum
alloys
M-FS-13906 B67-10533 03

Mechanized X-ray inspection system for
large tanks
M-FS-12867 B67-10564 02

Nondestructive testing techniques used in
analysis of honeycomb structure bond
strength
M-FS-1214 B67-10574 01

Lamb waves increase sensitivity in
nondestructive testing
ARG-10009 B67-10605 02

Eddy current probe measures size of cracks
in nonmetallic materials
M-FS-14059 B67-10645 03

Dc pin-to-pin testing of integrated
circuits
GSFC-10284 B68-10001 01

Gage monitors quality of cross-wire
resistance welds
GSFC-90549 B68-10002 01

Development of mechanized ultrasonic
scanning system
M-FS-13638 B68-10004 05

Evaluation of methods for nondestructive
testing of brazed joints
ARG-90175 B68-10191 03

Standards for compatibility of printed
circuit and component lead materials
M-FS-14531 B68-10310 01

Automatic, nondestructive test monitors
in-process weld quality
M-FS-14996 B68-10333 01

Nondestructive test determines overload
destruction characteristics of current
limiter fuses
XGS-08566 B68-10364 01

Nondestructive method for measuring residual
stresses in metals, a concept
KSC-10237 B68-10378 03

Automatic system nondestructively monitors
and records fatigue crack growth
LANGLEY-16091 B68-10379 01

Training manuals for nondestructive testing
using magnetic particles
M-FS-20187 B68-10391 03

Nondestructive testing of brazed rocket
engine components
M-FS-18191 B68-10394 03

Hydrostatic testing of porous assemblies
M-FS-18298 B68-10439 05

Rocket engine analog simulation
M-FS-14511 B68-10511 01

Failure rates for accelerated acceptance
testing of silicon transistors
ERC-10198 B68-10541 01

Thick transducers used for generating
short-duration stress pulses in thin

NONUNIFORM MAGNETIC FIELDS

SUBJECT INDEX

NONUNIFORM MAGNETIC FIELDS

Superconductor magnets used for stagger-tuning
traveling-wave maser
GSFC-292

B65-10165 01

NONUNIFORMITY

A radiometer-pyrometer
LEWIS-284

B66-10606 01

Bimetal sensor averages temperature of
nonuniform profile
LEWIS-10362

B68-10007 01

NORMAL DENSITY FUNCTIONS

Computer program determines exact two-sided
tolerance limits for normal distributions
M-FS-18045

B68-10158 06

Application of a truncated normal failure
distribution in reliability testing
M-FS-14328

B68-10179 02

NORMAL SHOCK WAVES

Program computes equilibrium normal shock
and stagnation point solutions for
arbitrary gas mixtures
LANGLEY-10090

B67-10509 06

NOSE CONES

Colloidal suspension simulates linear
dynamic pressure profile
WOO-266

B66-10214 05

New class of thermosetting plastics has
improved strength, thermal and chemical
stability
LEWIS-10108

B67-10197 03

NOTCH STRENGTH

New weldable high strength aluminum alloy
developed for cryogenic service
M-FS-737

B66-10613 05

Manual of typical low temperature
mechanical properties of several materials
M-FS-18331

B69-10179 03

NOTCH TESTS

Effect of surface irregularities on bellows
fatigue life
M-FS-14480

B68-10229 05

NOTCHES

Apparatus of small size can be extended into
long, rigid boom
JPL-305

B63-10200 05

NOZZLE DESIGN

Binary fluid amplifier solves stability and
load problems
ERC-15

B66-10177 01

Instrumentation for nondestructive testing
of composite honeycomb materials
M-FS-20405

B69-10366 03

NOZZLE FLOW

Flow control valve is independent of pressure
drop
JPL-WOO-039

B65-10121 05

Elimination of rocket engine asymmetric
loads during tests at sea level
M-FS-1730

B66-10674 05

Flow liner extends operating life of
high-angulation bellows
M-FS-12023

B67-10512 05

Axisymmetric two-phase perfect gas
performance program
MSC-11774

B68-10374 06

One-dimensional two-phase reacting gas
nonequilibrium performance program
MSC-11780

B68-10376 06

Computer program for high pressure real
gas effects

LEWIS-10820

B69-10222 06

Natural gas flow through critical nozzles
LEWIS-11031

B69-10712 02

NOZZLE GEOMETRY

Binary fluid amplifier solves stability and
load problems
ERC-15

B66-10177 01

Venturi meter with separable diffuser
LEWIS-10483

B68-10295 05

One-dimensional reacting gas nonequilibrium
performance program
MSC-11777

B68-10375 06

One-dimensional two-phase reacting gas
nonequilibrium performance program
MSC-11780

B68-10376 06

Axisymmetric reacting gas nonequilibrium
performance program
MSC-11781

B68-10377 06

Bell nozzle kernel analysis program
M-FS-18456

B69-10146 06

NOZZLES

Improved technique for localizing
electropolishing features novel nozzles
WOO-101

B64-10271 01

Heated die facilitates tungsten forming
LEWIS-25A

B66-10047 05

Grit blasting nozzle fabricated from mild
tool steel proves satisfactory
M-FS-1420

B66-10597 05

Miniature paint-spray gun for recessed
areas
MSC-13060

B68-10387 05

System for measuring spatial distribution of
ejected droplets, a concept
NPO-10185

B68-10402 01

High pressure real gas effects for helium
and nitrogen
LEWIS-10819

B69-10669 06

NUCLEAR CHEMISTRY

Compilation of detection sensitivities in
thermal-neutron activation
ARG-10068

B67-10641 03

NUCLEAR ENERGY

Potassium plasma cell facilitates thermionic
energy conversion process
ARG-10010

B67-10399 01

Training course for radiation safety
technicians
ARG-216

B67-10477 02

NUCLEAR EXPLOSIONS

Rapid-response, light-exposure control
system
NPO-10238

B68-10502 01

Hydrodynamics of a new concept of primary
containment by energy absorption
ARG-10242

B69-10046 05

Transplutonium elements processed from
rock debris of underground detonations
ARG-10222

B69-10054 03

NUCLEAR FUEL ELEMENTS

Glassy materials investigated for nuclear
reactor applications
ARG-10075

B68-10103 03

Performance of low-pressure thermionic
converters is evaluated
ARG-10276

B69-10090 01

Fast framing cameras provide high-speed

O RING SEALS

Vented piston seal prevents fluid leakage between two chambers
JPL-179 B63-10141 05

Self sealing disconnect for tubing forms metal seal after breakaway
JPL-354 B63-10226 05

Filter for high-pressure gases has easy take-down, assembly
JPL-373 B63-10234 03

Modified RF coaxial connector ends vacuum chamber wiring problem
GSFC-150 B64-10010 01

Blade valve isolates compartment in pipe, opens to allow free flow
JPL-585 B64-10188 05

Two-part valve acts as quick coupling
JPL-478 B64-10223 05

Multiple element soft X-ray source produces wide range of radiation
GSFC-286 B65-10082 02

Low-cost tool minimizes damage to O-rings during installation
MSC-140 B65-10116 05

Fluid check valve has fail-safe feature
JPL-0019 B65-10207 05

Reinforcement core facilitates O-ring installation
WOO-228 B65-10378 05

O-ring tube fittings form leakproof seal in hydraulic systems
M-FS-481 B66-10020 05

Epoxy blanket protects milled part during explosive forming
M-FS-307 B66-10029 03

Cryogenic liquid transfer system reduces residual boiloff
LEWIS-274 B66-10157 02

Rubber-coated bellows improves vibration damping in vacuum lines
LEWIS-273 B66-10187 02

Pressure seal ring may be effective over wide temperature range
M-FS-486 B66-10211 05

O-rings with mylar back-up provide high-pressure cryogenic seal
M-FS-603 B66-10278 05

High pressure tube coupling requires no threads or flares
MSC-600 B66-10285 05

Bi-metallic devices help maintain constant sealing forces down to cryogenic temperatures
M-FS-800 B66-10325 02

Inflatable O-ring seal would ease closing of hatch cover plate
MSC-740 B66-10385 05

Large diameter metal ring seal prevents gas leakage at 5000 psi
M-FS-1064 B66-10422 05

Miniature valve accurately controls small volume fluid flow
ARG-66 B66-10473 05

Cryogenic cooling reduces high voltage arcing between electrodes operating in a vacuum
ARG-109 B66-10499 02

Feed-thru flange is useful in vacuum applications to cryogenic temperatures
JPL-846 B66-10615 02

Aluminized thin-window proportional-counter tube is stronger, more responsive in long wavelength region
JPL-689 B67-10015 01

Plasma jet electrode has longer operating life
NU-0098 B67-10024 02

Feed-through connector couples RF power into vacuum chamber
NU-0096 B67-10027 01

Irradiated gases transferred without contamination or dilution
LEWIS-278 B67-10044 03

Laboratory arc furnace features interchangeable hearths
ARG-125 B67-10052 05

Line adapter provides quick disconnect under moderate side loading
M-FS-2159 B67-10256 05

Improved compression molding process
LANGLEY-10027 B67-10302 03

Hand-operated plug insertion valve
M-FS-12019 B67-10466 05

Dynamic valve seal is reliable at cryogenic temperatures
M-FS-12987 B67-10526 05

Lead plated aluminum ring provides static high pressure seal for large diameter pressure vessel
NUC-10008 B67-10539 05

Polystyrene cryostat facilitates testing tensile specimens under liquid nitrogen
NUC-10522 B67-10613 02

Ferromagnetic core valve gives rapid action on minimum energy
LEWIS-10135 B67-10623 05

Eddy current disk valve
LEWIS-10123 B67-10638 05

Cooled miniature pressure transducers effective at high temperatures
LEWIS-10401 B68-10370 01

Insertion device for pressure testing
MSC-15185 B69-10061 03

Improved retort for cleaning metal powders with hydrogen
LEWIS-10718 B69-10468 03

OCEANOGRAPHY

Oceanborne transponder platform has good stability
M-FS-171 B65-10035 05

Extendable mast used in one shot soil penetrometer
JPL-685 B66-10146 05

New method for critical failure prediction of complex systems
M-FS-14133 B68-10252 02

Computer graphics data conditioning
M-FS-14695 B68-10296 06

Charts designate probable future oceanographic research fields
M-FS-20202 B68-10397 01

Analysis of filament reinforced metal-shell pressure vessels
LEWIS-10352 B68-10405 06

OFF-ON CONTROL

SUBJECT INDEX

Dual-mode operation of a neutron source, a concept HQ-10106	B69-10248	02	M-FS-565	B66-10249	05
OFF-ON CONTROL			Vibrator improves spark erosion cutting process NU-0071	B66-10333	01
Safety switch permits emergency bridge crane shutdown M-FS-549	B66-10168	05	Valve effectively controls amount of contaminant in flow stream M-FS-1771	B66-10683	05
Key-locked guard prevents accidental switch actuation MSC-419	B66-10235	05	Method accurately measures mean particle diameters of monodisperse polystyrene latexes ARG-207	B67-10054	02
Electronic shutter gates image orthicon on and off HQ-96	B67-10270	01	Accumulator isolator prevents malfunctioning of faulty hydraulic system M-FS-1415	B67-10528	05
A method for reducing sampling jitter in digital control systems NPO-11088	B69-10338	01	Conceptual apparatus for detecting leaks of nonconductive liquids M-FS-14713	B68-10303	01
OGO			TFE-fluorocarbon liners for flexible hoses M-FS-16480	B69-10288	05
Rotational fluid coupling eliminates hose entanglements MSC-312	B66-10585	05	Apparatus automatically measures soluble residue content of volatile solvents SAN-10032	B69-10292	03
An overview of electromagnetic interference problems in spacecraft NPO-11170	B69-10362	01	Freon, T-B1 cutting fluid MSC-11486	B69-10485	05
OHMMETERS			Synthesis of polyethers of hexafluorobenzene and hexafluoropentanediol M-FS-14962	B69-10636	03
Ohmmeter senses depletion of lubricant in journal bearings LEWIS-37	B64-10042	01	Device for reflowing electrodeposited solder on terminals M-FS-13821	B69-10670	01
Weld leaks rapidly and safely detected M-FS-362	B65-10265	01	Discrimination of fish oil and mineral oil slicks on sea water HQ-10412	B69-10673	01
Electronic ohmmeter provides direct digital output GSFC-363	B65-10274	01	OLEIC ACID		
Resistor monitors transfer of liquid helium LANGLEY-229	B66-10580	01	Magnetic fluid readily controlled in zero gravity environment LEWIS-126	B65-10335	03
Electrical continuity scanner facilitates identification of wires for soldering to connectors MSC-626	B66-10605	01	OLIVINE		
Ratio matching of half-bridge weldable strain gages, computer program FRC-10032	B69-10040	06	Epitaxial crystalline growth upon cold substrates MSC-11196	B69-10494	01
Nondestructive evaluation of printed wiring boards by microhm resistance measurements SAN-10034	B69-10272	01	OMNIDIRECTIONAL ANTENNAS		
OILS			Lightweight load support serves as vibration damper JPL-661	B65-10144	05
Oil-smeared models aid wind tunnel measurements LANGLEY-4	B63-10311	03	Omnidirectional antennas transmit and receive over large bandwidth GSFC-436	B66-10133	01
Fine-particle filter prevents damage to vacuum pumps LEWIS-106	B63-10489	05	Interference effects eliminated in random oriented space station antenna system MSC-11004	B67-10435	01
Nonresonant support facilitates vibration testing of structures M-FS-224	B65-10039	05	ON-LINE PROGRAMMING		
Heater decomposes oil backstreaming from high-vacuum pumps GSFC-356	B65-10224	02	New computer system simplifies programming of mathematical equations M-FS-441	B66-10361	01
Oil-damped mercury pool makes precise optical alignment tool GSFC-353	B65-10253	02	Computer program simulates physical systems by solving the simultaneous differential equations describing the systems NPO-10019	B67-10193	06
Tensile-strength apparatus applies high strain-rate loading with minimum shock JPL-28	B66-10063	05	Computer graphics data conditioning M-FS-14695	B68-10296	06
Sensor detects hydrocarbon oil contaminants in fluid lines M-FS-522	B66-10068	01	Simplified system displays complex curves corresponding to input data HQ-10073	B69-10247	01
Fluid damping reduces bellows seal fatigue failures			ONE DIMENSIONAL FLOW

SUBJECT INDEX

OPTICAL EQUIPMENT

OPACITY

Opaque microfiche masthead permits easy reading
HQ-7 B65-10306 01

Optically driven switch turn-off time reduced by opaque coatings
JPL-SC-107 B66-10141 01

Pyrometry handbook describes practical aspects of surface temperature measurements of opaque materials
LEWIS-349 B66-10520 01

Technique for predicting temperature distribution in gases
LEWIS-10918 B69-10329 01

OPENINGS

Expandable rubber plug seals openings for pressure testing
NU-0048 B66-10229 05

Interior servicing platform simplifies maintenance of storage tanks
M-FS-1300 B66-10425 05

OPERATING TEMPERATURE

Precision capacitor has improved temperature and operational stability
ARG-189 B67-10313 01

Transient sensor development
M-FS-13370 B67-10471 01

Liquid crystal calibrator
M-FS-14151 B68-10221 03

OPERATIONAL HAZARDS

Economical and maintenance-free gas system operates railroad switches
NU-0045 B66-10124 05

Lifting clamp positively grips structural shapes
M-FS-593 B66-10176 05

OPERATIONAL PROBLEMS

Logic system aids in evaluation of project readiness
MSC-753 B66-10457 05

Electrochemical cell has internal resistive heater element
GSFC-10358 B68-10325 01

Design and sparring techniques to meet specified performance life
HQ-10200 B69-10528 02

OPERATIONS RESEARCH

Queueing register uses fluid logic elements
M-FS-317 B66-10100 05

OPERATOR PERFORMANCE

Optical projectors simulate human eyes to establish operator's field of view
WOO-250 B66-10010 02

Shoulder adapter steadies spot welding gun
M-FS-321 B66-10076 05

Tape reading fixture
M-FS-14146 B69-10008 05

Astronaut's tool for withdrawing/replacing computer cards
M-FS-20453 B69-10183 05

OPERATORS (MATHEMATICS)

Structure of the isotropic transport operators in three independent space variables
ARG-10448 B69-10432 06

OPERATORS (PERSONNEL)

Human transfer functions used to predict system performance parameters
LANGLEY-203 B66-10379 01

Remotely operated high pressure valve protects test personnel
MSC-11010 B67-10291 05

OPTICAL COMMUNICATION

Local measurements in turbulent flows through cross correlation of optical signals
M-FS-1268 B67-10030 01

Laser communication system is insensitive to atmospherically induced noise
GSFC-10396 B67-10587 01

Site survey for optimum location of Optical Communication Experimental Facility
M-FS-13155 B68-10050 06

Repetitively pulsed, wavelength-selective carbon dioxide laser
ERC-10178 B68-10564 02

Occulting-filter method for obtaining flashing-light visibility data
MSC-13097 B69-10107 02

Multipurpose binocular scanning apparatus
NPO-11002 B69-10311 02

Method of directing a laser beam with very high accuracy
NPO-11087 B69-10508 02

OPTICAL CORRECTION PROCEDURE

Oil-damped mercury pool makes precise optical alignment tool
GSFC-353 B65-10253 02

Image position sensor
M-FS-14101 B69-10783 02

OPTICAL COUPLING

Automatic frequency control of voltage-controlled oscillators
NPO-11064 B69-10569 01

OPTICAL DENSITY

PTFE-aluminum films serve as neutral density filters
LANGLEY-189 B66-10017 02

Digital computer processing of X-ray photos
JPL-792 B67-10005 04

Blood oxygen saturation determined by transmission spectrophotometry of hemolyzed blood samples
MSC-11018 B67-10252 04

Sodium perxenate permits rapid oxidation of manganese for easy spectrophotometric determination
ARG-262 B67-10421 03

VICAR-DIGITAL image processing system
NPO-10770 B69-10139 06

OPTICAL EQUIPMENT

Optics used to measure torque at high rotational speeds
LEWIS-13 B63-10338 01

Mirror device aligns machine surface perpendicular to sight lines
WOO-5 B63-10421 02

Micromachining produces optical apertures to micron dimensions
GSFC-206 B64-10211 05

Radiation-detector optical-imaging device is of simplified construction
GSFC-251 B64-10299 01

Simple optical system used to align spectrograph
LANGLEY-92 B65-10071 02

Computer programs simplify optical system analysis

OSCILLOGRAPHS

SUBJECT INDEX

Vibration analysis utilizing Mossbauer effect
M-FS-11974 B67-10339 01

Digital-to-analog converter operates from low level inputs
JPL-907 B67-10357 01

Interference effects eliminated in random oriented space station antenna system
MSC-11004 B67-10435 01

Oscillator circuit operates as digitally controlled frequency synthesizer
GSFC-570 B67-10447 01

Digital voltage-controlled oscillator
GSFC-512 B67-10449 01

Blood pressure reprogramming adapter assists signal recording
MSC-265 B67-10475 01

Improved circuit for measuring capacitive and inductive reactances
M-FS-13083 B67-10513 01

Analog voicing detector responds to pitch
GSFC-10085 B67-10571 01

Conceptual servo technique for controlling tape drivers
M-FS-12955 B67-10595 01

New technique for determination of cross-power spectral density with damped oscillators
M-FS-14022 B67-10602 02

Concept for automatic Doppler compensation in two-way communication systems
GSFC-10213 B67-10643 01

Deep space FM system, a concept
MSC-11825 B68-10289 01

Dynamic linearity measurement technique
KSC-10186 B68-10290 01

Cryogenic liquid level measuring probe
ARG-10138 B68-10291 01

Improved gas ring laser
MSC-11584 B68-10304 02

Communication system features dual mode range acquisition plus time delay measurement
M-FS-14323 B68-10306 01

Laser-Doppler gas-velocity instrument
M-FS-20039 B68-10349 02

A 35 GHz solid state transmitter/driver
M-FS-20152 B68-10545 01

Microelectronic oscillator, 2
GSFC-10387 B69-10063 01

Microelectronic oscillator
GSFC-10375 B69-10064 01

One hundred MHz voltage-controlled oscillator
NPO-11004 B69-10133 01

Rectangular-bore, high-gain laser plasma tube
HQ-10234 B69-10193 02

Technique for tuning antenna systems producing negligible signal radiation
KSC-10060 B69-10215 01

Linear voltage-to-frequency converter
GSFC-10546 B69-10220 01

Induction probe determines levels of liquid metals

ARG-10348 B69-10256 03

Pneumatic analog-to-pulse frequency converter
LEWIS-10345 B69-10276 02

Automatic tuning of hydrogen masers
GSFC-10127 B69-10452 01

Automatic frequency control of voltage-controlled oscillators
NPO-11064 B69-10569 01

Load current sensor for a pulse width modulator power regulator
GSFC-10656 B69-10578 01

Deposition monitor and control
NPO-10706 B69-10722 01

OSCILLOGRAPHS

Microwave technique measures plasma characteristics
LANGLEY-134 B65-10122 02

Manual-feed adapter permits microfilming of continuous oscillograph output
NU-0029 B65-10249 01

Lamp automatically switches to new filament on burnout
M-FS-498 B66-10046 01

Fatigue cracks detected and measured without test interruption
LEWIS-266 B66-10178 02

Indicator system provides complete data of engine cylinder pressure variation
LEWIS-291 B66-10470 05

Monitoring circuit accurately measures movement of solenoid valve
M-FS-1829 B66-10568 01

Instrument accurately measures small temperature changes on test surface
LANGLEY-174 B66-10637 01

Use of color-coded sleeve shutters accelerates oscillograph channel selection
KSC-10092 B67-10382 01

Crack growth measured on flat and curved surfaces at cryogenic temperatures
LEWIS-389 B67-10384 01

Instrumentation monitors transported material through variety of parameters
M-FS-12938 B67-10545 01

Nondestructive test determines overload destruction characteristics of current limiter fuses
XGS-08566 B68-10364 01

Electronic visualization of gas bearing behavior
LEWIS-10711 B69-10073 01

OSCILLOSCOPES

Emission tester for high-power vacuum tubes
JPL-628 B64-10158 01

Raster linearity of video cameras calibrated with precision tester
GSFC-200 B64-10209 01

Highly sensitive solids mass spectrometer uses inert-gas ion source
ERC-11 B66-10114 02

Apparatus presents visual display of semiconductor surface characteristics
JPL-665 B66-10200 01

New computer system simplifies programming of mathematical equations
M-FS-441 B66-10361 01

PHONOCARDIOGRAPHY

SUBJECT INDEX

PHONOCARDIOGRAPHY

Phonocardiograph system monitors heart sounds
MSC-185 B66-10154 04

Phonocardiograph microphone is rugged and
moistureproof
MSC-212 B66-10314 04

A phonocardiogram simulator
KSC-67-94 B67-10239 01

PHONONS

Measurements of thermoelectric power in
annealed and quenched gold-platinum alloys
ARG-10303 B69-10206 03

PHOSPHATES

Inorganic paint is durable, fireproof, easy
to apply
GSFC-366 B65-10156 03

Dry film lubricant is effective at extreme
loads
M-FS-628 B66-10256 03

Purification and characterization of two
fully deuterated enzymes
ARG-10314 B69-10207 04

PHOSPHIDES

Study of mechanical properties of uranium
compounds
ARG-10074 B68-10197 03

PHOSPHORIC ACID

Electrolytic etching process provides
effective bonding surface on stainless steel
GSFC-484 B66-10299 03

Electrochemical milling removes burrs and
solder from tubing ends
M-FS-714 B66-10358 03

Gage of 6.5 per cent Si-Fe sheet is
chemically reduced
MSC-537 B66-10454 03

Method for removing surface-damaged layers
from nickel alloys
M-FS-18151 B68-10522 03

Improved inorganic ion exchange membranes
LEWIS-10737 B69-10451 03

PHOSPHORS

Plastic scintillator converts standard
photomultiplier to ultraviolet range
ERC-9 B66-10108 02

Practical new method of measuring
thermal-neutron fluence
NUC-10086 B67-10352 02

Reparable, high-density microelectronic
module provides effective heat sink
M-FS-13075 B67-10356 01

Preparation of silver-activated zinc sulfide
thin films
GSFC-10687 B68-10271 03

A prototype high power portable lamp
M-FS-20229 B69-10189 02

The Quantasyn, an improved quantum
detector
ERC-10148 B69-10443 01

Precisely repeatable rotary mechanism
NPO-10679 B69-10696 05

PHOSPHORUS

Vapor grown silicon dioxide improves
transistor base-collector junctions
GSFC-389 B66-10091 01

Luminescent screen composition for
cathode ray tubes
ERC-19 B68-10056 01

Lateral PNP bipolar transistor with
aiding field diffusions
MSC-13072 B69-10741 01

PHOSPHORUS COMPOUNDS

Impurity diffusion process for silicon
semiconductors is fast and precise
GSFC-397 B65-10300 01

Sintering characteristics and properties
of PuS and PuP are determined
ARG-10228 B69-10058 03

PHOSPHORUS ISOTOPES

An improved nuclear magnetic resonance
spectrometer
JPL-762 B67-10234 01

PHOTOCATHODES

Point-source light sensor circuit is
insensitive to background light
JPL-778 B66-10502 01

Design concept for improved photo-scan tube
JPL-818 B67-10157 01

Electronic shutter gates image orthicon on
and off
HQ-96 B67-10270 01

Laser system generates single-frequency
light
M-FS-2556 B67-10288 02

Improved electro-optical tracking system
M-FS-14791 B68-10311 01

A simple electrometer for measuring small
photoelectric currents
GSFC-10603 B69-10734 01

PHOTOCHEMICAL REACTIONS

Heparin insolubilized with crosslinking
agent
NPO-10834 B69-10299 03

PHOTOCONDUCTIVITY

System for etching thick aluminum layers
minimizes bridging and undercutting
M-FS-1366 B66-10400 03

Process facilitates photoresist mask
alignment on SiC crystals
M-FS-2394 B67-10144 01

Improved radiographic image amplifier panel
M-FS-14522 B68-10363 02

Integrated metal transistor leads
GSFC-90536 B68-10518 01

Wide-band doubler and sine wave quadrature
generator
NPO-11133 B69-10383 01

PHOTOCONDUCTORS

Light-sensitive potentiometer measures
product of two variables
GSFC-240 B65-10076 01

Light-controlled resistors provide
quadrature signal rejection for high-gain
servo systems
WSO-340 B67-10552 01

Automatic frequency control of
voltage-controlled oscillators
NPO-11064 B69-10569 01

PHOTODIODES

Compact cartridge drives coded tape at
constant readout speed
JPL-472 B64-10222 01

Simple circuit positions film frames in
projector
JPL-508 B65-10132 02

Instrument calibrates low gas-rate flowmeters

using a laser light source
LEWIS-10777 B69-10122 02

A prototype high power portable lamp
M-FS-20229 B69-10189 02

Multipurpose binocular scanning apparatus
NPO-11002 B69-10311 02

Technique for pinpointing submicron
particles in the electron microprobe
HQ-10043 B69-10465 01

Automatic sample rotator for metallographic
polishing
NPO-11015 B69-10596 03

PHOTOINTERPRETATION
Laser measuring system accurately locates
point coordinates on photograph
ARG-74 B66-10560 02

PHOTOIONIZATION
Ion chambers simplify absolute intensity
measurements in the vacuum ultraviolet
ERC-10 B66-10439 01

An improved soft X-ray photoionization
detector
GSFC-540 B67-10072 02

PHOTOLUMINESCENCE
Electronic gating circuit and ultraviolet
laser excitation permit improved dosimeter
sensitivity
ARG-10109 B68-10077 02

PHOTOLYSIS
Production of crystalline polymers via
liquid crystal monomers
HQ-10235 B69-10744 03

PHOTOMETERS
New method used to fabricate gallium arsenide
photovoltaic device
WOO-062 B64-10019 01

Electromechanical flowmeter accurately
monitors fluid flow
GSFC-357 B65-10273 01

Sensor detects hydrocarbon oil contaminants
in fluid lines
M-FS-522 B66-10068 01

Scanning photometer system automatically
determines atmospheric layer height
MSC-245 B66-10170 01

Optical device enables small detector to see
large field of view
WOO-253 B66-10263 02

Solvent residue content measured by light
scattering technique
M-FS-850 B66-10320 01

Uniform reflective films deposited on large
surfaces
GSFC-507 B66-10483 02

Preregulator feedback circuit utilizes
Light Actuated Switch
M-FS-1180 B66-10542 01

Photocell shadowing technique improves light
source detector
JPL-809 B66-10564 01

Sensors measure surface ablation rate of
reentry vehicle heat shield
LANGLEY-287 B66-10592 01

Blackbody cavity radiometer has rapid
response
JPL-521 B66-10679 01

Local measurements in turbulent flows
through cross correlation of optical signals

M-FS-1268 B67-10030 01

Stereo photomacrography system
LANGLEY-10176 B68-10141 01

UV detector monitors organic contamination
of optical surfaces
M-FS-20246 B68-10413 01

Rocket sonde measurements of ozone in the
upper atmosphere
GSFC-10580 B69-10077 02

Active frequency control system for
argon FM laser
M-FS-14988 B69-10099 02

Ring laser angle encoder
MSC-13099 B69-10115 01

PHOTOMETRY
PTFE-aluminum films serve as neutral
density filters
LANGLEY-189 B66-10017 02

Special purpose reflectometer uses modified
ulbricht sphere
MSC-1135 B67-10109 02

VICAR-DIGITAL image processing system
NPO-10770 B69-10139 06

Zone purification of potassium chloride
ARG-10377 B69-10241 03

Instrumentation for nondestructive testing
of composite honeycomb materials
M-FS-20405 B69-10366 03

Quantitative determination of flavin nucleotide
using the bacterial bioluminescent reaction
GSFC-10565 B69-10715 04

PHOTOMICROGRAPHY
Inspection of fine wires simplified by
capillary tube wire holder
MSC-358 B66-10329 01

Method accurately measures mean particle
diameters of monodisperse polystyrene
latexes
ARG-207 B67-10054 02

Stereo photomacrography system
LANGLEY-10176 B68-10141 01

One hundred angstrom niobium wire
LEWIS-10128 B68-10279 03

PHOTOMULTIPLIER TUBES
Variable light source with a million-to-one
intensity ratio
JPL-WOO-008 B63-10424 03

System selects framing rate for spectrograph
camera
LANGLEY-55 B65-10086 01

Multiaxial analyzer detects low-energy
electrons
GSFC-329 B65-10213 01

Instrument accurately measures extremely low
air densities
M-FS-193 B65-10221 01

Communication system uses modulated laser beam
GSFC-377 B65-10333 01

Plastic scintillator converts standard
photomultiplier to ultraviolet range
ERC-9 B66-10108 02

Improved design provides faster response
time in photomultiplier
GSFC-451 B66-10526 01

Laser measuring system accurately locates
point coordinates on photograph

PHOTOVOLTAGES

ARG-74 B66-10560 02

Polarimeter provides transient response
in nanosecond range
JPL-890 B67-10021 02

Electron multiplier has improved
performance and stability
GSFC-546 B67-10060 01

Cleanroom air sampler counts, categorizes,
and records particle data
M-FS-2221 B67-10076 01

Special purpose reflectometer uses modified
ulbricht sphere
MSC-1135 B67-10109 02

Uranium isotopes quantitatively determined
by modified method of atomic absorption
spectrophotometry
ARG-210 B67-10236 03

Self-balancing line-reversal pyrometer
automatically measures gas temperatures
LEWIS-348 B67-10268 01

New electron microscope employs new video
display technique
ARG-158 B67-10312 03

Vibration analysis utilizing Mossbauer
effect
M-FS-11974 B67-10339 01

Control apparatus for spectral energy
source
LEWIS-391 B67-10404 01

Laser communication system is insensitive
to atmospherically induced noise
GSFC-10396 B67-10587 01

New camera tube improves ultrasonic
inspection system
ARG-90237 B68-10088 01

Improved electro-optical tracking system
M-FS-14791 B68-10311 01

Laser-Doppler gas-velocity instrument
M-FS-20039 B68-10349 02

System measures response time of
photomultiplier tubes
LEWIS-10437 B68-10382 01

Microscopes and computers combined for
analysis of chromosomes
ARG-10256 B69-10088 04

Direct measurement of carbon-14 in carbon
dioxide by liquid scintillation counting
ARG-10237 B69-10092 03

Dual-mode operation of a neutron source, a
concept
HQ-10106 B69-10248 02

The Quantasyn, an improved quantum
detector
ERC-10148 B69-10443 01

Improved pulse shape discriminator for fast
neutron-gamma ray detection system
HQ-10151 B69-10481 01

Multichannel spectroscopy guide
HQ-10441 B69-10550 01

Airborne Fraunhofer Line Discriminator
MSC-13146 B69-10594 02

Manganese-56 coincidence-counting facility
precisely measures neutron-source strength
ARG-90261 B69-10621 01

Image position sensor
M-FS-14101 B69-10783 02

PHOTON DENSITY
An improved soft X-ray photoionization
detector
GSFC-540 B67-10072 02

PHOTONS
Concept for improved vacuum pressure
measuring device
M-FS-20172 B69-10421 02

Ion mass spectrometer for special uses
HQ-10418 B69-10510 02

PHOTOSENSITIVITY
Modified developer increases line resolution
in photosensitive resist
GSFC-386 B65-10278 01

Selenium bond decreases ON resistance of
light-activated switch
JPL-SC-101 B65-10324 01

Vibration tests on vidicons made by improved
method
JPL-SC-115 B66-10042 01

New television camera eliminates vidicon tube
M-FS-472 B66-10112 01

Plotter design simplifies determination of
image sensor transfer characteristic
NPO-10164 B67-10206 01

Photosensitive filler minimizes internal
stresses in epoxy resins
M-FS-1880 B67-10227 03

Portable spectrometer monitors inert gas
shield in welding process
M-FS-12144 B67-10326 02

Gimbal angle sensor
GSFC-10305 B68-10315 01

System measures response time of
photomultiplier tubes
LEWIS-10437 B68-10382 01

PHOTOSTRESSES
Ultrasonics used to measure residual stress
M-FS-12449 B67-10428 02

PHOTOSYNTHESIS
Aggregation of metallochlorophylls -
Examination by spectroscopy
ARG-10273 B69-10163 04

PHOTOTRANSISTORS
Instrument accurately measures extremely low
air densities
M-FS-193 B65-10221 01

New television camera eliminates vidicon tube
M-FS-472 B66-10112 01

Electrically controlled optical latch and
switch requires less current
JPL-SC-111 B66-10414 01

Selective video blanking technique
M-FS-20013 B68-10434 01

An integrated circuit switch
NPO-11073 B69-10326 01

PHOTOTUBES
Analog device simulates physiological
waveforms
MSC-51 B64-10109 01

Servo system facilitates photoelastic strain
measurements on resins
JPL-504 B64-10280 01

Design concept for improved photo-scan tube
JPL-818 B67-10157 01

PHOTOVOLTAGES
New method used to fabricate gallium arsenide

PHOTOVOLTAIC CELLS

SUBJECT INDEX

PLASTICS

PLASMA TEMPERATURE

Microwave technique measures plasma characteristics
 LANGLEY-134 B65-10122 02

PLASMAS (PHYSICS)

Computer programs calculate potential and charge distributions in a plasma
 M-FS-871 B66-10553 01

Sensors measure surface ablation rate of reentry vehicle heat shield
 LANGLEY-287 B66-10592 01

Movable RF probe eliminates need for calibration in plasma accelerators
 LEWIS-10127 B67-10362 01

Potassium plasma cell facilitates thermionic energy conversion process
 ARG-10010 B67-10399 01

PLASTERS

Spray-on technique simplifies fabrication of complex thermal insulation blanket
 M-FS-497 B66-10053 03

Cork is used to make tooling patterns and molds
 MSC-425 B66-10328 01

PLASTIC COATINGS

Flexible magnetic planning boards are easily transported
 M-FS-340 B65-10219 05

Fogging technique used to coat magnesium with plastic
 LEWIS-10316 B67-10584 03

Sprayed shielding of plastic-encapsulated electronic modules
 M-FS-13570 B69-10607 01

PLASTIC DEFORMATION

New package for Belleville spring permits rate change, easy disassembly
 JPL-392 B63-10247 05

Plastic plus stainless-steel fibers make resilient, impermeable material
 WOO-246 B65-10374 03

Rubber-coated bellows improves vibration damping in vacuum lines
 LEWIS-273 B66-10187 02

Treatment increases stress-corrosion resistance of aluminum alloys
 M-FS-1840 B66-10595 05

Hydrodynamics of a new concept of primary containment by energy absorption
 ARG-10242 B69-10046 05

PLASTIC FLOW

Integral ribs formed in metal panels by cold-press extrusion
 M-FS-230 B65-10141 05

PLASTIC PROPERTIES

High strength, superplastic superalloy
 LEWIS-10805 B69-10293 03

PLASTIC TAPES

Calibrating ultrasonic test equipment for checking thin metal strip stock
 NUC-10009 B67-10127 01

Automated microorganism Sample Collection Module
 HQ-10421 B69-10223 04

Masking of aluminum surface against anodizing
 M-FS-12964 B69-10335 05

Helical recorder
 GSFC-10614 B69-10340 01

PLASTICIZERS

Mechanical properties of plastics predetermined by empirical method
 ARC-28 B64-10068 03

PLASTICS

Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application
 LANGLEY-6A B63-10318 03

Flexible honeycomb structure can bend to fit compound curves
 M-FS-13 B63-10385 05

Portable flooring protects finished surfaces, is easily moved
 M-FS-15 B63-10387 05

Variable-transparency wall regulates temperatures of structures
 LANGLEY-25 B63-10528 03

Connector for thermocouple leads saves costly wire, makes reliable connectors
 LANGLEY-26 B63-10529 01

A technique for making animal restraints
 ARC-25 B63-10564 05

Plastic molds reduce cost of encapsulating electric cable connectors
 M-FS-69 B63-10568 05

Front and back printed circuit layouts presented on single sheet
 GSFC-93 B63-10596 01

Cryogenic waveguide window is sealed with plastic foam
 JPL-559 B63-10613 01

Modified RF coaxial connector ends vacuum chamber wiring problem
 GSFC-150 B64-10010 01

Mechanical properties of plastics predetermined by empirical method
 ARC-28 B64-10068 03

Plastic films for reflective surfaces reproduced from masters
 GSFC-188 B64-10151 03

Gas diffusion cell removes carbon dioxide from occupied airtight enclosures
 MSC-118 B64-10319 03

Polychart contour plotter enables data extrapolation from multiple plotting charts
 M-FS-37 B64-10406 05

Illuminated display panel is easily changed
 MSC-108 B65-10003 05

Helical coaxial-resonator makes excellent RF filter
 GSFC-243 B65-10012 01

Optical arrangement increases useful light output of semiconductor diodes
 JPL-SC-064 B65-10020 05

Seismic transducer measures small horizontal displacements
 M-FS-81 B65-10029 05

Improved holder protects crystal during high acceleration and impact
 JPL-463 B65-10037 05

Thermistor connector assembly increases accuracy of measurements
 LANGLEY-62 B65-10045 01

Spherical model provides visual aid for cubic crystal study
 LEWIS-108 B65-10065 03

SUBJECT INDEX

POLYETHYLENES

POLONIUM ISOTOPES

Concentrations of the naturally occurring radionuclides Pb-210, Po-210, and Ra-226 in aquatic fauna
ARG-10345 B69-10258 02

POLYAMIDE RESINS

Adhesive for vacuum environments resists shock and vibration
MSC-56 B65-10016 03

Aluminum alloys protected against stress-corrosion cracking
M-FS-235 B65-10172 03

Improved poppet valve provides positive damageproof seal
M-FS-293 B65-10346 05

Buoyant stokes litter assembly used for sea rescue operations
MSC-131 B66-10019 05

Nylon shock absorber prevents injury to parachute jumpers
MSC-226 B66-10080 05

Nylon bit removes cork insulation without damage to substrate
MSC-381 B66-10152 05

Self-inflating lifevest stores in small package
MSC-5A B66-10184 04

Improved adhesive for cryogenic applications cures at room temperature
WOO-132 B66-10185 03

Sea dye marker provides visibility for 20 hours
MSC-714 B66-10313 03

Phonocardiograph microphone is rugged and moistureproof
MSC-212 B66-10314 04

Impact and puncture resistant material protects parts from damage
MSC-747 B66-10375 05

Adhesive for polyester films cures at room temperature, has high initial tack
M-FS-938 B66-10487 03

Synthesis of various highly halogenated monomers and polymers
M-FS-2143 B67-10100 03

Primary cell uses neither liquid nor fused electrolytes
NPO-10001 B67-10275 01

Quick-release hook-and-loop fastener
MSC-10950 B69-10388 05

POLYBENZIMIDAZOLE

Polymer film exhibits thermal and radiation stability
LANGLEY-100 B66-10043 03

POLYBUTADIENE

New class of thermosetting plastics has improved strength, thermal and chemical stability
LEWIS-10108 B67-10197 03

POLYCARBONATES

One-piece transparent shell improves design of helmet assembly
MSC-187 B66-10390 05

Thermocouple-flexible cable connector insulator is highly reliable
NU-0082 B66-10709 01

Synthesis of various highly halogenated monomers and polymers
M-FS-2143 B67-10100 03

POLYCRYSTALS

Cuprous selenide and sulfide form improved photovoltaic barriers
WOO-212 B66-10025 01

Grain-boundary migration in KCl bicrystals
ARG-10181 B68-10455 03

Analyses of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass velocity filters for neutrons
ARG-10220 B69-10211 02

Preferred-orientation analysis of polycrystalline materials
NPO-10604 B69-10336 02

POLYESTER RESINS

Modified filter prevents conduction of microwave signals along high-voltage power supply leads
JPL-63 B63-10091 01

Improved variable-reluctance transducer measures transient pressures
LANGLEY-10 B63-10321 01

Adhesive for polyester films cures at room temperature, has high initial tack
M-FS-938 B66-10487 03

Dispersion of borax in plastic is excellent fire-retardant heat insulator
ARG-5 B67-10016 03

Multi-feed cone for Cassegrainian antenna
ARG-10025 B67-10484 03

Thermal protective visor for entering high temperature areas
MSC-10285 B68-10277 05

Improved primer for bonding polyurethane adhesives to metals
M-FS-90591 B69-10540 03

POLYESTERS

Irradiation improves properties of an aromatic polyester
LANGLEY-115 B65-10164 03

High-temperature bearing lubricants
LEWIS-10408 B68-10249 05

A concept for magazine Bimat processor
KSC-06786 B69-10275 02

Quick-release hook-and-loop fastener
MSC-10950 B69-10388 05

POLYETHER RESINS

Organic reactants rapidly produce plastic foam
LANGLEY-37 B65-10288 03

Synthesis of polyethers of hexafluorobenzene and hexafluoropentanediol
M-FS-14962 B69-10636 03

POLYETHYLENE TEREPHTHALATE

Modified filter prevents conduction of microwave signals along high-voltage power supply leads
JPL-63 B63-10091 01

POLYETHYLENES

Inert-gas welding and brazing enclosure fabricated from sheet plastic
LEWIS-220 B65-10338 05

Primary cells utilize halogen-organic charge transfer complex
JPL-926 B66-10682 02

Trace hydrazines in aqueous solutions accurately determined by gas chromatography
MSC-11222 B67-10290 03

Vibration damping composition has flush-away feature

POWER TRANSMISSION

SUBJECT INDEX

POWER TRANSMISSION

Laser beam transmits electric power
GSFC-293 B65-10158 01

Compact actuator converts rotary to linear
motion
JPL-786 B66-10265 05

Flexible drive allows blind machining and
welding in hard-to-reach areas
MSC-524 B66-10428 05

Feasibility study of wireless power
transmission systems
M-FS-14691 B68-10309 01

PREAMPLIFIERS

Auxiliary circuit enables automatic monitoring
of BKG*S
MSC-106 B65-10142 01

Boron trifluoride nuclear detector
preamplifier uses single-cable connection
LEWIS-178 B65-10255 01

Electrometer preamplifier has drift correction
feedback
JPL-SC-074 B65-10267 01

Phonocardiograph system monitors heart sounds
MSC-185 B66-10154 04

Microphone multiplex system provides multiple
outlets from single source
GSFC-426 B66-10308 01

Remote preamplifier circuit maintains
stability over wide temperature range
WOO-278 B66-10432 01

Point-source light sensor circuit is
insensitive to background light
JPL-778 B66-10502 01

Miniature electrometer preamplifier
effectively compensates for input
capacitance
ARC-69 B66-10549 01

Current pulse amplifier transmits detector
signals with minimum distortion and
attenuation
NUC-10055 B67-10347 01

Improved relay optical element for
spectroradiometer using cryogenically
cooled detector
MSC-11688 B68-10245 02

Laser-Doppler gas-velocity instrument
M-FS-20039 B68-10349 02

Low-cost, fast-response drive circuit for
electromagnetic torque motors
LEWIS-10143 B68-10386 01

High resolution Ge/Li/ spectrometer
reduces rate-dependent distortions at high
counting rates
ARG-10144 B68-10420 01

PRECIPITATION
Crack detection method is safe in presence of
liquid oxygen
M-FS-236 B65-10107 03

PRECIPITATION (CHEMISTRY)
Standards for electron probe microanalysis of
silicates prepared by convenient method
GSFC-469 B66-10234 03

Process for preparing dispersions of
alkali metals
JPL-734 B66-10639 03

Ion exchange determines iodine-131
concentration in aqueous samples
ARG-208 B67-10129 04

Static electricity of polymers reduced by
treatment with iodine
NPO-10062 B67-10132 03

PRECIPITATION HARDENING

Tantalum alloys resist creep deformation at
elevated temperatures
LEWIS-350 B66-10558 03

Treatment increases stress-corrosion
resistance of aluminum alloys
M-FS-1840 B66-10595 05

Weld microfissuring in Inconel 718
minimized by minor elements
M-FS-18185 B68-10251 03

Strain-age cracking in Rene 41 alloy
M-FS-18650 B69-10605 03

PRECISION

Instrument quickly transposes ground reference
target to eye level
MSC-275 B66-10061 05

Threaded pilot insures cutting tool
alignment
M-FS-527 B66-10074 05

Etching process mills PH 14-8 Mo alloy
steel to precise tolerances
MSC-270 B66-10110 03

Depth indicator and stop aid machining to
precise tolerances
M-FS-553 B66-10149 05

Mount enables precision adjustment of
optical-instrumentation mirror
MSC-184 B66-10199 02

Parallel line raster eliminates ambiguities in
reading timing of pulses less than 500
microseconds apart
JPL-805 B66-10386 01

Heavy duty precision leveling jacks expedite
setup time on horizontal boring mill
M-FS-1084 B66-10411 05

Braking mechanism is self actuating and
bidirectional
M-FS-1299 B66-10484 05

Motion drive system is accurately controlled
in the 1-micron range
JPL-864 B66-10695 05

Micromanipulation tool is easily adapted to
many uses
JPL-129 B67-10004 05

Hydrogen maser as a highly stable frequency
reference
M-FS-2437 B67-10146 01

Traveling wire electrode increases
productivity of Electrical Discharge
Machining /EDM/ equipment
ARG-136 B67-10238 05

Standard surface grinder for precision
machining of thin-wall tubing
ARG-10014 B67-10400 05

Precision metal molding
M-FS-13305 B67-10423 05

Automatic transducer switching provides
accurate wide range measurement of pressure
differential
NUC-10001 B67-10540 01

Precision trimmer aids in preparing
biomedical specimen blocks for ultrathin
sectioning
ARG-242 B67-10541 05

Modified sine bar device measures small

PROTUBERANCES
Experimental program to investigate transonic flow around protuberances
M-FS-20027 B69-10609 05

PROXIMITY
Remote control thermal actuator
LEWIS-10873 B69-10307 01

PSEUDONOISE
Improved circuit minimizes generation time of pseudonoise check bits
JPL-698 B65-10275 01

PN acquisition demodulator achieves automatic synchronization of a telemetry channel
JPL-612 B66-10271 01

Interference effects eliminated in random oriented space station antenna system
MSC-11004 B67-10435 01

Acquisition of pseudonoise signals by sequential estimation
M-FS-13898 B68-10258 01

Communication system features dual mode range acquisition plus time delay measurement
M-FS-14323 B68-10306 01

Combination ranging system and mapping radar
NPO-11001 B69-10325 01

PSYCHOPHYSIOLOGY
Improved electrode paste provides reliable measurement of galvanic skin response
MSC-146 B66-10049 04

PSYCHROMETERS
Tool for reading psychrometric charts
KSC-10358 B69-10527 05

SUBJECT INDEX

PULLEYS
Chain friction system gives positive, reversible drive
ARC-8 B63-10009 05

Rapid billet loader aids extrusion of refractory metals
LEWIS-50 B63-10354 05

Quick-acting clutch disengages idle drive motor
GSFC-143 B64-10028 05

Apparatus alters position of objects to facilitate demagnetization
GSFC-234 B64-10277 05

Mechanism continuously measures static and dynamic cable loads
MSC-217 B66-10107 05

Carriage system remotely moves drawer over extended distance
NU-0092 B66-10711 05

Space-saving hoist for tank manholes
M-FS-16508 B69-10180 05

Automatic leveling and equalizing hoist device
M-FS-16549 B69-10514 05

PULLING
Spring loaded beaded cable makes efficient wire puller
WOO-108 B65-10031 05

Fastener provides for bolt misalignment and quick release of flange
NU-0074 B66-10275 05

Indium adhesion provides quantitative measure of surface cleanliness
SAN-10024 B68-10342 01

PULSE AMPLITUDE
Pulse height analyzer operates at high repetition rates, low power
WOO-046 B65-10041 01

Simple device produces accelerometer calibration pulse
M-FS-363 B65-10269 01

Threshold detector produces narrow pulses at high repetition rates
GSFC-383 B65-10310 01

Instrument performs nondestructive chemical analysis, data can be telemetered
JPL-SC-078 B65-10317 01

Circuit provides accurate four-quadrant multiplication
WOO-272 B66-10331 02

Single channel pulse-height analyzer operates in subnanosecond range
LEWIS-267 B66-10377 01

Simple, one transistor circuit boosts pulse amplitude
GSFC-501 B66-10480 01

Pulse stretcher has improved dynamic range and linearity
ARG-82 B66-10509 01

Correlation established between heat transfer and ultrasonic transmission properties of copper braze bonds
ARG-247 B67-10037 02

Solid-state time-to-pulse-height converter developed
ARG-170 B67-10053 01

Modified univibrator compensates for output timing errors

Ceramic materials purified by experimental			Antenna configurations provide polarization diversity GSPC-74	B66-10066	01

PYRIDINES

SUBJECT INDEX

PYRIDINES

Separation of traces of metal ions from sodium matrices
ARG-10341 B69-10168 03

PYRITES

Colloidal suspension simulates linear dynamic pressure profile
WOO-266 B66-10214 05

PYROHYDROLYSIS

Fluid-bed fluoride volatility process recovers uranium from spent uranium alloy fuels
ARG-232 B67-10032 03

PYROLYSIS

Nitrogen dioxide produced by self-sustained pyrolysis of nitrous oxide
LANGLEY-32 B65-10074 05

Impurity diffusion process for silicon semiconductors is fast and precise
GSFC-397 B65-10300 01

Welding, bonding, and sealing of refractory metals by vapor deposition
LEWIS-123 B67-10232 03

Analytical technique characterizes all trace contaminants in water
MSC-11032 B67-10243 03

Fire retardant foams developed to suppress fuel fires
ARC-10098 B68-10358 03

Basal-plane metallography of deformed pyrolytic carbon
NPO-11196 B69-10488 03

PYROMETERS

Nulling pyrometer uses Kerr cell shutter for fast responses
NU-0010 B65-10050 01

Internal cooling increases range of immersion-type temperature probe
LEWIS-171 B65-10157 02

A radiometer-pyrometer
LEWIS-284 B66-10606 01

Self-balancing line-reversal pyrometer automatically measures gas temperatures
LEWIS-348 B67-10268 01

Detection of effect of deposits on optical windows of pyrometer measurements
LEWIS-10366 B68-10367 01

PYROPHORIC MATERIALS

Study made of Raney nickel technology
M-PS-2054 B67-10208 03

Steel test panel helps control additives in pyrophosphate copper plating
LEWIS-10101 B67-10358 05

Isothermal drop calorimeter provides measurements for alpha active, pyrophoric materials
ARG-10186 B69-10002 02

PYROTECHNICS

Electrically heated diaphragm eliminates use of pyrotechnics
MSC-241 B65-10400 01

Improved system measures output energy of pyrotechnic devices
WOO-256 B66-10159 01

High speed blowdown system provides rapid pressure loss
LEWIS-375 B67-10043 05

Explosive-train initiated through solid bulkhead by pressure cartridge

MSC-11395 B67-10589 03

Pyrotechnic device provides one-shot heat source
LEWIS-10131 B68-10062 03

Pyrotechnic-actuated cable release
INP-10849 B68-10535 05

Q

Q FACTORS

RF inductor has high Q, is stable at higher temperatures
JPL-1019 B67-10106 01

System precisely controls oscillation of vibrating mass
M-PS-1875 B67-10276 01

Apparatus makes klystron operating frequency adjustable from remote point
NPO-09831 B67-10514 01

Active rc networks of low sensitivity for integrated circuit transfer function
ARC-10146 B68-10210 01

RF noise suppression using the photodiode effect in semiconductors
MSC-12259 B69-10225 01

Automatic tuning of hydrogen masers
GSFC-10127 B69-10452 01

Q SWITCHED LASERS

Fluorescent photography of spray droplets using a laser light source
LEWIS-10777 B69-10122 02

Laser microprobe facility used in the elemental analysis of small feature of a sample
ARG-10359 B69-10165 02

Q VALUES

Composite filter steepens rejection slopes in microwave application
GSFC-480 B66-10393 01

Dielectrometer design permits measurement in vacuum under irradiation
M-PS-359 B66-10401 01

QUADRATIC EQUATIONS

A theoretical model for determining turbine flowmeter sensitivity
M-PS-1172 B67-10179 01

Determination of quadric equation coefficients describing three-dimensional surfaces, their constraint and skewed planes, and view point areas
M-PS-15043 B69-10435 06

QUADRATURES

Light-controlled resistors provide quadrature signal rejection for high-gain servo systems
WSO-340 B67-10552 01

Combination ranging system and mapping radar
NPO-11001 B69-10325 01

QUADRUPOLES

Ion mass spectrometer for special uses
HQ-10418 B69-10510 02

QUALITATIVE ANALYSIS

Apparatus enables accurate determination of alkali oxides in alkali metals
LEWIS-256 B66-10296 03

Simple, nondestructive test identifies metals
MSC-525 B66-10305 03

Study made of application of stereoscopic display system to analog computer simulation

SUBJECT INDEX

RADIANT FLUX DENSITY

Aerodynamic forces of fluttering cylindrical and/or planar structures
M-FS-20497 B69-10781 02

QUATERNARY ALLOYS
Braze alloy holds bonding strength over wide temperature range
LEWIS-337 B66-10519 03

QUENCHING
Recent development in organic scintillators
ARG-10344 B69-10198 03

Measurements of thermoelectric power in annealed and quenched gold-platinum alloys
ARG-10303 B69-10206 03

QUENCHING (COOLING)
New sintering process adjusts magnetic value of ferrite cores
GSFC-129 B63-10606 01

Heat treatment study of aluminum casting alloy M45
M-FS-2397 B67-10159 03

Development of technology for hot-drape forming of large torus sections
M-FS-12141 B67-10341 05

Magnesium-lithium alloys developed for low temperature use
M-FS-1541 B67-10365 03

Levitation-melting technique for metals and alloys
ARG-10240 B69-10006 03

Direct measurement of carbon-14 in carbon dioxide by liquid scintillation counting
ARG-10237 B69-10092 03

QUEUEING THEORY
Queueing register uses fluid logic elements
M-FS-317 B66-10100 05

R

RACKS (FRAMES)
Modular chassis simplifies packaging and interconnecting of circuit boards
JPL-236A B63-10174 01

Electronic assembly rack panels snap on and off
GSFC-59 B64-10121 05

Floating device aligns blind connections
MSC-256 B66-10007 05

RACKS (GEARS)
Special pliers connect hose containing liquid under pressure
JPL-IT-1003 B63-10291 05

RADAR ANTENNAS
Structural thermal-control coatings
NPO-10785 B68-10553 03

RADAR APPROACH CONTROL
FM/CW system measures aircraft attitude
M-FS-276 B65-10290 01

RADAR EQUIPMENT
Circuit converts AM signals to FM for magnetic recording
GSFC-227 B65-10001 01

RADAR MAPS
Combination ranging system and mapping radar
NPO-11001 B69-10325 01

RADAR MEASUREMENT
Study made of application of stereoscopic display system to analog computer simulation
M-FS-1263 B66-10590 01

RADAR TRACKING
Shock absorber protects motive components against overloads
WOO-092 B65-10008 05

Thermal conductivity and dielectric constant of silicate materials
M-FS-14856 B68-10351 03

RADAR TRANSMITTERS
FM/CW system measures aircraft attitude
M-FS-276 B65-10290 01

RADIAL DISTRIBUTION
Radial coolant channels fabricated by simplified method
NU-0070 B66-10267 05

Radial furnace shows promise for growing straight boron carbide whiskers
HQ-50 B67-10070 03

A method of determining combustion gas flow
M-FS-13757 B67-10455 03

Computer programs for axial flow compressor design
LEWIS-10765 B69-10174 06

RADIAL FLOW
Modified gas bearing is adjustable to optimum stiffness ratio
M-FS-145 B64-10050 05

Segmented, arch-bound carbon seal is pressure loaded
M-FS-12777 B67-10325 05

Resilient bearing supports are gas controlled
LEWIS-10109 B67-10364 05

Dynamics of moving bubbles in single and binary component systems
M-FS-14845 B68-10339 02

Radial inflow turbine design charts
LEWIS-10720 B68-10567 05

Geometry and design point performance of axial flow turbines
LEWIS-10471 B69-10111 06

Computer programs for axial flow compressor design
LEWIS-10765 B69-10174 06

Computer program for off-design performance of radial inflow turbines
LEWIS-10764 B69-10267 06

RADIANT COOLING
Graphite cloth facilitates vacuum evaporation of silicon monoxide
M-FS-14764 B68-10256 03

RADIANT FLUX DENSITY
Ion chambers simplify absolute intensity measurements in the vacuum ultraviolet
ERC-10 B66-10439 01

Fast-acting calorimeter measures heat output of plasma gun accelerator
LEWIS-388 B67-10192 01

Foil radiometer accessory improves measurements

Thermal radiation shields for piping in vacuum environments
 LEWIS-10899 B69-10262 03

Technique for predicting temperature distribution in gases
 LEWIS-10918 B69-10329 01

RADIATION
 Indium foil with beryllia washer improves transistor heat dissipation
 GSFC-42 B63-10033 01

Wide-angle sensor measures radiant heat energy in corrosive atmospheres
 M-FS-228 B65-10019 05

Improved atomic resonance gas cell for use in frequency standards
 MSC-11666 B68-10230 01

Analysis of annular combustors
 LEWIS-10399 B68-10356 06

The response of monoenergetic gamma rays in finite media are investigated
 ARG-10295 B69-10080 02

Silicon carbide diode for increased light output
 M-FS-20063 B69-10096 01

Optically induced free carrier light modulator
 GSFC-10216 B69-10114 01

Production of metals and compounds by radiation chemistry
 LEWIS-10231 B69-10123 03

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voight line profile
 ARC-10221 B69-10232 06

Deposition monitor and control
 NPO-10706 B69-10722 01

RADIATION ABSORPTION
 Reference black body is compact, convenient to use
 ARC-3 B63-10004 03

Flange on microwave antenna subreflector cuts ground noise
 JPL-362 B63-10229 01

Variable-transparency wall regulates temperatures of structures
 LANGLEY-25 B63-10528 03

Lamp enables measurement of oxygen concentration in presence of water vapor
 MSC-10043 B67-10387 01

Coolants with selective optical filtering characteristics for ruby laser applications
 M-FS-20188 B68-10508 02

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voight line profile
 ARC-10221 B69-10232 06

RADIATION BELTS
 Radiation tolerant silicon nitride insulated gate field effect transistors
 GSFC-10581 B69-10253 01

RADIATION COUNTERS
 Multiaxial analyzer detects low-energy electrons
 GSFC-329 B65-10213 01

Boron trifluoride nuclear detector preamplifier uses single-cable connection
 LEWIS-178 B65-10255 01

Aluminized thin-window proportional-counter tube is stronger, more responsive in long wavelength region
 JPL-689 B67-10015 01

Ion exchange determines iodine-131 concentration in aqueous samples
 ARG-208 B67-10129 04

Radiation counting technique allows density measurement of metals in high-pressure/high-temperature environment
 ARG-124 B67-10316 02

Compilation of detection sensitivities in thermal-neutron activation
 ARG-10068 B67-10641 03

Four pi-reccl proportional counter used as neutron spectrometer
 ARG-10101 B68-10326 02

Fast framing cameras provide high-speed multi-channel data recording
 ARG-10252 B69-10102 02

Ion mass spectrometer for special uses
 HQ-10418 B69-10510 02

Conditioning of pulses from aerosol-particle detectors
 ERC-10250 B69-10691 01

RADIATION DAMAGE
 Aluminum doping improves silicon solar cells
 LEWIS-206 B66-10181 02

Simplified method introduces drift fields into cells
 GSFC-572 B67-10102 03

RADIATION DETECTORS
 Radiation-detector optical-imaging device is of simplified construction
 GSFC-251 B64-10299 01

Polaroid film helps locate objects in
inaccessible areas quickly
MSC-960 B67-10008 02

Detection of entrapped moisture in
honeycomb sandwich structures
MSC-1103 B67-10116 01

Improved television signal processing system
NPO-10140 B67-10246 01

Thermal neutron image intensifier tube
provides brightly visible radiographic
pattern
ARG-120 B67-10296 02

Method prevents secondary radiation in
radiographic inspection
M-FS-13383 B67-10391 02

Effect of preparation procedures on
intensity of radioautographic labeling is
studied
ARG-10032 B67-10500 04

Mechanized X-ray inspection system for
large tanks
M-FS-12867 B67-10564 02

Evaluation of methods for nondestructive
testing of brazed joints
ARG-90175 B68-10191 03

X-ray film holder permits single
continuous picture of tubing joint
LEWIS-10382 B68-10343 05

Improved radiographic image amplifier panel
M-FS-14522 B68-10363 02

Nondestructive testing of brazed rocket
engine components
M-FS-18191 B68-10394 03

Shortened processing time technique for
color industrial radiography
ARG-10235 B69-10001 02

Radiographic threshold detection levels of
aluminum weld defects
M-FS-20487 B69-10418 01

Use of medical and dental X-ray equipment
for nondestructive testing
MSC-13389 B69-10553 01

Direct determination of lead-210 by
liquid-scintillation counting
ARG-10462 B69-10611 03

Effects of high-pressure hydrogen on
storage vessel materials
M-FS-18605 B69-10730 03

RADIOLOGY

Radon gas, useful for medical purposes,
safely fixed in quartz
ARG-2 B66-10468 04

N-SAP and G-SAP neutron and gamma ray
albedo model scatter shield analysis program
NUC-10126 B67-10536 06

Live-timer method of automatic dead-time
correction for precision counting

RANGE (EXTREMES)

SUBJECT INDEX

RANGE (EXTREMES)

T-handle wrench has torque-limiting action
MSC-280 B66-10065 05

Hand drill adapter limits holes to desired
depth
MSC-346 B66-10123 05

Depth indicator and stop aid machining to
precise tolerances
M-FS-553 B66-10149 05

SiC/Si diode trigger circuit provides
automatic range switching for log amplifier
M-FS-1879 B67-10314 01

Method for reducing snap in magnetic
amplifiers
LEWIS-10388 B68-10388 01

Health hazards of ultrafine metal and metal
oxide powders
LEWIS-10878 B69-10268 04

Determination of permissible applied load
stress in structural elements
M-FS-16556 B69-10823 02

RANGEFINDING

Communication system features dual mode
range acquisition plus time delay
measurement
M-FS-14323 B68-10306 01

Combination ranging system and mapping
radar
NPO-11001 B69-10325 01

RANGER PROJECT

Solid state detectors monitor relay contacts
JPL-785 B66-10396 01

RANKINE CYCLE

Pump simulator provides variable
pressure-flow characteristics
LEWIS-10122 B67-10453 05

Magnetohydrodynamic generators using
two-phase liquid-metal flows
ARG-10168 B69-10162 01

Channel-wall limitations in the
magnetohydrodynamic induction generator
ARG-10128 B69-10255 02

RARE EARTH ALLOYS

Traveling wire electrode increases
productivity of Electrical Discharge
Machining /EDM/ equipment
ARG-136 B67-10238 05

RARE EARTH COMPOUNDS

Improved carbon electrode reduces arc
sputtering
MSC-219 B66-10026 01

RARE EARTH ELEMENTS

Crystal structure analysis of intermetallic
compounds
ARG-10092 B68-10198 03

Transplutonium elements processed from
rock debris of underground detonations
ARG-10222 B69-10054 03

Optically exciting a magnetic memory - A
feasibility study
M-FS-14854 B69-10060 02

Separation of traces of metal ions from
sodium matrices
ARG-10341 B69-10168 03

Separation of the rare earths by
anion-exchange in the presence of lactic
acid
ARG-10436 B69-10377 03

Dielectric materials for use in thin-film

capacitors
M-FS-20471 B69-10387 02

RARE GASES

Novel clamps align large rocket cases,
eliminate back-up bars
M-FS-1 B63-10376 05

Hot-air soldering technique prevents
overheating of electrical components
GSFC-91 B63-10536 01

Welding procedures improves quality of welds,
offers other advantages
M-FS-32 B64-10309 01

Inert gas spraying device aids in repair of
hazardous systems
LEWIS-8B B65-10115 05

Double gloves reduce contamination of dry box
atmosphere
LEWIS-211 B65-10117 03

Thermoelectric elements diffusion-bonded to
tungsten electrodes
GSFC-346 B65-10309 01

Refractory metals welded or brazed with
tungsten inert gas equipment
LEWIS-219 B65-10319 05

Improved tool easily removes brazed tube
connectors
MSC-263 B66-10003 05

Protective coating withstands high temperature
in oxidizing atmosphere
M-FS-529 B66-10044 03

Hydrogen-atmosphere induction furnace has
increased temperature range
LEWIS-153 B66-10055 05

Cryostat modified to aid rotating beam fatigue
test
M-FS-435 B66-10083 03

Solid-film lubricant is effective at high
temperatures in vacuum
LEWIS-228 B66-10087 03

Tool provides constant purge during tube
welding
M-FS-547 B66-10093 05

Highly sensitive solids mass spectrometer
uses inert-gas ion source
ERC-11 B66-10114 02

Aluminum oxide filler prevents obstructions
in tubing during welding
MSC-222 B66-10125 05

Simple device facilitates inert-gas welding
of tubes
M-FS-558 B66-10155 05

Brazing process using Al-Si filler alloy
reliably bonds aluminum parts
MSC-448 B66-10241 05

Differential expansion provides pressure for
diffusion bonding of large diameter rings
M-FS-588 B66-10269 05

Ion chambers simplify absolute intensity
measurements in the vacuum ultraviolet
ERC-10 B66-10439 01

Xenon forms stable compound with fluorine
ARG-4 B66-10467 03

Complex surfaces plated by thin-film
deposition in one operation
LEWIS-292 B67-10006 05

Portable spectrometer monitors inert gas
shield in welding process

Precise doping of metals by small gas flows
LEWIS-10444 B68-10526 03

Refractory-metal compound impregnation of
polytetrafluoroethylene
LEWIS-10733 B69-10072 03

Cold machining of high density tungsten
and other materials
ARG-10289 B69-10110 05

Improved method of producing
oxide-dispersion-strengthened alloys
HQ-10461 B69-10536 03

REFRIGERATING

New nut and sleeve improve flared connections
M-FS-194 B65-10180 05

High-pressure, low temperature electrical
connector makes no-leak seal
MSC-276 B66-10079 02

Improved cryogenic refrigeration system
JPL-731 B67-10128 02

Development of dual solid cryogenics for
high reliability refrigeration system
GSFC-10188 B67-10644 02

Cold machining of high density tungsten
and other materials
ARG-10289 B69-10110 05

Tools made of ice facilitate forming of
soft, sticky materials
KSC-10262 B69-10199 05

Report on a cryogenic gyroscope
NPO-11200 B69-10504 02

REGENERATION

Chemical regeneration of emitter surface
increases thermionic diode life
LEWIS-17 B66-10435 02

REGENERATIVE COOLING

New method used to fabricate light-weight heat
exchanger for rocket motor
LEWIS-43 B63-10346 02

REGENERATIVE FUEL CELLS

Regenerative fuel cell combines high
efficiency with low cost
WOO-090 B65-10363 01

Iron serves as diffusion barrier in
thermally regenerative galvanic cell
ARG-29 B67-10189 03

REGENERATORS

Hybrid circuit achieves pulse regeneration
with low power drain
GSFC-382 B65-10314 01

REGISTERS

Pneumotachometer counts respiration rate of
human subject
MSC-92 B64-10259 01

Foot-operated cell-counter
ARG-10315 B69-10351 01

REGISTERS (COMPUTERS)

System monitors discrete computer inputs
M-FS-1021 B66-10389 01

Nixie tube display unit employs time-shared
logic
ARG-117 B66-10512 01

Digital system detects binary code patterns
containing errors
GSFC-541 B66-10516 01

Polynomial manipulator AP-168
MSC-1231 B67-10103 01

A conceptual, parallel operating data
compression processor
NPO-10068 B67-10204 01

Run numbering system for use with data
recorders
M-FS-2557 B67-10215 01

Low cost SCH lamp driver indicates contents
of digital computer registers
GSFC-10221 B67-10656 01

Circuitry selectively limits data
storage in general purpose computer
GSFC-10605 B69-10121 01

Novel multipurpose timer for laboratories
ARG-10147 B69-10410 01

Simplified, reliable circuit sorts binary
numbers in order of magnitude
NPO-10112 B69-10503 01

REGRESSION COEFFICIENTS

Multiple correlation computer program
determines relationships between several
independent and dependent variables
M-FS-13024 B67-10327 06

REGULATORS

Zener diode is starter for transistor
regulated power supply
NU-0015 B65-10052 01

Load current sensor for a pulse width
modulator power regulator
GSFC-10656 B69-10578 01

REINFORCED PLASTICS

Fiber glass reinforced structural materials
for aerospace application
M-FS-14806 B68-10360 03

New rapid-curing, stable polyimide
polymers with high-temperature strength
and thermal stability
LEWIS-10576 B69-10118 03

REINFORCEMENT (STRUCTURES)

Reinforcement core facilitates O-ring
installation
WOO-228 B65-10378 05

REINFORCING FIBERS

SUBJECT INDEX

Resilient clamp holds fuel cell stack through resilient clamp holds fuel cell stack through thermal cycle MSC-313	B66-10035	05	nonequilibrium performance program MSC-11780	B68-10376	06
Lightweight, all-metal hose assembly has high flexibility and strength over wide range of temperature and pressure M-FS-1831	B66-10635	05	RELAY		
Pipe joints reinforced in place with fitted aluminum sleeves MSC-11109	B67-10271	05	Circuit switches latching relay in response to signals of different polarity W00-055	B63-10508	01
Method for reinforcing tubing joints MSC-11108	B68-10115	05	Pulse generator permits nondestructive testing of component breakdown voltage MSC-122	B65-10054	01
REINFORCING FIBERS			Trisphere spark gap actuates overvoltage relay ARC-68	B66-10557	01
Boron carbide whiskers produced by vapor deposition HQ-24	B65-10261	03	Instrument sequentially samples ac signals from several accelerometers JPL-884	B67-10029	01
Composite gaskets are compatible with liquid oxygen, resist compression set M-FS-455	B66-10395	03	Improved relay optical element for spectroradiometer using cryogenically cooled detector MSC-11688	B68-10245	02
Tungsten fiber-reinforced copper composites form high strength electrical conductors LEWIS-338	B66-10572	03	RELEASING		
Nonwoven glass fiber mat reinforces polyurethane adhesive M-FS-2309	B67-10113	03	Simple mechanism combines positive locking and quick-release features W00-4	B63-10420	05
Tungsten fiber-reinforced nickel superalloy LEWIS-10424	B68-10369	03	Instrument adjustment knob locks to prevent accidental maladjustment M-FS-190	B64-10249	05
Boron fiber-reinforced aluminum alloy tubing /experimental/ MSC-15633	B69-10509	05	Cylindrical claw clamp has quick release feature M-FS-513	B66-10213	05
REJECTION			Fastener provides for bolt misalignment and quick release of flange NU-0074	B66-10275	05
Simple circuit provides reliable multiple signal average and reject capability NU-0069	B66-10282	01	Pneumatic separator gives quick release to heavy loads KSC-66-10	B66-10294	05
Composite filter steepens rejection slopes in microwave application GSFC-480	B66-10393	01	Flexible fastener effects airtight material closure JPL-684	B66-10304	05
Solid state circuit averages multiple signals and rejects those varying significantly from the average NUC-10066	B67-10262	01	Sea dye marker provides visibility for 20 hours MSC-714	B66-10313	03
RELATIONSHIPS			Controlled release device prevents damage from dynamic stresses KSC-66-14	B66-10628	05
Theory of a refined earth model M-FS-14679	B68-10228	02	Lock-disconnect mechanism gives positive release to joined bodies M-FS-2147	B67-10123	05
RELAXATION (MECHANICS)			Pyrotechnic-actuated cable release XNP-10849	B68-10535	05
Temperature-controlled resistor NPO-10713	B69-10440	01	RELIABILITY		
RELAXATION METHOD (MATHEMATICS)			Tool facilitates sealing of metal fill tubes MSC-24	B63-10519	05
FORTRAN 4 program calculates velocities and streamlines in a tandem blade turbomachine LEWIS-10743	B69-10219	06	Liquid switch is remotely operated by low dc voltage GSFC-119	B63-10599	01
RELAXATION OSCILLATORS			Compact coaxial connector for printed circuit adds reliability MSC-57	B64-10016	01
Unijunction frequency divider is free of backward loading JPL-W00-010	B65-10112	01	Logic redundancy improves digital system reliability JPL-SC-069	B65-10025	01
High-intensity flashing beacon powered by mercury cells LANGLEY-80	B65-10361	01	Improved holder protects crystal during high acceleration and impact JPL-463	B65-10037	05
Circuit exhibits power efficiency greater than 75 percent MSC-254	B66-10034	01	Solid-state laser transmitter is amplitude modulated MSC-121	B65-10238	01
RELAXATION TIME					
One-dimensional reacting gas nonequilibrium performance program MSC-11777	B68-10375	06			
One-dimensional two-phase reacting gas					

SUBJECT INDEX

REMOTE CONTROL

Triple Modular Redundancy /TMR/ computer operation improved MSC-831	B67-10085	01	ERC-10198	B68-10541	01
Automatic channel switching device MSC-832	B67-10086	01	Calibrated water tank facilitates proof-loading of cranes and derricks M-FS-15059	B69-10109	05
Application of a truncated normal failure distribution in reliability testing M-FS-14328	B68-10179	02	Design and sparing techniques to meet specified performance life HQ-10200	B69-10528	02
Temperature or pressure controller LEWIS-10297	B68-10337	01	Estimating reliability by application of matrix representation HQ-10246	B69-10793	02
Continuous analysis of nitrogen dioxide in gas streams of plants ARG-10356	B69-10254	03	RELIEF VALVES Sensitive low-pressure relief valve has positive seating against leakage WOO-041	B64-10278	05
On the bound of first excursion probability NPO-11158	B69-10334	06	One-shot valve may be remotely actuated WOO-195	B65-10266	05
Exact minimal-state system reliability analysis M-FS-16551	B69-10409	06	Dual regulator controls two gases from a single reference MSC-227	B66-10167	05
Punch-magnet delay eliminated by modification of circuit ARG-10333	B69-10416	01	Control system maintains compartment at constant temperature JPL-SC-145	B66-10188	05
Synchronizing redundant power oscillators XGS-09377	B69-10546	01	Expandable rubber plug seals openings for pressure testing NU-0048	B66-10229	05
System for computing operational probability equations M-FS-16410	B69-10566	06	Automatic cryogenic liquid level controller is safe for use near combustible substances LEWIS-195	B66-10482	01
Control for maintaining constant level of a cryogenic liquid NPO-11177	B69-10573	05	Check valve installation in pilot operated relief valve prevents reverse pressurization M-FS-1925	B66-10655	05
Programmed schedule holds for improving launch vehicle holds M-FS-14502	B69-10602	03	Improved cryogenic refrigeration system JPL-731	B67-10128	02
Microelectronic device data handbook ERC-10322	B69-10687	01	Aspirator increases relief valve poppet stroke HQ-77	B67-10154	05
Improved solenoid valve design GSFC-10607	B69-10704	05	Dynamic valve seal is reliable at cryogenic temperatures M-FS-12987	B67-10526	05
Optimum structural design based on reliability and proof-load testing NPO-11228	B69-10723	31	Vent and relief valve maintains low leakage rate over broad temperature range M-FS-12807	B68-10014	05
RELIABILITY ENGINEERING Composite, vacuum-jacketed tubing replaces bellows in cryogenic systems LEWIS-67	B63-10368	05	Device damps fluid pressure oscillations in vent valve M-FS-1329C	B68-10078	05
Assembly jig assures reliable solar cell modules GSFC-455	B66-10040	05	Proposed gas generation assembly would recover deeply submerged objects SAN-10007	B68-10211	05
One-piece transparent shell improves design of helmet assembly MSC-187	B66-10390	05	Dual rate pressure relief valve MSC-11606	B68-10237	05
Design reliability goal developed from small sample M-FS-403	B66-10405	05	Integral valve provides automatic relief and remote venting M-FS-12134	B69-10545	05
Fixture tests bellows reliability through repetitive pressure/temperature cycling MSC-1176	B67-10111	01	RELOCATION Remote control thermal actuator LEWIS-10873	B69-10307	01
Effects of heat input rates on T-1 and T-1A steel welds M-FS-2475	B67-10163	03	RELUCTANCE Noncontacting transducer measures shaft torque M-FS-474	B66-10048	01
Analytical technique permits comparison of reliability of alternate mechanical designs NUC-10065	B67-10261	06	Variable reluctance switch avoids contact corrosion and contact bounce MSC-1178	B67-10137	01
Electronic component reliability analysis by data reduction system NPO-10243	B68-10507	05	REMOTE CONTROL Solenoid permits remote control of stop watch and assures restarting FRC-17	B63-10024	01
Failure rates for accelerated acceptance testing of silicon transistors					

REMOTE HANDLING

SUBJECT INDEX

Simple mechanism combines positive locking and quick-release features WOO-4	B63-10420	05	Reconnect mechanism M-FS-12968	B67-10670	05
Device calibrates vibration transducer at amplitudes up to 20 g M-FS-86	B63-10572	01	Portable, high intensity isotopic neutron source provides increased experimental accuracy ARG-90250	B68-10243	02
Liquid switch is remotely operated by low dc voltage GSFC-119	B63-10599	01	Remotely operated gripper provides vertical control rod movement ARG-10160	B68-10359	05
Knob linkage permits one-hand control of several operations MSC-30	B65-10022	05	Improved electromechanical master-slave manipulator ARG-10027	B68-10372	05
Flow control valve is independent of pressure drop JPL-WOO-039	B65-10121	05	Pyrotechnic-actuated cable release XNP-10849	B68-10535	05
Collapsible truss structure is automatically expandable GSFC-265	B65-10126	05	Welding skate with computerized controls M-FS-20224	B68-10566	01
Quick-disconnect coupling safe transfer of hazardous fluids LEWIS-125	B65-10202	01	Remotely-actuated biomedical switch ARC-10105	B69-10117	01
Electromechanical flowmeter accurately monitors fluid flow GSFC-357	B65-10273	01	Remote balance weighs accurately amid high radiation ARG-10387	B69-10242	05
Remote control electrical switching system has 1000-output capability M-FS-380	B65-10318	01	Remote control thermal actuator LEWIS-10873	B69-10307	01
Respiratory transfer valve has fail-safe feature ARC-1	B65-10369	01	Separation simulator KSC-67-15	B69-10315	01
Threaded split ring connector separates structural sections LANGLEY-145	B65-10383	05	Piezoelectric linear actuator MSC-13194	B69-10469	02
Economical and maintenance-free gas system operates railroad switches NU-0045	B66-10124	05	Stereo TV enhancement study M-FS-14805	B69-10497	01
Electric arc heater is self starting LANGLEY-208	B66-10230	03	Integral valve provides automatic relief and remote venting M-FS-12134	B69-10545	05
Quick-closing valve is actuated by explosive discharge ARC-55	B66-10233	05	Versatile telemonitoring system ARG-10339	B69-10655	01
Remotely controlled system couples and decouples large diameter pipes NU-0062	B66-10276	05	Burn-rate testing apparatus MSC-10947	B69-10740	03
Latching mechanism operates in limited access area MSC-230	B66-10338	05	REMOTE HANDLING		
Junction connectors permit strategic placement of television cameras KSC-66-22	B66-10391	01	Remotely operated clamping tool has positive grip NU-0020	B65-10254	05
Remote preamplifier circuit maintains stability over wide temperature range WOO-278	B66-10432	01	Plug-in connector socket accepts coaxial cable end ARG-9	B66-10478	01
Carriage system remotely moves drawer over extended distance NU-0092	B66-10711	05	Remotely installed pipe plug provides effective seal in hazardous environment NUC-10303	B68-10053	05
Remotely operated high pressure valve protects test personnel MSC-11010	B67-10291	05	Random access-random release relay switching matrix M-FS-12590	B68-10301	01
Improved head-controlled TV system produces high-quality remote image ARG-128	B67-10317	01	REMOTE SENSORS		
Welding torch and wire feed manipulator M-FS-13102	B67-10385	05	One-shot valve may be remotely actuated WOO-195	B65-10266	05
Apparatus makes klystron operating frequency adjustable from remote point NFO-09831	B67-10514	01	Special mount improves remote transducer accuracy LEWIS-269	B66-10021	01
			Seismometer designed for remote operation in random orientation JPL-320	B66-10085	01
			Study made of far infrared spectra of silicate minerals M-FS-1811	B67-10075	02
			Closed circuit TV system monitors welding operations MSC-11002	B67-10162	01

SUBJECT INDEX

RESEARCH

REMOVAL

Electronic assembly rack panels snap on and off
GSFC-59 B64-10121 05

Reaction heat used in static water removal from fuel cells
M-FS-532 B66-10013 01

Mounting facilitates removal and installation of flame-detector rods
M-FS-555 B66-10150 05

Tool permits damage-free removal of solar cell
GSFC-467 B66-10219 05

Expandable takeup reel facilitates paper tape removal
WOO-271 B66-10399 05

Single wrench separates nuts from free-floating bolts
NUC-10013 B67-10158 05

Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel
NUC-10047 B67-10194 03

Multiple-mask chemical etching
MSC-13114 B69-10221 01

A method for precision anodize stripping
MSC-15040 B69-10581 03

Liquid oxygen-compatible insulation system
M-FS-16113 B69-10599 03

RENDEZVOUS

Earth orbit rendezvous evaluation program
M-FS-13016 B67-10407 06

RENDEZVOUS GUIDANCE

Occulting-filter method for obtaining flashing-light visibility data
MSC-13097 B69-10107 02

An interferometer tracking radar system
MSC-10956 B69-10523 01

RENDEZVOUS TRAJECTORIES

Fortran 4 program for two-impulse rendezvous analysis
M-FS-13971 B67-10479 06

RENE 41

Composite weld rod corrects individual filler weaknesses
M-FS-1923 B67-10107 05

Heat treatment procedure to increase ductility of degraded nickel alloy
M-FS-12410 B68-10029 03

Pre-weld heat treatment improves welds in Rene 41
M-FS-18174 B68-10285 03

Strain-age cracking in Rene 41 alloy
M-FS-18650 B69-10605 03

REPEATERS

Pulsed plasma accelerator operates repetitively without complex controls
LANGLEY-48 B65-10062 01

Improved first order interpolator
MSC-11085 B69-10291 02

REPETITION

Transistorized Marx bank pulse circuit provides voltage multiplication with nanosecond rise-time
ARG-10110 B68-10328 01

REPLACING

Mounting facilitates removal and installation of flame-detector rods
M-FS-555 B66-10150 05

Performance statistics of the FORTRAN 4 /H/ library for the IBM system/360
ARG-10299 B69-10157 06

REPORTS

Review of research and development in fluid logic elements
M-FS-420 B67-10438 01

JPKWIC - General key word in context and subject index report generator
NPO-10589 B68-10208 06

Daughter growth in freshly separated Ra-226, Ac-227 and U-232
ARG-10226 B69-10003 02

Corrosion reduction of aluminum alloys in flowing high-temperature water
ARG-10244 B69-10029 03

Weight Control System
M-FS-15028 B69-10041 06

Study of fluoride corrosion of nickel alloys
ARG-10224 B69-10048 03

Investigation of spacecraft coatings
M-FS-20458 B69-10181 06

REPRESENTATIONS

Dot patterns provide reproducible flaw areas for study of adhesive bonds
M-FS-862 B66-10367 05

Computer program samples digital data for CRT display
MSC-999 B67-10249 01

REPRODUCTION

Study of radiation effects on mammalian cells in vitro
ARG-10191 B68-10294 02

REPRODUCTION (COPYING)

Front and back printed circuit layouts presented on single sheet
GSFC-93 B63-10596 01

Plastic films for reflective surfaces reproduced from masters
GSFC-188 B64-10151 03

PCM magnetic tape system efficiently records and reproduces data
GSFC-375 B65-10311 01

Modified procedure speeds camera copy layout for offset printing
GSFC-424 B65-10373 02

Improved compression molding process
LANGLEY-10027 B67-10302 03

Shortened procedure for obtaining reproducible copies of 35 mm color slides
KSC-09957 B68-10560 02

Segmented SiGe-PbTe couples
GSFC-10746 B69-10233 01

REQUIREMENTS

Probabilistic approach to long range planning of manpower
MSC-11524 B67-10510 06

RESCUE OPERATIONS

Buoyant stokes litter assembly used for sea rescue operations
MSC-131 B66-10019 05

Miniature oxygen resuscitator
KSC-10398 B69-10319 04

RESEARCH

Multiple correlation computer program determines relationships between several independent and dependent variables
M-FS-13024 B67-10327 06

RESEARCH FACILITIES

SUBJECT INDEX

Review of research and development in fluid logic elements M-FS-420	B67-10438	01	radio transmitter, receiver MSC-53	B64-10015	05
Method for determining properties of microinstabilities of a magnetized plasma HQ-10447	B69-10462	02	Plastic plus stainless-steel fibers make resilient, impermeable material WOO-246	B65-10374	03
RESEARCH FACILITIES			Thermoplastic rubberlike material produced at low cost JPL-793	B66-10453	03
Hydrogen safety manual LEWIS-10487	B68-10323	01	Silazane elastomer remains resilient at 400 deg C M-FS-1144	B66-10667	05
Purification and characterization of two fully deuterated enzymes ARG-10314	B69-10207	04	Resilient bearing supports are gas controlled LEWIS-10109	B67-10364	05
RESEARCH PROJECTS			Fiber glass prevents cracking of polyurethane foam insulation on cryogenic vessels M-FS-20058	B68-10406	02
Built-in templates speed up process for making accurate models LANGLEY-23	B63-10526	05	Pressure transducer NFO-10853	B69-10364	01
Microelectronic device data handbook ERC-10322	B69-10687	01	Precisely repeatable rotary mechanism NFO-10679	B69-10696	05
RESERVOIRS			RESIN BONDING		
Dynamic-reservoir lubricating device M-FS-14652	B68-10261	05	Insulation for cryogenic tanks has reduced thickness and weight M-FS-326	B66-10183	02
RESIDUAL GAS			Improved adhesive for cryogenic applications cures at room temperature WOO-132	B66-10185	03
Auxiliary titanium sublimation pump produces ultrahigh /10 to the minus 11 torr/ vacuum LANGLEY-212	B66-10388	02	Coating permits use of strain gage in water and liquid hydrogen M-FS-594	B66-10192	01
RESIDUAL STRESS			Dry film lubricant is effective at extreme loads M-FS-628	B66-10256	03
Glass bead shot peening retards stress corrosion failure of titanium tanks LANGLEY-319	B67-10198	05	A new method for fabrication of flexible vacuum purge jackets M-FS-12646	B69-10564	03
Photosensitive filler minimizes internal stresses in epoxy resins M-FS-1880	B67-10227	03	RESINS		
Improved compression molding process LANGLEY-10027	B67-10302	03	Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application LANGLEY-6A	B63-10318	03
Stabilizing stainless steel components for cryogenic service M-FS-13127	B67-10377	05	Servo system facilitates photoelastic strain measurements on resins JPL-504	B64-10280	01
Machining heavy plastic sections M-FS-12720	B67-10381	03	Fiber glass parts cured during filament winding eliminates oven, saves time M-FS-14	B65-10088	03
Ultrasonics used to measure residual stress M-FS-12449	B67-10428	02	Compact assembly generates plastic foam, inflates flotation bag LANGLEY-96	B65-10090	05
Electrochemical cell has internal resistive heater element GSPC-10358	B68-10325	01	Polymer film exhibits thermal and radiation stability LANGLEY-100	B66-10043	03
Nondestructive method for measuring residual stresses in metals, a concept KSC-10237	B68-10378	03	Self-supported aluminum thin films produced by vacuum deposition process ARC-58	B66-10387	03
Techniques for controlling warpage and residual stresses in welded structures M-FS-20307	B69-10086	05	Reusable chelating resins concentrate metal ions from highly dilute solutions JPL-758	B66-10451	03
RESIDUES			Transducer measures embedment stresses in electronic modules M-FS-13486	B67-10367	01
Solvent residue content measured by light scattering technique M-FS-850	B66-10320	01	Flowmeter determines mix ratio for viscous adhesives M-FS-2308	B67-10378	01
Film coating permits low-force scribing MSC-990	B66-10609	03			
Xenon fluoride solutions effective as fluorinating agents ARG-217	B67-10133	03			
Wear studies made of slip rings and gas bearing components M-FS-12882	B67-10403	05			
Apparatus automatically measures soluble residue content of volatile solvents SAN-10032	B69-10292	03			
RESILIENCE					
Comfortable, lightweight safety helmet holds					

SUBJECT INDEX

RESISTORS

High-temperature bearing lubricants LEWIS-10408	B68-10249	05	Flow-test device fits into restricted access passages MSC-1078	B67-10074	01
Spiral-flow apparatus for measuring permeation of solids by gases M-FS-16517	B69-10357	03	Viscosity and density of methanol/water mixtures at low temperatures M-FS-14991	B68-10274	03
Separation of the rare earths by anion-exchange in the presence of lactic acid ARG-10436	B69-10377	03	Calibration of a resistance thermometer down to 0.04 degrees K ARG-10318	B69-10149	01

SCATTERING CROSS SECTIONS

SCALING

Subroutines GEORGE and DRASTC simplify operation of automatic digital plotter
 NUC-10044 B67-10222 06

Locating and sealing air leaks in multiroomed buildings
 NUC-10304 B68-10024 05

High-energy, high-power, long-life battery
 LEWIS-10724 B69-10131 01

SCALING LAWS

Experimental scaling study of fluid amplifier elements
 M-FS-1882 B67-10088 02

SCANNERS

Multiple port pressure scanner valve features greater accuracy, quicker data
 JPL-555 B64-10031 05

Distant objects detected visually with optical filters
 LANGLEY-166 B65-10252 02

Ultrasonic recording scanner used for nondestructive weld inspection
 M-FS-284 B66-10220 01

Ultrasonic hand tool allows convenient scanning of spot welds
 M-FS-539 B66-10289 02

Instrument calculates moments of inertia of complex plane figures
 MSC-628 B66-10306 01

Photoelectric scanner makes detailed work function maps of metal surface
 JPL-SC-176 B66-10440 01

Thermionic scanner pinpoints work function of emitter surfaces
 JPL-SC-177 B66-10444 01

Electrical continuity scanner facilitates identification of wires for soldering to connectors
 MSC-626 B66-10605 01

Motion drive system is accurately controlled in the 1-micron range
 JPL-864 B66-10695 05

Instrument sequentially samples ac signals from several accelerometers
 JPL-884 B67-10029 01

High impact pressure regulator withstands impacts of over 15,000 g
 NFO-10175 B67-10274 01

New electron microscope employs new video display technique
 ARG-158 B67-10312 03

Electronic test instrument generates extremely small current signals
 ARG-276 B67-10318 01

Computer program utilizes FORTRAN 4 subroutines for contour plotting
 NFO-10127 B67-10323 06

Braze joint quality tested electromagnetically
 M-FS-12795 B67-10333 01

Development of mechanized ultrasonic scanning system
 M-FS-13638 B68-10004 05

Circuit enhances vertical resolution in raster scanning systems
 MSC-12123 B68-10121 01

Improved electro-optical tracking system
 M-FS-14791 B68-10311 01

System for measuring spatial distribution of ejected droplets, a concept
 NFO-10185 B68-10402 01

Microscopes and computers combined for analysis of chromosomes
 ARG-10256 B69-10088 04

Ring laser angle encoder
 MSC-13099 B69-10115 01

Surface irregularities detected by flare inspection instrument
 M-FS-20157 B69-10152 01

Multipurpose binocular scanning apparatus
 NFO-11002 B69-10311 02

Phase multiplying electronic scanning array
 NFO-10302 B69-10381 01

SCANNING

An improved method for testing performance of vidicons during vibration
 JPL-SC-113 B66-10442 01

Scan rate converter for tape recording and playback of TV pictures
 NFO-10166 B67-10676 01

Closed circuit TV system automatically guides welding arc
 M-FS-20084 B68-10357 01

Determination of the absolute contours of optical flats
 ARG-10352 B69-10209 05

A thirty-six element array antenna system
 M-FS-20435 B69-10390 01

Technique for pinpointing submicron particles in the electron microprobe
 HQ-10043 B69-10465 01

Electrooptical scanning of film
 NFO-11106 B69-10568 01

Flexible high-voltage supply for experimental electron microscope
 ARG-10482 B69-10603 01

System converts slow-scan to standard fast-scan TV signals
 MSC-90534 B69-10748 01

SCARFING

Study made to establish parameters and limitations of explosive welding
 M-FS-13006 B67-10393 05

SCATTERING

Instrument performs nondestructive chemical analysis, data can be telemetered
 JPL-SC-078 B65-10317 01

Method prevents secondary radiation in radiographic inspection
 M-FS-13383 B67-10391 02

Thick transducers used for generating short-duration stress pulses in thin specimens
 ARG-10232 B69-10045 01

SCATTERING CROSS SECTIONS

Calculation of resonance neutron absorption in two-region problems /the GAROL code/
 NUC-10045 B67-10223 06

Quantum mechanical calculations of reactive scattering cross sections in bimolecular encounters
 M-FS-13594 B67-10527 03

Compilation of detection sensitivities in thermal-neutron activation
 ARG-10068 B67-10641 03

SCAVENGING

SUBJECT INDEX

Computer program /P1-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a monatomic gas NUC-10141	B67-10678	06	New electron microscope employs new video display technique ARG-158	B67-10312	03

ARG-10222 B69-10054 03

Improved mouse cage provides versatility and ease in handling laboratory mice
MSC-12250 B69-10124 04

Separation of traces of metal ions from sodium matrices
ARG-10341 B69-10168 03

Improved nickel plating of Inconel X-750
M-FS-18604 B69-10463 05

SEPARATORS

Centrifugal device separates liquid from gas
MSC-282 B65-10394 05

Automatic fluid separator supplies own driving power
WOO-085 B66-10008 02

Combustion chamber inlet manifold separates vapor from liquid
M-FS-531 B66-10052 05

Pneumatic separator gives quick release to heavy loads
KSC-66-10 B66-10294 05

Hydrostatic testing of porous assemblies
M-FS-18298 B68-10439 05

Separator for alkaline batteries
GSFC-10173 B68-10557 03

Frangible electrochemical cell and sealing technique
XGS-10010 B69-10056 01

Improved anode design for metal-oxygen cells
LEWIS-10871 B69-10318 01

Study of high-speed angular-contact ball

bearings under dynamic load
M-FS-20562 B69-10367 05

Device separates hydrogen from solution in water at ambient temperatures
MSC-13335 B69-10635 03

SEPTUM

Self-sealing closure enables access to several fluid containers
NPO-10123 B67-10207 04

SEQUENCING

Fluid logic control circuit operates nutator actuator motor
LEWIS-294 B66-10593 05

Monitoring system determines amplitude and time of vibration channel peaks
JPL-879 B66-10699 01

Multiplexing control device enables handling of wide variations in sampling rates
M-FS-1871 B67-10150 01

Computer program offers new method for constructing periodic orbits in nonlinear dynamical systems
M-FS-14654 B68-10217 06

Parallel-to-serial biphasic-data converter
MSC-11600 B68-10241 01

Acquisition of pseudonoise signals by sequential estimation
M-FS-13898 B68-10258 01

Simultaneous message framing and error detection
MSC-12001 B68-10330 01

SEQUENTIAL ANALYSIS

Binary sequence detector uses minimum number of decision elements
JPL-673 B66-10264 01

Study of optimum discrete estimators in measurement analysis
M-FS-14915 B68-10348 02

Simple quasi-exponential slope generator
NPO-11130 B69-10439 01

SEQUENTIAL COMPUTERS

Concept for simplified serial digital decoder
NPO-10150 B68-10045 06

SEQUENTIAL CONTROL

Ring counter may be advanced or retarded by command signal
GSFC-101 B64-10144 01

Analog-to-digital converter has increased reliability and reduced power consumption
GSFC-246 B65-10194 01

Current steering commutator offers versatility
JPL-812 B67-10410 01

SERIES (MATHEMATICS)

Function generator eliminates necessity of series summation
GSFC-214 B66-10351 01

General series solution technique for bending of irregular laterally loaded flat plates
NUC-10170 B69-10035 06

SERUMS

Rapid and precise analysis for calcium in blood serum
ARG-10246 B69-10160 04

SERVICE LIFE

Lamp automatically switches to new filament on burnout

SUBJECT INDEX

SHIELDING

SHEAR STRENGTH

Modified power tool rapidly drives series torque bolts
MSC-221 B66-10054 05

Improved adhesive for cryogenic applications cures at room temperature
WOO-132 B66-10185 03

Synthesis of pure aromatic glycidyl esters for use as adhesives
M-FS-12705 B67-10647 03

Buckling strength of filament-wound cylinders under axial compression is investigated
HQ-10032 B67-10659 03

SHEAR STRESS

Splice plate design assures structural separation by mild explosive
MSC-137 B65-10166 05

Stress calculator speedily converts strain data
M-FS-2021 B67-10182 03

Computer program for determination of natural frequencies of closed spherical sandwich shells
MSC-1246 B67-10279 06

SHEARING

Plugged hollow shaft makes fatigue-resistant shear pin
LANGLEY-195 B66-10077 05

SHEARS

Versatile impact hand tool
M-FS-20140 B68-10371 05

Battery case shear
GSFC-10783 B69-10127 05

SHEATHS

Metal sheath improves thermocouple using graphite in one leg
NU-0011 B65-10051 01

Metal boot permits fabrication of hermetically sealed splices in metal sheathed instrumentation cables
NU-0083 B66-10704 05

Glass formulation has high coefficient of thermal expansion
NU-0084 B66-10705 03

Thermocouple-flexible cable connector insulator is highly reliable
NU-0082 B66-10709 01

Double copper sheath multiconductor instrumentation cable is durable and easily installed in high thermal or nuclear radiation area
NUC-10007 B67-10538 01

Thoriated tungsten tube provides improved high temperature thermocouple sheath
NUC-10145 B67-10627 03

Design concept for nonarcing electrical connector
M-FS-14937 B68-10404 01

Refractory oxide insulated thermocouple designed and analyzed for high temperature applications
ARG-10202 B69-10053 03

Glass fabric fire barrier for silicone rubber parts
MSC-15555 B69-10629 03

SHEETS

Machine tests crease durability of sheet materials
JPL-604 B64-10178 05

Teflon sheet permits valve and valve operator to move as a single unit in a cryogenic pipe line
NU-0077 B66-10702 05

SHELL STABILITY

Static structural analysis of shell-type structures
MSC-11555 B68-10066 03

Computer program analyzes Buckling Of Shells Of Revolution with various wall construction, BOSOR
LANGLEY-10290 B68-10226 06

Buckling Of Shells Of Revolution /BOSOR/ with various wall constructions
LANGLEY-10441 B69-10300 06

SHELL THEORY

Analysis of stability-critical orthotropic cylinders subjected to axial compression
M-FS-12869 B67-10375 03

Buckling strength of filament-wound cylinders under axial compression is investigated
HQ-10032 B67-10659 03

SHELLS (STRUCTURAL FORMS)

A technique for making animal restraints
ARC-25 B63-10564 05

Fiberglass container shells form contamination-free storage units
WOO-275 B66-10217 05

Improved sample capsule for determination of oxygen in hemolyzed blood
MSC-11017 B67-10408 04

Mass loading effects on vibrated ring and shell structures
M-FS-14979 B68-10532 03

Shell design computer program
LEWIS-10734 B69-10175 06

SHELTERS

Storage-stable foamable polyurethane is activated by heat
LANGLEY-187 B66-10111 03

SHIELDING

Small foamed polystyrene shield protects low-frequency microphones from wind noise
M-FS-123 B63-10579 01

Temperature-sensitive network drives astable multivibrator
GSFC-137 B63-10609 01

Cutter and stripper reduces coaxial cable connection time
ARC-40 B65-10094 05

Spherical electrode eliminates high-voltage breakdown
LEWIS-155 B65-10139 01

Superconductor shields test chamber from ambient magnetic fields
JPL-627 B65-10297 02

Titanium diaphragm makes excellent amplitron cathode support
GSFC-394 B65-10298 01

Calorimeter accurately measures thermal radiation energy
LANGLEY-173 B66-10058 02

Logic circuitry used to automatically test shielded cables
HQ-60 B66-10659 01

Portable spectrometer monitors inert gas shield in welding process
M-FS-12144 B67-10326 02

SHIFT REGISTERS

SIGNAL MEASUREMENT

SUBJECT INDEX

Electronic test instrument generates extremely small current signals ARG-276	B67-10318	01
Signal generator converts direct current to multiphase supplies MSC-11043	B67-10368	01
Circuit automatically calibrates flowmeter against liquid-level gage reference M-FS-2194	B67-10376	01
Ultrasonics used to measure residual stress M-FS-12449	B67-10428	02
Digital voltage-controlled oscillator GSFC-512	B67-10449	01
Hydraulic servo system increases accuracy in fatigue testing LANGLEY-217	B67-10637	01
Reflectometer for receiver input system NPO-10843	B67-10657	01
Technique increases storage capacity in camera tube target MSC-11599	B68-10213	01
Harmonic distortion analyzer speeds setup of magnetic tape recorders GSFC-10198	B68-10254	01
Acquisition of pseudonoise signals by sequential estimation M-FS-13898	B68-10258	01
High-speed camera synchronization M-FS-18062	B68-10282	02
Dynamic linearity measurement technique KSC-10186	B68-10290	01
A 35 GHz solid state transmitter/driver M-FS-20152	B68-10545	01
Technique for tuning antenna systems producing negligible signal radiation KSC-10060	B69-10215	01
Optimum FM pre-emphasis KSC-10151	B69-10359	01
Automatic frequency control of voltage-controlled oscillators NPO-11064	B69-10569	01
SIGNAL MEASUREMENT		
Range recording technique enables four-way polarization measurements M-FS-12447	B67-10460	01
SIGNAL MIXING		
Linear signal noise summer accurately determines and controls S/N ratio JPL-SC-152	B66-10433	01
Electronic frequency discriminator M-FS-2434	B67-10151	01
Voltage regulator/amplifier is self-regulated MSC-1240	B67-10156	01
Solid state phase detector replaces bulky transformer circuit MSC-11007	B67-10253	01
Interference effects eliminated in random oriented space station antenna system MSC-11004	B67-10435	01
Improved communication system for large operations center M-FS-15016	B68-10529	01
Long range holographic contour mapping concept HQ-10350	B69-10700	02
SIGNAL PROCESSING		
System proportions fluid-flow in response to demand signals GSFC-457	B66-10094	01
Phonocardiograph system monitors heart sounds MSC-185	B66-10154	04
Exclusive-or logic circuit has useful properties LANGLEY-214	B66-10272	01
Ultrasonic emission method enables testing of adhesive bonds M-FS-799	B66-10341	01
Hydrogen fire detection system features sharp discrimination M-FS-643	B66-10368	01
Feedback loop compensates for rectifier nonlinearity M-FS-384	B66-10382	01
Video signal processing system uses gated current mode switches to perform high speed multiplication and digital-to-analog conversion MSC-781	B66-10429	01
Single-sideband modulator accurately reproduces phase information in 2-Mc signals M-FS-664	B66-10437	01
Photocell shadowing technique improves light source detector JPL-809	B66-10564	01
Monitoring system determines amplitude and time of vibration channel peaks JPL-879	B66-10699	01
Recording and time expansion technique for high-speed, single-shot transient video signal ARC-10003	B67-10139	01
Automated urinalysis technique determines concentration of creatine and creatinine by colorimetry NPO-10149	B67-10245	04
Improved television signal processing system NPO-10140	B67-10246	01
Limit circuit prevents overdriving of operational amplifier NUC-10082	B67-10343	01
Stable ac phase and amplitude comparator M-FS-13086	B67-10459	01
Video synchronization processor overcomes poor signal-to-noise ratio KSC-10002	B67-10515	01
Circuit measures hysteresis loop areas at 30 Hz M-FS-13069	B67-10519	01
Damages in rolling element bearings may be detected early HQ-10031	B67-10658	01
Portable Pulse Code Modulation /PCM/ MSC-11369	B68-10106	01
Analysis and design of a class-D amplifier M-FS-14803	B68-10313	01
Analysis of magnetically-controlled processes in pulse-modulation systems GSFC-10241	B69-10070	01
Bootstrap unloader INP-09768	B69-10120	01
Remote balance weighs accurately amid high radiation

SINE WAVES

Metal diaphragm used to calibrate miniature transducers
M-FS-207 B65-10059 01

Field effect transistor presents high input impedance in ac amplifier
JPL-500 B65-10232 01

Pressure transducers dynamically tested with sinusoidal pressure generator
LEWIS-268 B66-10031 01

Circuit operates as sine function generator
MSC-255 B66-10038 01

Feedback loop compensates for rectifier nonlinearity
M-FS-384 B66-10382 01

Edge-type connectors evaluated by electrical noise measurement
M-FS-2243 B67-10125 01

A modal combination computer program for dynamic analysis of structures
NPO-10129 B67-10217 06

Glow discharge density sensor probe life is extended
M-FS-1707 B67-10229 01

System precisely controls oscillation of vibrating mass
M-FS-1875 B67-10276 01

Improved circuit for measuring capacitive and inductive reactances
M-FS-13083 B67-10513 01

Circuit measures hysteresis loop areas at 30 Hz
M-FS-13069 B67-10519 01

Analysis of dynamic systems with DAP4H computer program
M-FS-13999 B67-10523 06

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093 B67-10531 06

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers
NUC-10024 B67-10664 05

Vibration testing and dynamic studies of relays
M-FS-14542 B68-10268 01

Modified sine bar device measures small angles with high accuracy
GSFC-438 B68-10322 02

Flow angle sensor and readout system
LEWIS-90298 B69-10050 01

An unconventional magnetically-coupled multivibrator
HQ-10226 B69-10480 01

Conditioning of pulses from aerosol-particle detectors
ERC-10250 B69-10691 01

SINGLE CRYSTALS

Single-crystal semiconductor films grown on foreign substrates
WOO-076 B66-10225 01

Indium adhesion provides quantitative measure of surface cleanliness
SAN-10024 B68-10342 01

Improved method of dicing integrated circuit wafers into chips
ERC-10138 B69-10441 01

SINGLE SIDEBAND TRANSMISSION

Single-sideband modulator accurately reproduces phase information in 2-Mc signals
M-FS-664 B66-10437 01

SINKING

Wall-thickness changes predicted in hollow-drawn tubing
ARG-10425 B69-10428 02

SINKS

Circuit detects errors in address currents for magnetic core arrays
M-FS-234 B65-10047 01

Improved compression molding process
LANGLEY-10027 B67-10302 03

SINTERING

Improved molybdenum disulfide-silver motor brushes have extended life
M-FS-64 B63-10479 03

New sintering process adjusts magnetic value of ferrite cores
GSFC-129 B63-10606 01

Electron beam seals outer surfaces of porous bodies
M-FS-562 B66-10033 03

Process reduces pore diameters to produce superior filters
WCO-093 B66-10037 03

Fibers of newly developed refractory ceramics produced by improved process
WOO-169 B66-10196 03

Fiber length and orientation prevent migration in fluid filters
M-FS-541 B66-10319 05

Concept for passive system to control gas flow independently of temperature
M-FS-982 B66-10343 05

Combustion chamber struts can be effectively transpiration cooled
M-FS-1830 B66-10643 03

Porous mandrels provide uniform deformation in hydrostatic powder metallurgy
M-FS-1972 B67-10209 03

Fuel cell life improved by metallic sinter activation after electrode assembly
MSC-10965 B67-10436 03

Electron beam selectively seals porous metal filters
LEWIS-10162 B68-10331 05

Grain growth inhibitor for porous tungsten materials
LEWIS-10535 B68-10527 03

Method for controlling density and permeability of sintered powdered metals
LEWIS-10393 B68-10528 03

Sintering characteristics and properties of PuS and PuP are determined
ARG-10228 B69-10058 03

Electrochemical sintering process for producing electrodes from cadmium felt and a nickel or silver grid
GSFC-10764 B69-10227 05

Improved high-temperature silicide coatings
LEWIS-10817 B69-10266 03

Improved inorganic ion exchange membranes
LEWIS-10737 B69-10451 03

Improved retort for cleaning metal powders

SUBJECT INDEX

SPRAYED COATINGS

MSC-15185	B69-10061	03	SPOT WELDS		
Technique for abrasive cutting of thick-film conductors for hybrid circuits			Welded pressure transducer made as small as 1/8th-inch in diameter		
MSC-13242	B69-10235	03	ARC-11	B63-10429	03
SPIRAL WRAPPING			Insulated weld tooling permits uniform, high quality weld		
Spiral heater coils hand-formed with fixture			MSC-42	B64-10058	05
LEWIS-208	B65-10192	05	Welding procedures improves quality of welds, offers other advantages		
SPIRALS			M-FS-32	B64-10309	01
High frequency wide-band transformer uses coax to achieve high turn ratio and flat response			Insulator-holder protects transistors in dense electronic assemblies		
ARG-107	B66-10600	01	MSC-214	B65-10389	01
Spiral-grooved shaft seals substantially reduce leakage and wear			Spray-on technique simplifies fabrication of complex thermal insulation blanket		
LEWIS-10397	B68-10270	05	M-FS-497	B66-10053	03
SPLICING			Shoulder adapter steadies spot welding gun		
Splice plate design assures structural separation by mild explosive			M-FS-321	B66-10076	05
MSC-137	B65-10166	05	Ultrasonic hand tool allows convenient scanning of spot welds		
Metal boot permits fabrication of hermetically sealed splices in metal sheathed instrumentation cables			M-FS-539	B66-10289	02
NU-0083	B66-10704	05	Quality control criteria for acceptance testing of cross-wire welds		
SPLINE FUNCTIONS			MSC-627	B66-10587	05
Indexing device ensures proper mating of electrical connectors			Power arc welder touch-started with consumable electrode		
MSC-155	B65-10263	01	M-FS-1485	B66-10641	05
SPLINES			Micromanipulation tool is easily adapted to many uses		
New coupling compensates for shaft misalignment			JPL-129	B67-10004	05
NU-0013	B65-10077	05	Metal flame spray coating protects electrical cables in extreme environment		
Flexible coiled spline securely joins mating cylinders			NUC-10077	B67-10351	03
WOO-270	B66-10172	05	Miniature pressure transducer for stressed member application		
SPONGES (MATERIALS)			MSC-11869	B68-10246	01
Two systems developed for purifying inert atmospheres			Cooled miniature pressure transducers effective at high temperatures		
ARG-10234	B69-10026	03	LEWIS-10401	B68-10370	01
SPONTANEOUS COMBUSTION			SPRAY NOZZLES		
Evaluation of ignition mechanisms in selected nonmetallic materials			Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application		
MSC-11645	B68-10167	03	LANGLEY-6A	B63-10318	03
Saran film is fire-retardant in oxygen atmosphere			Vapor condensation process produces slurry of magnesium particles in liquid hydrocarbons		
MSC-11604	B68-10177	03	LEWIS-263	B66-10104	03
SPOOLS			Dispenser leak-tests and sterilizes rubber gloves		
Flow control valve is independent of pressure drop			MSC-285	B66-10166	03
JPL-WOO-039	B65-10121	05	Miniature paint-spray gun for recessed areas		
Pneumatic shutoff and time-delay valve operates at controlled rate			MSC-13060	B68-10387	05
M-FS-602	B66-10189	05	SPRAYED COATINGS		
Rotary valve controls multiple hydraulic leveling cylinders			Gate valve with ceramic-coated base operates at high temperatures		
M-FS-361	B66-10402	05	ARC-23	B63-10562	03
Remotely operated high pressure valve protects test personnel			Copper-acrylic enamel serves as lubricant for cold drawing of refractory metals		
MSC-11010	B67-10291	05	ARG-54	B66-10471	05
Technique for measuring magnetic tape interlayer adhesion			Miniature paint-spray gun for recessed areas		
NFO-10011	B67-10417	03	MSC-13060	B68-10387	05
Tape reading fixture			Renewal of corrosion protection of coated aluminum after welding		
M-FS-14146	B69-10008	05	M-FS-20361	B69-10150	05
Geometry and design point performance of axial flow turbines			Improved primer for bonding polyurethane adhesives to metals		
LEWIS-10471	B69-10111	06			
A concept for magazine Bimat processor					
KSC-06786	B69-10275	02			

SPRAYERS

SUBJECT INDEX

M-FS-90591	B69-10540	03	expandable GSFC-265	B65-10126	05
SPRAYERS			Coiled spring makes self-locking device for threaded fasteners	MSC-149	B65-10135 05
Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application	LANGLEY-6A	B63-10318 03	Bidirectional torque filter eliminates backlash	GSFC-335	B65-10148 05
Lead oxide ceramic makes excellent high-temperature lubricant	LEWIS-144	B64-10116 03	Extendible column can be stowed on drum	JPL-686	B65-10191 05
Inert gas spraying device aids in repair of hazardous systems	LEWIS-8B	B65-10115 05	Spiral heater coils hand-formed with fixture	LEWIS-208	B65-10192 05
Multilayer refractory nozzles produced by plasma-spray process	WOO-318	B66-10611 05	Fluid check valve has fail-safe feature	JPL-0019	B65-10207 05
Spray-on electrodes enable EKG monitoring of physically active subjects	PRC-36	B66-10649 04	Simple device produces accelerometer calibration pulse	M-FS-363	B65-10269 01
Scribble coating for plastic films	MSC-11194	B67-10409 03	Coiled sheet metal strip opens into tubular configuration	GSFC-425	B66-10009 03
System for measuring spatial distribution of ejected droplets, a concept	NPO-10185	B68-10402 01	Lamp automatically switches to new filament on burnout	M-FS-498	B66-10046 01
Single-element coaxial injector for rocket fuel	NPO-11095	B69-10547 05	Bench vise adapter grips tubing securely and safely	MSC-279	B66-10056 05
Modified cryogenic storage tank subsystem	KSC-10380	B69-10556 02	Calibrated clamp facilitates pressure application	MSC-298	B66-10059 05
SPRAYING			T-handle wrench has torque-limiting action	MSC-280	B66-10065 05
Spray-on technique simplifies fabrication of complex thermal insulation blanket	M-FS-497	B66-10053 03	Fingertip current control facilitates use of arc welding gun	MSC-289	B66-10092 05
Dispenser leak-tests and sterilizes rubber gloves	MSC-285	B66-10166 03	Soldering tool heats workpieces and applies solder in one operation	LEWIS-247	B66-10115 05
Standards for electron probe microanalysis of silicates prepared by convenient method	GSFC-469	B66-10234 03	Mounting improves heat-sink contact with beryllia washer	MSC-194	B66-10144 01
Sprayable birefringent coating enables strain measurements on large surfaces	M-FS-1484	B66-10578 03	Portable power tool machines weld joints in field	M-FS-258	B66-10145 05
Liquid oxygen dicting cleaned by falling film method	M-FS-11816	B67-10299 03	Fixture aids soldering of electronic components on circuit board	ARC-56	B66-10162 01
Acid spray technique mills aluminum alloy materials without immersion	M-FS-12500	B67-10463 03	Pneumatic shutoff and time-delay valve operates at controlled rate	M-FS-602	B66-10189 05
Fire retardant foams developed to suppress fuel fires	ARC-10098	B68-10358 03	Bellows design features low spring rate and long life	MSC-521	B66-10190 05
High-emittance coatings on metal substrates	LEWIS-10325	B68-10381 03	Torque wrench allows readings from inaccessible locations	M-FS-598	B66-10204 05
SPREADING			Cylindrical claw clamp has quick release feature	M-FS-513	B66-10213 05
Discrimination of fish oil and mineral oil slicks on sea water	HQ-10412	B69-10673 01	Lathe chuck key incorporates safety feature	MSC-506	B66-10243 05
SPRINGS (ELASTIC)			Seal surfaces protected during assembly	NU-0067	B66-10266 05
Solenoid permits remote control of stop watch and assures restarting	PRC-17	B63-10024 01	Device facilitates centering of workpieces in lathe chuck	M-FS-685	B66-10277 05
New package for Belleville spring permits rate change, easy disassembly	JPL-392	B63-10247 05			
Leaf-spring suspension provides accurate parallel displacements	JPL-480	B65-10104 05			
Collapsible truss structure is automatically					

SUBJECT INDEX

SPUTTERING

Extensometer automatically measures elongation in elastomers M-FS-517	B66-10284	05	GSFC-08259	B67-10646	01
Diaphragm spring gives clutch over-center toggle effect GSFC-499	B66-10297	05	Sleeved damper limits spring surging MSC-12071	B68-10111	05
Tool pre-tensions covers prior to lacing MSC-631	B66-10301	05	Dual rate pressure relief valve MSC-11606	B68-10237	05
Modified hydraulic braking system limits angular deceleration to safe values GSFC-476	B66-10310	05	Dynamically stable check valve concept for wide flow range M-FS-14579	B68-10247	05
Bellows joint absorbs torsional deflections in duct system M-FS-882	B66-10332	04	Quick-attach clamp XFR-05421	B68-10250	05
Shock-operated valve would automatically protect fluid systems M-FS-801	B66-10335	03	Vibration testing and dynamic studies of relays M-FS-14542	B68-10268	01
Braking mechanism is self actuating and bidirectional M-FS-1299	B66-10484	05	Contact-spring forming machine for flat conductor cable receptacles M-FS-20126	B68-10550	05
Spiral spring/strain gage combination accurately measures shock induced deflection MSC-789	B66-10488	01	Computer program analyzes whirl critical speeds and bearing loads for shafts coupled by nonlinear springs to machine housing NUC-10308	B69-10034	06
Hole saw drill attachment has zero force reaction MSC-543	B66-10604	05	Countersunk headscrew retainer M-FS-16481	B69-10282	05
Friction brake cushions acceleration and vibration loads MSC-715	B66-10608	05	Precision mounting for instrument optical elements provided by polyimide bonding M-FS-20293	B69-10310	05
Fuel and oxidizer valve assembly employs single solenoid actuator MSC-1046	B66-10648	05	Shock-absorbent mountings for bearings NPO-10626	B69-10331	05
Resonant frequency can be adjusted on vibration mount JPL-SC-134	B66-10672	05	Helical recorder GSFC-10614	B69-10340	01
Gage accurately controls force for placing chips on substrates M-FS-1941	B66-10675	01	Design of a strain-gage probe ARG-10338	B69-10343	05
Actuator device schedules rate of valve closure M-FS-1556	B66-10686	05	Removal of retaining washers of the waffle-spring type MSC-15531	B69-10350	05
Combination double door high-vacuum valve provides access to vacuum chamber JPL-849	B66-10697	05	Calibratable solid-state pressure switch M-FS-20474	B69-10437	05
Elastic guides reduce hysteresis effect in Belleville spring package JPL-910	B67-10011	05	Temperature-controlled resistor NPO-10713	B69-10440	01
Aspirator increases relief valve poppet stroke HQ-77	B67-10154	05	A new method for fabrication of flexible vacuum purge jackets M-FS-12646	B69-10564	03
Solenoid valve design has one moving part NPO-10039	B67-10219	05	An electrical connector pin protector MSC-15660	B69-10742	01
Line adapter provides quick disconnect under moderate side loading M-FS-2159	B67-10256	05	SPUTTERING Improved carbon electrode reduces arc sputtering MSC-219	B66-10026	01
Excellent spring properties developed in two nickel alloys for use at cryogenic temperatures NUC-10084	B67-10349	03	Complex surfaces plated by thin-film deposition in one operation LEWIS-292	B67-10006	05
Test device prevents weld joint damage by eliminating axial pin forces on unpotted modules LEWIS-10201	B67-10359	01	Thin film process forms effective electrical contacts on semiconductor crystals M-FS-2343	B67-10142	01
Coaxial cable stripping device facilitates RF cabling fabrication NPO-10315	B67-10419	05	Application of the solid lubricant molybdenum disulfide by sputtering LEWIS-10544	B68-10340	03
An improved magnetic tape recorder			Electron beam recrystallization of amorphous semiconductor materials LEWIS-10443	B68-10556	02
			Preparation of superconducting thin films of transition-metal interstitial compounds HQ-10445	B69-10470	01
			Epitaxial crystalline growth upon cold substrates MSC-11196	B69-10494	01

SQUARE WAVES

SUBJECT INDEX

Pulsed high-voltage dc RF sputtering LEWIS-10920	B69-10699	01	SQUARES (MATHEMATICS) Root-cubing and general root-powering methods for finding the zeros of polynomials ARG-10444	B69-10424	02
SQUARE WAVES Frequency-shift-keyer circuit improves PCM conversion for radio transmission GSFC-80	B63-10511	01	SQUIBS Quick-closing valve is actuated by explosive discharge ARC-55	B66-10233	05
High efficient square-wave oscillator operator at high power levels GSFC-112	B63-10554	01	STABILITY Computer determines high-frequency phase stability GSFC-113	B63-10555	01
Transistorized converter provides nondissipative regulation GSFC-238	B64-10305	01	Irradiation improves properties of an aromatic polyester LANGLEY-115	B65-10164	03
Inexpensive, stable circuit measures heart rate MSC-95	B65-10010	01	Refractory oxides evaluated for high-temperature use LANGLEY-121	B65-10167	03
Stepping motor drive circuit designed for low power drain GSFC-198	B65-10026	01	Electrometer has automatic zero bias control GSFC-350	B65-10242	01
Simulator produces physiological waveforms MSC-94	B65-10091	01	Cuprous selenide and sulfide form improved photovoltaic barriers WOO-212	B66-10025	01
Simple circuit functions as frequency discriminator for PFM signals GSFC-267	B65-10102	01	Binary fluid amplifier solves stability and load problems ERC-15	B66-10177	01
Variable frequency magnetic multivibrator generates stable square-wave output GSFC-AE-21	B65-10124	01	Remote preamplifier circuit maintains stability over wide temperature range WOO-278	B66-10432	01
Instrument calibrates low gas-rate flowmeters MSC-134	B65-10137	01	Electronic circuit delivers pulse of high interval stability MSC-673	B66-10501	01
High-speed square-wave current limiter operates efficiently JPL-SC-073	B65-10233	01	Electron multiplier has improved performance and stability GSFC-546	B67-10060	01
Inductor flyback characteristic gives voltage regulator fast response GSFC-361	B65-10257	01	Computer program uses Monte Carlo techniques for statistical system performance analysis M-FS-2234	B67-10306	06
Electronic ohmmeter provides direct digital output GSFC-363	B65-10274	01	Precision capacitor has improved temperature and operational stability ARG-189	B67-10313	01
Electronic ampere-hour integrator is accurate to one percent GSFC-203	B65-10308	01	Field effect transistors improve buffer amplifier M-FS-916	B67-10334	01
PCM magnetic tape system efficiently records and reproduces data GSFC-375	B65-10311	01	Analysis of stability-critical orthotropic cylinders subjected to axial compression M-FS-12869	B67-10375	03
Linear signal noise summer accurately determines and controls S/N ratio JPL-SC-152	B66-10433	01	Stabilizing stainless steel components for cryogenic service M-FS-13127	B67-10377	05
Glow discharge density sensor probe life is extended M-FS-1707	B67-10229	01	Real fluid properties of normal and parahydrogen LEWIS-10458	B68-10361	06
A phonocardiogram simulator KSC-67-94	B67-10239	01	Instabilities encountered during heat transfer to a supercritical fluid ARG-10266	B69-10042	02
Oscilloscope used as X-Y plotter or two-dimensional analyzer LEWIS-311	B67-10269	01	Analysis of magnetically-controlled processes in pulse-modulation systems GSFC-10241	B69-10070	01
Sensitive bridge circuit measures conductance of low-conductivity electrolyte solutions ARG-147	B67-10294	01	Tunable bandpass filter with variable selectivity ARC-10191	B69-10130	01
Improved circuit for measuring capacitive and inductive reactances M-FS-13083	B67-10513	01	Mixing weld gases offers advantages M-FS-16413	B69-10145	05
Simple, accurate automatic frequency control circuit KSC-10393	B69-10323	01	Substitution of stable isotopes in Chlorella ARG-10258	B69-10197	04
Phase-locked-loop phase modulator with high modulation index, low distortion MSC-12247	B69-10487	01

STATORS

STATIC LOADS

Lightweight load support serves as vibration damper
JPL-661 B65-10144 05

Refractory oxides evaluated for high-temperature use
LANGLEY-121 B65-10167 03

Pressure responsive seal handles static and dynamic loads
GSFC-441 B65-10327 05

Mechanism continuously measures static and dynamic cable loads
MSC-217 B66-10107 05

Transducer measures force in vacuum environment
LEWIS-218 B66-10161 01

Conceptual dead weight device to provide pressure calibration
M-FS-14672 B68-10264 01

STATIC PRESSURE

Averaging probe reduces static-pressure sensing errors
LANGLEY-36 B65-10114 05

Computer program determines gas flow rates in piping systems
M-FS-443 B66-10300 01

Combination spacer and gasket provides effective static seal
M-FS-1397 B66-10485 05

Pressure probe compensates for dimensional tolerance variations
LEWIS-302 B66-10599 01

Experimental design for research on shock-turbulence interaction
M-FS-20031 B69-10604 02

STATIC TESTS

Materials physically tested in variable-environment chamber
JPL-789 B66-10130 01

Effects of high frequency current in welding aluminum alloy 6061
M-FS-18337 B68-10383 05

STATICS

Static seal concept to accommodate seat tolerances
M-FS-1854 B67-10285 05

Cryogenic seal concept for static and dynamic conditions
M-FS-12986 B67-10673 05

STATIONS

Concept for automatic Doppler compensation in two-way communication systems
GSFC-10213 B67-10643 01

STATISTICAL ANALYSIS

Computer program performs statistical analysis for random processes
M-FS-723 B66-10525 01

Computer programs perform spectral analyses of up to seven time series
M-FS-1133 B66-10539 01

Welding of AM350 and AM355 steel
M-FS-2314 B67-10292 05

Computer program uses Monte Carlo techniques for statistical system performance analysis
M-FS-2234 B67-10306 06

Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors
M-FS-1887 B67-10434 01

Study made of thin-walled pipe response to turbulent fluids
M-FS-1321 B67-10518 05

New method for critical failure prediction of complex systems
M-FS-14133 B68-10252 02

Study of optimum discrete estimators in measurement analysis
M-FS-14915 B68-10348 02

Performance analysis of electrical circuits
/PANE/
M-FS-15001 B68-10448 06

Microscopes and computers combined for analysis of chromosomes
ARG-10256 B69-10088 04

Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices
ARG-10445 B69-10415 02

A theoretical study of radar backscatter from distributed targets with emphasis on polarization dependence
M-FS-13775 B69-10560 02

Live-timer method of automatic dead-time correction for precision counting
ARG-10478 B69-10612 01

STATISTICAL CORRELATION

The X square statistic and goodness of fit test
GSFC-10547 B68-10136 02

STATISTICAL DISTRIBUTIONS

Design reliability goal developed from small sample
M-FS-403 B66-10405 05

Computer program calculates monotonic maximum likelihood estimates using method of reversals
M-FS-1516 B67-10136 01

Probabilistic approach to long range planning of manpower
MSC-11524 B67-10510 06

Study made of mechanics of deformation and fracture of fibrous composites
HQ-10035 B67-10660 03

STATISTICAL MECHANICS

Computer program for calculation of ideal gas thermodynamic data
LEWIS-10254 B68-10025 06

STATISTICS

GERT EXCLUSIVE-OR combining paths and loops of electrical networks
ERC-10206 B68-10435 06

GERT simulation program for GERT network analysis
ERC-10209 B68-10457 06

Failure rates for accelerated acceptance testing of silicon transistors
ERC-10198 B68-10541 01

STATOR BLADES

Noise study of single stage compressor rotor-stator interaction
LANGLEY-137 B67-10516 02

Acoustic wave analysis
M-FS-18076 B68-10265 02

Computer programs for axial flow compressor design
LEWIS-10765 B69-10174 06

STATORS

Brushless dc motor uses electron beam switching tube as commutator

SUBJECT INDEX

STRUCTURAL FAILURE

STRIPPING

Cutter and stripper reduces coaxial cable connection time
ARC-40 B65-10094 05

Technique for stripping Teflon insulated wire
M-FS-1774 B67-10048 05

Tools for applying lead tape to flat conductor cabling for chemical stripping
M-FS-20429 B69-10190 05

STROBOSCOPES

Multicolor stroboscope pinpoints resonances in vibrating components
JPL-0033 B66-10223 01

STRONTIUM 90

Silicon surface barrier detectors used for liquid hydrogen density measurement
M-FS-14115 B68-10166 01

STRUCTURAL ANALYSIS

Computer program simplifies transient and steady-state temperature prediction for complex body shapes
MSC-989 B66-10619 01

Neutron diffractometer allows both magnetic and crystallographic analyses
ARG-191 B67-10131 02

Structural Analysis and Matrix Interpretive System /SAMIS/
NPO-10130 B67-10171 01

Improved computer program for elastic analysis of highly redundant structural configurations
M-FS-13087 B67-10330 06

Survey made of refractory metals
LEWIS-10380 B68-10032 03

Computer program performs stiffness matrix structural analysis
NPO-10502 B68-10096 06

Fatigue of reinforced concrete beams under dynamic loading
M-FS-14980 B68-10515 05

Fractography can be used to analyze failure modes in polytetrafluoroethylene
M-FS-20294 B69-10066 03

Fatigue failure in metal bellows due to flow-induced vibrations
M-FS-18383 B69-10071 05

Structural Analysis and Matrix Interpretive System /SAMIS/
NPO-10839 B69-10093 01

Mechanical properties of a lap joint under uniform clamping pressure
M-FS-14538 B69-10141 05

STRUCTURAL DESIGN

A conceptual design for squeeze film bearings
M-FS-573 B66-10226 05

Solar cell submodule design facilitates assembly of lightweight arrays
JPL-728 B66-10231 02

Integrated mobility measurement and notation system
MSC-726 B67-10114 04

Land landing couch dynamics computer program
MSC-1210 B67-10233 06

Computer program simplifies design of rotating components of turbomachinery
NUC-10046 B67-10235 06

Application of distorted models in

developing scaled structural models
M-FS-2540 B67-10321 05

Study made of large amplitude fuel sloshing
M-FS-12381 B67-10439 03

Computer programs for antenna feed system design and analysis
NPO-10359 B67-10504 06

Study of crack initiation phenomena associated with stress corrosion of aluminum alloys
M-FS-14283 B68-10153 03

Improved traveling wave maser amplifier
NPO-10548 B68-10244 01

Design of fluid-duct bends with low pressure loss
M-FS-20176 B68-10395 05

Analysis of filament reinforced metal-shell pressure vessels
LEWIS-10352 B68-10405 06

Improved mouse cage provides versatility and ease in handling laboratory mice
MSC-12250 B69-10124 04

Optimum structural design based on reliability and proof-load testing
NPO-11228 B69-10723 31

Determination of permissible applied load stress in structural elements
M-FS-16556 B69-10823 02

STRUCTURAL ENGINEERING

Computer program simplifies selection of structural steel columns
NU-0044 B66-10097 01

STRUCTURAL FAILURE

Refractory oxides evaluated for high-temperature use
LANGLEY-121 B65-10167 03

Plugged hollow shaft makes fatigue-resistant shear pin
LANGLEY-195 B66-10077 05

Rubber-coated bellows improves vibration damping in vacuum lines
LEWIS-273 B66-10187 02

Fluid damping reduces bellows seal fatigue failures
M-FS-565 B66-10249 05

Study to minimize hydrogen embrittlement of ultrahigh-strength steels
M-FS-2455 B67-10141 03

Glass bead shot peening retards stress corrosion failure of titanium tanks
LANGLEY-319 B67-10198 05

Computer program simplifies design of rotating components of turbomachinery
NUC-10046 B67-10235 06

Buckling strength of filament-wound cylinders under axial compression is investigated
HQ-10032 B67-10659 03

Study made of mechanics of deformation and fracture of fibrous composites
HQ-10035 B67-10660 03

Predicting fatigue life of metal bellows
M-FS-14096 B68-10026 05

Fractography can be used to analyze failure modes in polytetrafluoroethylene
M-FS-20294 B69-10066 03

Techniques for controlling warpage and

SULFONATES

SUBJECT INDEX

SULFONATES

Etching process mills PH 14-8 Mo alloy
steel to precise tolerances
MSC-270 B66-10110 03

Surfactant for dye-penetrant inspection is
insensitive to liquid oxygen
M-FS-475 B66-10131 03

Uranyl phthalocyanines show promise in the
treatment of brain tumors
ARG-100 B67-10188 04

Heparin insolubilized with crosslinking
agent
NPO-10834 B69-10299 03

SULFUR
Chemical milling solution produces smooth
surface finish on aluminum
MSC-549 B66-10312 03

Development of low temperature battery
LEWIS-10326 B67-10546 01

SULFUR COMPOUNDS
Sintering characteristics and properties
of PuS and PuP are determined
ARG-10228 B69-10058 03

Inhibition of browning in foodstuffs
HQ-10177 B69-10493 04

SULFURIC ACID
Fuel cell serves as oxygen level detector
JPL-SC-072 B65-10066 01

Electrochemical milling removes burrs and
solder from tubing ends
M-FS-714 B66-10358 03

Method for removing surface-damaged layers
from nickel alloys
M-FS-18151 B68-10522 03

Corrosion protection of aluminum alloys in
contact with other metals
M-FS-18526 B69-10098 03

SUNPS
Method for X-ray study under extreme
temperature and pressure conditions
MSC-11232 B67-10474 02

SUNLIGHT
Special coatings control temperature of
structures
GSFC-444 B65-10337 03

Pigmented coating resists thermal shock
JPL-SC-083 B65-10354 03

SUNSPOTS
Solar activity history model
M-FS-20529 B69-10776 01

SUPERCONDUCTING MAGNETS
Superconductor magnets used for stagger-tuning
traveling-wave maser
GSFC-292 B65-10165 01

Mechanisms of superconductivity
investigated by nuclear radiation
M-FS-1944 B67-10057 02

Evaluation of superconducting magnets, a
study
M-FS-14808 B68-10396 02

SUPERCONDUCTIVITY
Simple technique determines ac properties
of hard superconductive materials
M-FS-1818 B66-10657 02

Simple pump maintains liquid helium level in
cryostat
M-FS-1763 B67-10039 05

Superconducting switch permits measurement

of small voltages at cryogenic temperatures
ARG-90260 B68-10087 01

Superconductive thin film makes convenient
liquid helium level sensor
LANGLEY-10289 B68-10341 01

Superconductivity in zirconium-rhodium
alloys
ARG-10223 B69-10010 03

Report on a cryogenic gyroscope
NPO-11200 B69-10504 02

SUPERCONDUCTORS
Supercold technique duplicates magnetic field
in second superconductor
JPL-376 B63-10237 05

Shaped superconductor cylinder retains intense
magnetic field
JPL-381 B63-10238 01

Superconductor magnets used for stagger-tuning
traveling-wave maser
GSFC-292 B65-10165 01

Superconductor shields test chamber from
ambient magnetic fields
JPL-627 B65-10297 02

Compound improves thermal interface between
thermocouple and sensed surface
NU-0028 B66-10121 02

Niobium thin films are superconductive in
strong magnetic fields at low temperatures
JPL-SC-174 B66-10122 02

Rectangular configuration improves
superconducting cable
ARG-90088 B68-10098 02

One hundred angstrom niobium wire
LEWIS-10128 B68-10279 03

Evaluation of superconducting magnets, a
study
M-FS-14808 B68-10396 02

Experimental prediction of performance
by superconducting cables
ARG-10215 B69-10161 01

RF noise suppression using the
photodielectric effect in semiconductors
MSC-12259 B69-10225 01

Preparation of superconducting thin films
of transition-metal interstitial compounds
HQ-10445 B69-10470 01

SUPERCOOLING
Supercold technique duplicates magnetic field
in second superconductor
JPL-376 B63-10237 05

Complementary system vaporizes subcooled
liquid, improves transformer efficiency
M-FS-550 B66-10045 02

Study of hydrogen slush-hydrogen gel
utilization
M-FS-13068 B67-10413 02

Self-sustained hydrodynamic oscillations in
a natural-circulation two-phase-flow
boiling loop
ARG-10461 B69-10620 02

SUPERCRITICAL FLOW
Variable-mesh method of solving
differential equations
NPO-10515 B69-10017 02

SUPERCRITICAL PRESSURES
Instabilities encountered during heat
transfer to a supercritical fluid
ARG-10266 B69-10042 02

SUBJECT INDEX

TORSION

Torque wrench allows readings from inaccessible locations
M-FS-598 B66-10204 05

Tool enables proper mating of accelerometer and cable connector
M-FS-611 B66-10208 05

Pressure-welded flange assembly provides leaktight seal at reduced bolt loads
M-FS-640 B66-10247 05

Modified hydraulic braking system limits angular deceleration to safe values
GSFC-476 B66-10310 05

Braking mechanism is self actuating and bidirectional
M-FS-1299 B66-10484 05

Hole saw drill attachment has zero force reaction
MSC-543 B66-10604 05

Improved rolling element bearings provide low torque and small temperature rise in ultrahigh vacuum environment
LEWIS-359 B66-10678 05

Simple motor drive system operates heavy hinged door
NU-0093 B66-10712 05

A theoretical model for determining turbine flowmeter sensitivity
M-FS-1172 B67-10179 01

Ultrasonic wrench produces leaktight connections
M-FS-12561 B67-10353 05

Standard surface grinder for precision machining of thin-wall tubing
ARG-10014 B67-10400 05

Power torque wrench concept for precision torque application
M-FS-13546 B67-10547 05

Magnetically controlled torque wrench prevents overtightening
SAN-10002 B68-10209 05

High-torque power wrench, a concept
M-FS-18194 B68-10299 05

Electromechanical rotary actuator operates over wide temperature range
M-FS-18402 B69-10100 05

Torsion system for creep testing with multiple stress reversals
HQ-10039 B69-10147 03

Adjustable wrench for electronic connectors
M-FS-18547 B69-10184 05

Compensation of pulse-rebalanced inertial instruments
MSC-13098 B69-10216 01

Sealing a rubber bladder between two sections of an accumulator
M-FS-20403 B69-10355 05

Pressure transducer
NPO-10853 B69-10364 01

Air-cushion lift pad
M-FS-14685 B69-10448 05

Torsional tubular disconnect
NPO-10704 B69-10499 05

Report on a cryogenic gyroscope
NPO-11200 B69-10504 02

TORQUE MOTORS

Hydraulic drive system prevents backlash

JPL-371 B65-10351 05

Quick-response servo amplifies small hydraulic pressure differences
ARG-99 B66-10498 05

Improved fluid control circuit operates on low power input
LEWIS-325 B67-10042 01

Gimbaled-mirror scanning system capable of spiral pattern
GSFC-10170 B67-10609 02

Low-cost, fast-response drive circuit for electromagnetic torque motors
LEWIS-10143 B68-10386 01

Two-step rocket engine bipropellant valve concept
MSC-10951 B69-10280 05

Multi-purpose tool mitten
HQ-10047 B69-10483 05

TORQUEMETERS

Optics used to measure torque at high rotational speeds
LEWIS-13 B63-10338 01

Device enables measurement of moments of inertia about three axes
GSFC-49 B65-10176 05

Air brake-dynamometer accurately measures torque
LEWIS-163 B65-10312 05

Miniature servo accelerometer is force-balanced
JPL-155 B65-10340 01

Torque wrench designed for restricted areas
LEWIS-246 B66-10011 05

Noncontacting transducer measures shaft torque
M-FS-474 B66-10048 01

Torque wrench allows readings from inaccessible locations
M-FS-598 B66-10204 05

Torque meter aids study of hysteresis motor rings
M-FS-12219 B67-10412 01

High-temperature bearing lubricants
LEWIS-10408 B68-10249 05

Hermetically sealed pump
LEWIS-10837 B69-10320 05

TORQUERS

Helical recorder
GSFC-10614 B69-10340 01

TORSION

Dispensing system eliminates torsion in deployed hoses
MSC-80 B65-10185 05

Miniature servo accelerometer is force-balanced
JPL-155 B65-10340 01

Sheet metal strip unrolls to form circular boom
GSFC-423 B66-10032 05

Resilient clamp holds fuel cell stack through resilient clamp holds fuel cell stack through thermal cycle
MSC-313 B66-10035 05

Noncontacting transducer measures shaft torque
M-FS-474 B66-10048 01

Thermodynamic properties of solid palladium-silver alloys and other alloys are

TRANSMITTER RECEIVERS

TRANSLATIONAL MOTION

Eccentric drive mechanism is adjustable during operation
M-FS-2576 B67-10373 05

A magnifying scratch-gage force transducer
LANGLEY-10496 B69-10212 01

Precisely repeatable rotary mechanism
NPO-10679 B69-10696 05

TRANSLUCENCE

Setting of angles on machine tools speeded by magnetic protractor
ARC-5 B63-10006 01

Areas of irregular, discontinuous patterns rapidly and accurately measured
GSFC-10184 B67-10674 01

TRANSMISSION

Bearing transmits rotary and axial motion
LANGLEY-27 B64-10130 05

Pneumatic power is transmitted through air bearing
MSC-8 B64-10141 05

IR-transmission glasses formed from oxides of bismuth and tellurium
M-FS-279 B65-10190 03

Optically exciting a magnetic memory - A feasibility study
M-FS-14854 B69-10060 02

Resonant microwave dichroic surface
GSFC-10658 B69-10274 01

High voltage pulse generator
MSC-12178 B69-10548 01

TRANSMISSION CIRCUITS

TV synchronization system features stability and noise immunity
JPL-915 B67-10118 01

Current pulse amplifier transmits detector signals with minimum distortion and attenuation
NUC-10055 B67-10347 01

Optometric system facilitates colorimetric and fluorometric measurements
NPO-10233 B68-10316 01

Technique for tuning antenna systems producing negligible signal radiation
KSC-10060 B69-10215 01

TRANSMISSION LINES

Igniting system for mercury lamps protects transistorized sustaining supply
JPL-421 B63-10262 01

Plastic molds reduce cost of encapsulating electric cable connectors
M-FS-69 B63-10568 05

High-pass RF coaxial filter rejects dc and low frequency signals
GSFC-73 B64-10173 01

Thermistor connector assembly increases accuracy of measurements
LANGLEY-62 B65-10045 01

Electrical cable connector-clamp has smooth exterior surface
MSC-154 B65-10201 05

Oscillator circuit measures liquid level in tanks
M-FS-245 B65-10209 01

Electromagnetic hammer removes weld distortions from aluminum tanks
M-FS-287 B65-10342 05

Single connector provides safety fuses for multiple lines
MSC-199 B66-10050 01

Electrical cabling withstands severe environmental conditions
M-FS-1585 B66-10427 01

Video signal processing system uses gated current mode switches to perform high speed multiplication and digital-to-analog conversion
MSC-781 B66-10429 01

Remote preamplifier circuit maintains stability over wide temperature range
WOO-278 B66-10432 01

Pulse technique provides more accurate checkout of exploding bridge wire device
HQ-62 B66-10561 01

Electrical continuity scanner facilitates identification of wires for soldering to connectors
MSC-626 B66-10605 01

Improved memory word line configuration allows high storage density
GSFC-559 B66-10617 01

Cable clamp bolt fixture facilitates assembly in close quarters
KSC-67-80 B67-10244 05

Metal flame spray coating protects electrical cables in extreme environment
NUC-10077 B67-10351 03

Cut-through tester accurately measures insulation failure rates
M-FS-12506 B67-10354 03

Temperature-sensed cryogenic bleed maintains liquid state in transfer line
M-FS-12681 B67-10424 01

Adhesives for laminating polyimide insulated flat conductor cable
M-FS-12066 B67-10429 03

Rectangular configuration improves superconducting cable
ARG-90088 B68-10098 02

Solid state high-voltage pulser operates with low supply voltage
M-FS-14034 B68-10308 01

Automatic calorimetry system monitors RF power
NPO-11033 B69-10384 01

TRANSMISSIVITY

Shock and vibration response of multistage structure
M-FS-14972 B68-10353 05

TRANSMITTANCE

Calculation of infrared spectral transmittances of inhomogeneous gases
M-FS-1563 B66-10554 02

Packaging criteria for transportation and
handling shock and vibration
M-FS-13007 B68-10219 05

Computer graphics data conditioning
M-FS-14695 B68-10296 06

Weight Control System
M-FS-15028 B69-10041 06

TRANSURANIUM ELEMENTS

Nitric acid-organic mixtures surveyed for
use in separation by anion exchange methods
ARG-10065 B68-10425 03

TRANSVERSE WAVES

Computer program for determination of
natural frequencies of closed spherical
sandwich shells
MSC-1246 B67-10279 06

TRAPEZOIDS

Antenna configurations provide polarization
diversity
GSFC-74 B66-10066 01

TRAPPING

Method for determining properties of
microinstabilities of a magnetized plasma
HQ-10447 B69-10462 02

TRAVELING WAVE MASERS

Superconductor magnets used for stagger-tuning
traveling-wave maser
GSFC-292 B65-10165 01

Parametric up-converter increases flexibility
of maser
KSC-67-98 B67-10104 01

Apparatus makes klystron operating
frequency adjustable from remote point
NPO-09831 B67-10514 01

Highly stable microwave delay line
NPO-09828 B67-10642 01

Thermal short improves sensitivity of
cryogenically cooled maser
NPO-09975 B68-10059 01

Improved traveling wave maser amplifier
NPO-10548 B68-10244 01

RF noise suppression using the
photodielectric effect in semiconductors
MSC-12259 B69-10225 01

TRAVELING WAVE TUBES

Traveling-wave tube circuit simplifies
microwave relay
GSFC-299 B65-10127 01

A positive taper traveling-wave tube
LANGLEY-10263 B69-10407 01

TRAYS

Viscous-pendulum damper suppresses structural
vibrations
LANGLEY-45 B64-10272 05

Mass culture of photobacteria to obtain
luciferase
GSFC-10563 B69-10294 04

TREADS

Lateral ring metal elastic wheel absorbs
shock loading
M-FS-1312 B66-10663 05

TRIANGULATION

Apparatus of small size can be extended into
long, rigid boom
JPL-305 B63-10200 05

TRIGGER CIRCUITS

Unmanned seismometer levels self, corrects
drift errors
GSFC-100 B63-10551 01

Transistorized trigger circuit is frequency-
controllable
GSFC-111 B63-10553 01

System selects framing rate for spectrophotograph
camera
LANGLEY-55 B65-10086 01

Compact SCR trigger circuit for ignitron
switch operates efficiently
M-FS-371 B65-10347 01

Security warning system monitors up to
fifteen remote areas simultaneously
KSC-66-39 B66-10548 01

Circuit multiplies pulse width modulation,
exhibits linear transfer function
HQ-56 B67-10055 01

TV synchronization system features
stability and noise immunity
JPL-915 B67-10118 01

Modified univibrator compensates for output
timing errors
ARG-85 B67-10130 01

Laboratory pulse modulator uses minority
carrier storage diodes
M-FS-2442 B67-10226 01

A calibration means for spectrum analyzers
MSC-10987 B67-10254 01

Multichannel pulse height analyzer is
inexpensive, features low power
requirements
HQN-10020 B67-10258 01

SiC/Si diode trigger circuit provides
automatic range switching for log amplifier
M-FS-1879 B67-10314 01

Logic circuit detects both present and
missing negative pulses in superimposed
wave trains
M-FS-12518 B67-10565 01

Temperature-stabilized, triggerable
microelectronic astable multivibrator
starts reliably
MSC-1173 B67-10624 01

Unique frequency-shift-keyed demodulation
system
GSFC-217 B67-10668 01

High-speed camera synchronization
M-FS-18062 B68-10282 02

Transistorized Marx bank pulse circuit

TURBULENCE

SUBJECT INDEX

Computer program calculates velocities and streamlines in turbomachines
LEWIS-10252 B68-10097 06

Computer program analyzes whirl critical speeds and bearing loads for shafts coupled by nonlinear springs to machine housing
NUC-10308 B69-10034 06

Improved design of item in high speed rotating machinery
M-FS-18441 B69-10373 05

A rotating, noncapillary heat pipe
LEWIS-10298 B69-10684 05

TURBULENCE
Large volume continuous counterflow dialyzer has high efficiency
HQ-10055 B67-10395 04

Fast-response cup anemometer features cosine response
ARG-90193 B68-10202 01

TURBULENCE EFFECTS
Experimental design for research on shock-turbulence interaction
M-FS-20031 B69-10604 02

TURBULENCE METERS
Study of hot wire techniques in low density flows with high turbulence levels
M-FS-1269 B66-10687 01

Laser-Doppler gas-velocity instrument
M-FS-20039 B68-10349 02

TURBULENT BOUNDARY LAYER
Binary fluid amplifier solves stability and load problems
ERC-15 B66-10177 01

Thin-film gage measures low heat-transfer rates
LANGLEY 205 B66-10180 01

Experimental program to investigate transonic flow around protuberances
M-FS-20037 B69-10609 05

TURBULENT DIFFUSION
Characteristics of fluidized-packed beds
ARG-10049 B68-10278 03

TURBULENT FLOW
Concept for passive system to control gas flow independently of temperature
M-FS-982 B66-10343 05

Stationary device produces homogeneous mixture of fluids
M-FS-525 B66-10570 05

Study of hot wire techniques in low density flows with high turbulence levels
M-FS-1269 B66-10687 01

Local measurements in turbulent flows through cross correlation of optical signals
M-FS-1268 B67-10030 01

Study made of thin-walled pipe response to turbulent fluids
M-FS-1321 B67-10518 05

Prediction of friction coefficients for gases
LEWIS-10774 B69-10112 02

FORTRAN 4 program calculates velocities and streamlines in a tandem blade turbomachine
LEWIS-10743 B69-10219 06

TURBULENT HEAT TRANSFER
Variable-mesh method of solving differential equations
NPO-10515 B69-10017 02

TURRET
Metallographic holding fixture permits polishing of soft metals on vibratory lapping machine
ARG-42 B66-10562 05

TURRET LATHES
Tool post modification allows easy turret lathe cutting-tool alignment
M-FS-581 B66-10191 05

TWISTING
Improved electromechanical master-slave manipulator
ARG-10027 B68-10372 05

TWO BODY PROBLEM
Computer program for mass optional solutions of some endpoint trajectory problems
M-FS-12976 B67-10310 06

TWO DIMENSIONAL FLOW
Study of hot wire techniques in low density flows with high turbulence levels
M-FS-1269 B66-10687 01

TWO PHASE FLOW
Helium tube separates nitrogen gas from liquid nitrogen
JPL-398 B63-10251 05

Mixer conditions temperature of liquified gas streams
M-FS-1784 B66-10565 02

Self-sustained hydrodynamic oscillations in a natural-circulation two-phase-flow boiling loop
ARG-10461 B69-10620 02

TYPEWRITERS
On-line computer system for use with low-energy nuclear physics experiments is reported
ARG-10257 B69-10094 01

U

UDINET ALLOYS
Technique for predicting the thermal expansion coefficients of cryogenic metallic alloys
NUC-10554 B69-10707 02

ULLAGE
Thermodynamic properties related to expansion of two-component gas
MSC-1133 B67-10112 03

Test instrumentation evaluates electrostatic hazards in fluid system
M-FS-2277 B67-10145 01

Elimination of dissolved gases in hypergolic engine propellants
M-FS-16179 B69-10692 03

ULTRAHIGH FREQUENCIES
Increased junction lead inductance ballasts high-frequency transistors
GSFC-387 B65-10259 01

Mechanical device accurately measures rf phase differences in vhf or uhf ranges
M-FS-1738 B66-10694 05

Experimental coherent fractional frequency multiplier at S-band
M-FS-2427 B67-10250 01

Ultraminiature television camera
M-FS-11967 B67-10469 01

Reflectometer for receiver input system
NPO-10843 B67-10657 01

Improved traveling wave maser amplifier
NPO-10548 B68-10244 01

SUBJECT INDEX

ULTRASONIC WAVE TRANSDUCERS

Survey of man-made electrical noise affecting radio broadcasting HQ-10290	B69-10308	01	ULTRASONIC TESTS	Fatigue cracks detected and measured without test interruption LEWIS-266	B66-10178	02
ULTRAHIGH VACUUM			Ultrasonic recording scanner used for nondestructive weld inspection M-FS-284		B66-10220	01
Ion pump provides increased vacuum pumping speed NEO-13	B65-10239	02	Ultrasonic hand tool allows convenient scanning of spot welds M-FS-539		B66-10289	02
Baking enables McLeod gauge to measure in ultrahigh vacuum range GSFC-440	B65-10329	01	Ultrasonic emission method enables testing of adhesive bonds M-FS-799		B66-10341	01
Special treatment reduces helium permeation of glass in vacuum systems HQ-25	B66-10372	02	Ultrasonic quality inspection of bonded honeycomb assemblies is automated MSC-859		B66-10544	01
Auxiliary titanium sublimation pump produces ultrahigh /10 to the minus 11 torr/ vacuum LANGLEY-212	B66-10388	02	Ultrasonic water column probe speeds up testing of welds HQ-58		B66-10577	01
High-temperature thermionic emission microscope NPO-10584	B68-10516	01	Correlation established between heat transfer and ultrasonic transmission properties of copper braze bonds ARG-247		B67-10037	02
Liquid gallium rotary electric contract LEWIS-10828	B69-10138	03	Calibrating ultrasonic test equipment for checking thin metal strip stock NUC-10009		B67-10127	01
ULTRAPURE METALS			Improved ultrasonic TV images achieved by use of Lamb-wave orientation technique ARG-203		B67-10295	02
Process yield Co-Fe alloys with superior high temperature magnetic properties LEWIS-333	B66-10535	03	Braze joint quality tested electromagnetically M-FS-12795		B67-10333	01
ULTRASONIC AGITATION			Study of stress corrosion in aluminum alloys M-FS-13906		B67-10533	03
High purity electroforming yields superior metal models ARC-6	B63-10007	05	Plastic shoe facilitates ultrasonic inspection of thin wall metal tubing NUC-10010		B67-10542	02
Metals plated on fluorocarbon polymers JPL-544	B63-10612	03	Nondestructive testing techniques used in analysis of honeycomb structure bond strength M-FS-1214		B67-10574	01
Miniature bearings lubricated by sonic dispersion method M-FS-202	B65-10106	03	Ballpoint probe gives optimum results in ultrasonic testing M-FS-13590		B67-10620	01
Ultrasonic cleaning restores depth-type filters M-FS-540	B66-10298	03	Evaluation of methods for nondestructive testing of brazed joints ARG-90175		B68-10191	03
Silver-palladium braze alloy recovered from masking materials M-FS-1845	B66-10631	03	Automatic system nondestructively monitors and records fatigue crack growth LANGLEY-10091		B68-10379	01
Ionene membrane battery separator NPO-11091	B69-10501	03	Nondestructive testing of brazed rocket engine components M-FS-18191		B68-10394	03
ULTRASONIC MACHINING			Stress-corrosion-induced property changes in aluminum alloys M-FS-20209		B68-10568	03
Ultrasonic wrench produces leaktight connections M-FS-12561	B67-10353	05	Handbooks for nondestructive testing using ultrasonics M-FS-20409		B69-10108	03
Elimination of dissolved gases in hypergolic engine propellants M-FS-16179	B69-10692	03	Effects of high-pressure hydrogen on storage vessel materials M-FS-18605		B69-10730	03

Stress-corrosion-induced property changes in aluminum alloys M-FS-20209	B68-10568	03	High-voltage pulse generator developed for wide-gap spark chambers ARG-10136	B68-10283	01
An ultrasonic method for studying elastic moduli as a function of temperature ARG-10187	B69-10082	02	Coolants with selective optical filtering characteristics for ruby laser applications M-FS-20188	B68-10508	02
Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensers MSC-15611	B69-10552	03	Imprinting of confining sites for cell cultures on thermoplastic substrates LANGLEY-10495	B69-10236	04
ULTRAVIOLET FILTERS			The Quantasyn, an improved quantum detector ERC-10148	B69-10443	01
PTFE-aluminum films serve as neutral density filters LANGLEY-189	B66-10017	02	Ion mass spectrometer for special uses HQ-10418	B69-10510	02
Thin carbon film serves as UV bandpass filter ERC-8	B66-10060	02	Multichannel spectroscopy guide HQ-10441	B69-10550	01
Improved method of optical design GSFC-10743	B69-10405	02	Two-color holography HQ-10349	B69-10662	02
ULTRAVIOLET MICROSCOPY			ULTRAVIOLET REFLECTION		
Ultraviolet microscopy aids in cytological and biomedical research ARG-178	B67-10590	04	Self-supported aluminum thin films produced by vacuum deposition process ARC-58	B66-10387	03
ULTRAVIOLET PHOTOMETRY			Uniform reflective films deposited on large surfaces GSFC-507	B66-10483	02
Ultraviolet photographic pyrometer used in rocket exhaust analysis M-FS-499	B66-10095	02	ULTRAVIOLET SPECTRA		
UV detector monitors organic contamination of optical surfaces M-FS-20246	B68-10413	01	Design concept for improved photo-scan tube JPL-818	B67-10157	01
ULTRAVIOLET RADIATION			ULTRAVIOLET SPECTROMETERS		
Oil-smeared models aid wind tunnel measurements LANGLEY-4	B63-10311	03	Thin carbon film serves as UV bandpass filter ERC-8	B66-10060	02
Instrument accurately measures extremely low air densities M-FS-193	B65-10221	01	Glancing incidence telescope for far ultraviolet and soft X-rays GSFC-10052	B67-10508	02
Improved carbon electrode reduces arc sputtering MSC-219	B66-10026	01	ULTRAVIOLET SPECTROPHOTOMETERS		
Sensor detects hydrocarbon oil contaminants in fluid lines M-FS-522	B66-10068	01	Spectrophotometric technique quantitatively determines NaMBT inhibitor in ethylene glycol-water solutions MSC-11496	B67-10573	03
Plastic scintillator converts standard photomultiplier to ultraviolet range ERC-9	B66-10108	02	ULTRAVIOLET SPECTROSCOPY		
Hydrogen fire detection system features sharp discrimination M-FS-643	B66-10368	01	The preparation, identification and properties of chlorophyll derivatives ARG-10205	B68-10409	03

SUBJECT INDEX

URANIUM COMPOUNDS

UMBILICAL CONNECTORS

Lock-disconnect mechanism gives positive release to joined bodies
M-FS-2147 B67-10123 05

UNDAMPED OSCILLATIONS

Damping technique gives accelerometer flat frequency response
M-FS-471 B66-10293 01

A modal combination computer program for dynamic analysis of structures
NPO-10129 B67-10217 06

UNDERGROUND EXPLOSIONS

Transplutonium elements processed from rock debris of underground detonations
ARG-10222 B69-10054 03

UNDERWATER ACOUSTICS

System locates randomly placed remote objects
LANGLEY-209 B66-10315 01

UNDERWATER ENGINEERING

Electronic skewing circuit monitors exact position of object underwater
NUC-10146 B67-10629 01

Multi-purpose tool mitten
HQ-10047 B69-10483 05

UNDERWATER STRUCTURES

Flexible fastener effects airtight material closure
JPL-684 B66-10304 05

UNDERWATER TESTS

Colloidal suspension simulates linear dynamic pressure profile
WOO-266 B66-10214 05

UNDERWATER VEHICLES

Device measures fluid drag on test vehicles
LANGLEY-34 B65-10195 01

Electrically heated diaphragm eliminates use of pyrotechnics
MSC-241 B65-10400 01

Ballast barge concept for underwater structures
KSC-10196 B68-10168 05

UNIFORM FLOW

Brazing retort manifold design concept may minimize air contamination and enhance uniform gas flow
M-FS-707 B66-10371 05

UNIONS (CONNECTORS)

Union would facilitate joining of tubing, minimize braze contamination
MSC-777 B66-10311 05

Ultrasonic wrench produces leaktight connections
M-FS-12561 B67-10353 05

Hand-tightened, high-pressure seal
M-FS-18416 B68-10417 05

Tube joint leak repair coupling
MSC-15022 B68-10540 05

Teflon-packed flexible joint
LEWIS-90252 B69-10049 03

UNIVAC 1107 COMPUTER

New computer system simplifies programming of mathematical equations
M-FS-441 B66-10361 01

Fortran 4 program for two-impulse rendezvous analysis
M-FS-13971 B67-10479 06

Mass spectograph analysis
MSC-13239 B69-10134 06

UNIVAC 1108 COMPUTER

CINDA - Chrysler Improved Numerical Differencing Analyzer computer program
M-FS-2298 B67-10278 06

Mass spectograph analysis
MSC-13239 B69-10134 06

JFLIP-JPL FORTRAN language with interval pre-processor
NPO-10835 B69-10187 06

Buckling Of Shells Of Revolution /BOSOR/ with various wall constructions
LANGLEY-10441 B69-10300 06

LM lookangle program
MSC-13179 B69-10370 06

UNMANNED SPACECRAFT

Rotor position sensor switches currents in brushless dc motors
GSFC-315 B65-10151 01

Feasibility study of wireless power transmission systems
M-FS-14691 B68-10309 01

An overview of electromagnetic interference problems in spacecraft
NPO-11170 B69-10362 01

UNSTEADY STATE

Method for determining properties of microinstabilities of a magnetized plasma
HQ-10447 B69-10462 02

UPSETTING

Electrical upsetting of metal sheet forms weld edge
M-FS-720 B66-10248 05

URANIUM

Use of steel and tantalum apparatus for molten Cd-Hg-Zn alloys
ARG-199 B66-10594 03

Magnesium-zinc reduction is effective in preparation of metals
ARG-10050 B67-10579 03

Simple colorimetric method determines uranium in tissue
ARG-10039 B67-10580 03

Ignition of binary alloys of uranium
ARG-10057 B68-10280 01

Study of actinide chemistry in saturated potassium fluoride solution
ARG-10204 B69-10004 03

Abrasion and resistant discharge valve developed
ARG-10219 B69-10044 05

URANIUM ALLOYS

Fluid-bed fluoride volatility process recovers uranium from spent uranium alloy fuels
ARG-232 B67-10032 03

Ignition of binary alloys of uranium
ARG-10057 B68-10280 01

Niobium-uranium alloys with voids of predetermined size and total volume
ARG-10490 B69-10641 03

URANIUM COMPOUNDS

Study of mechanical properties of uranium compounds
ARG-10074 B68-10197 03

Sintering characteristics and properties of PuS and PuP are determined
ARG-10228 B69-10058 03

Effect of interparticle forces on the

URANIUM FLUORIDES

VACUUM CHAMBERS

Technique for measuring absorptance and emittance by using cyclic incident radiation LEWIS-321 B66-10630	02	Low rate flow switch can be used for gas or liquid JPL-867 B66-10696	01
Predicting surface heating rates and pressures resulting from hot exhaust gases MSC-971 B66-10633	05	Aspirator increases relief valve poppet stroke HQ-77 B67-10154	05
Study made of destructive sectioning of complex structures for examination LEWIS-341 B66-10676	05	Fixture facilitates helium leak testing of pipe welds M-FS-2167 B67-10178	05
Inexpensive cryogenic insulation replaces vacuum jacketed line NUC-10061 B67-10264	02	Jacketed cryogenic piping is stress relieved M-FS-985 B67-10308	05
Improved compression molding process LANGLEY-10027 B67-10302	03	Precision capacitor has improved temperature and operational stability ARG-189 B67-10313	01
Scribable coating for plastic films MSC-11194 B67-10409	03	Machine tests slow-speed sliding friction in high vacuum M-FS-12341 B67-10379	05
Fuel cell life improved by metallic sinter activation after electrode assembly welding MSC-10965 B67-10436	03	Vacuum-jacketed transfer line installation technique M-FS-14496 B68-10125	05
Fortran 4 program for two-impulse rendezvous analysis M-FS-13971 B67-10479	06	Vacuum probe sampler removes micron-sized particles from surfaces SAN-10003 B68-10231	04
Variable-speed, portable routing skate M-FS-13772 B67-10525	05	Conceptual dead weight device to provide pressure calibration M-FS-14672 B68-10264	01
Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide ARG-10154 B68-10293	02	A new method for fabrication of flexible vacuum purge jackets M-FS-12646 B69-10564	03
Food products for space applications MSC-11697 B68-10324	04	VACUUM CHAMBERS	
Rating of electrical wires in vacuum environments MSC-15108 B68-10362	01	Cryopumping of hydrogen in vacuum chambers is aided by catalytic oxidation of hydrogen LEWIS-15 B63-10340	05
Insertion device for pressure testing MSC-15185 B69-10061	03	Apparatus facilitates high-temperature tensile testing in vacuum LEWIS-42 B63-10345	03
Coatings decrease metal fatigue failure ARC-10015 B69-10176	03	Vacuum-type backup bar speeds weld repairs M-FS-12 B63-10384	05
Continuous analysis of nitrogen dioxide in gas streams of plants ARG-10356 B69-10254	03	Low-cost tape system measures velocity of acceleration GSFC-85 B63-10512	01
Report on a cryogenic gyroscope NPO-11200 B69-10504	02	Test device prevents molecular bounce-back GSFC-82 B63-10546	03
Measurement of gas flow at extremely low pressures MSC-13261 B69-10522	03	Modified RF coaxial connector ends vacuum chamber wiring problem GSFC-150 B64-10010	01
Niobium-uranium alloys with voids of predetermined size and total volume ARG-10490 B69-10641	03	Ceramic-coated boat is chemically inert, provides good heat transfer LANGLEY-90 B65-10063	05
VACUUM APPARATUS		Vapor pressure measured with inflatable plastic bag GSFC-281 B65-10136	03
Connector for vacuum-jacketed lines cuts tubing system cost LEWIS-66 B63-10367	05	Heater decomposes oil backstreaming from high-vacuum pumps GSFC-356 B65-10224	02
Spherical electrode eliminates high-voltage breakdown LEWIS-155 B65-10139	01	Plastic bags in evacuated chamber make lightweight gas sampling system FRC-31 B65-10264	01
Burst diaphragm protects vacuum vessel from internal pressure transients JPL-687 B65-10236	05	Electron bombardment improves vacuum chamber efficiency LEWIS-160 B65-10280	02
Feed-through connector withstands high temperatures in vacuum environment GSFC-442 B65-10328	01	Rugged pressed disk electrode has low contact potential MSC-158 B65-10320	01
Fixed vacuum plate clamps styrofoam for machining M-FS-683 B66-10283	05	Vacuum chamber provides improved insulation and support for cryostat	
Composite bulkhead fabrication development M-FS-1264 B66-10582	05

Toroidal ring prevents gas ignition at vent stack outlet
M-FS-2042 B67-10098 05

Concept for cryogenic liquid reclamation system
NPO-10322 B67-10420 02

Temperature-sensed cryogenic bleed maintains liquid state in transfer line
M-FS-12681 B67-10424 01

Vent and relief valve maintains low leakage rate over broad temperature range
M-FS-12807 B68-10014 05

Device damps fluid pressure oscillations in vent valve
M-FS-13290 B68-10078 05

Control for maintaining constant level of a cryogenic liquid
NPO-11177 B69-10573 05

VENTURI TUBES

Mixer conditions temperature of liquified gas streams
M-FS-1784 B66-10565 02

Venturi meter with separable diffuser
LEWIS-10483 B68-10295 05

Piezoelectric linear actuator
MSC-13194 B69-10469 02

VENUS (PLANET)

Space trajectories program for IBM 7090
NPO-10125 B67-10172 06

Molecular radiation - Its application in physical measurements and analyses
M-FS-14816 B69-10562 02

VERSATILITY

Metal-bending brake facilitates lightweight, close-tolerance fabrication
ARC-29 B64-10069 05

Offset lenses add versatility to phototypesetting machine
HQ-9 B66-10173 02

Versatile impact hand tool
M-FS-20140 B68-10371 05

Improved mouse cage provides versatility and ease in handling laboratory mice
MSC-12250 B69-10124 04

VERTICAL DISTRIBUTION

Proposed technique for vertical alignment of a crane's cable
M-FS-16496 B69-10202 05

VERTICAL MOTION

Remotely operated gripper provides vertical control rod movement
ARG-10160 B68-10359 05

Air-cushion lift pad
M-FS-14685 B69-10448 05

VERY HIGH FREQUENCIES

Mechanical device accurately measures rf phase differences in vhf or uhf ranges
M-FS-1738 B66-10694 05

Survey of man-made electrical noise affecting radio broadcasting
HQ-10290 B69-10308 01

Self-shielding printed circuit boards for high frequency amplifiers and transmitters
HQ-10433 B69-10314 01

Improved VHF direction finding system
M-FS-20439 B69-10378 01

VESSELS

Method of welding joint in closed vessel improves quality of seam
JPL-170 B63-10139 05

Method prevents secondary radiation in radiographic inspection
M-FS-13383 B67-10391 02

VESTIBULAR TESTS

Two devices for analysis of nystagmus
HQ-10273 B69-10224 01

VHF OMNIRANGE NAVIGATION

Literal readout of identification signals in Morse code
LANGLEY-10222 B69-10479 01

VIABILITY

Technique for highly efficient recovery of microbiological contaminants
MSC-13250 B69-10273 04

VIBRATION

Adhesive for vacuum environments resists shock and vibration
MSC-56 B65-10016 03

Improved holder protects crystal during high acceleration and impact
JPL-463 B65-10037 05

Vibrating-membrane electrometer has high conversion gain
ARC-38 B65-10056 01

Internal cooling increases range of immersion-type temperature probe
LEWIS-171 B65-10157 02

Rack mount device quickly inserts or extracts chassis units
MSC-244 B65-10385 05

Electrical cabling withstands severe environmental conditions
M-FS-1585 B66-10427 01

Plastic tubing protects flexible copper hose
M-FS-772 B66-10588 05

Instrument continuously measures density of flowing fluids
LEWIS-309 B67-10080 01

Device enables calibration of microphones at high sound pressure levels
M-FS-11980 B67-10336 01

Coaxial cable stripping device facilitates RF cabling fabrication
NPO-10315 B67-10419 05

Ultrasonics used to measure residual stress
M-FS-12449 B67-10428 02

Study made of acoustical monitoring for mechanical checkout
M-FS-13372 B67-10430 02

Stable ac phase and amplitude comparator
M-FS-13086 B67-10459 01

Double copper sheath multiconductor instrumentation cable is durable and easily installed in high thermal or nuclear radiation area
NUC-10007 B67-10538 01

Bacteriostatic conformal coating for electronic components
GSFC-10007 B67-10599 03

VIBRATORY LOADS

SUBJECT INDEX

VIBRATORY LOADS

Pressure-welded flange assembly provides
leaktight seal at reduced bolt loads
M-FS-640 B66-10247 05

Heat exchanger tubes supported in high
vibration environment
M-FS-1401 B66-10567 05

Highly linear, sensitive analog-to-digital
converter
MSC-13110 B69-10230 01

VIBRATORY POLISHING

Metallographic holding fixture permits
polishing of soft metals on vibratory
lapping machine
ARG-42 B66-10562 05

VIDEO DATA

Recording and time expansion technique for
high-speed, single-shot transient video
signal
ARC-10003 B67-10139 01

Video synchronization processor overcomes
poor signal-to-noise ratio
KSC-10002 B67-10515 01

Computer program for Video Data Processing
System /VDPs/
NPO-10042 B67-10630 06

Scan rate converter for tape recording and
playback of TV pictures
NPO-10166 B67-10676 01

Technique for improving solid state
mosaic images
M-FS-20532 B69-10676 01

System converts slow-scan to standard
fast-scan TV signals
MSC-90534 B69-10748 01

VIDEO EQUIPMENT

Vibration tests on vidicons made by improved
method
JPL-SC-115 B66-10042 01

Screen of cylindrical lenses produces
stereoscopic television pictures
M-FS-273 B66-10086 02

Video signal processing system uses gated
current mode switches to perform high speed
multiplication and digital-to-analog
conversion
MSC-781 B66-10429 01

Security warning system monitors up to
fifteen remote areas simultaneously
KSC-66-39 B66-10548 01

Miniature electrometer preamplifier
effectively compensates for input
capacitance
ARC-69 B66-10549 01

Recording and time expansion technique for
high-speed, single-shot transient video
signal
ARC-10003 B67-10139 01

Design concept for improved photo-scan tube
JPL-818 B67-10157 01

New electron microscope employs new video
display technique
ARG-158 B67-10312 03

System remotely inspects, measures, and
records internal irregularities in piping
M-FS-14545 B68-10149 01

Facsimile video enhancement device
GSFC-10185 B68-10207 01

Solid state high-voltage pulser operates

with low supply voltage
M-FS-14034 B68-10308 01

Selective video blanking technique
M-FS-20013 B68-10434 01

VIDICONS

Electromechanically operated camera shutter
provides uniform exposure
JPL-357 B63-10227 01

Raster linearity of video cameras calibrated
with precision tester
GSFC-200 B64-10209 01

Temperature-compensation circuit stabilizes
performance of vidicons
JPL-486 B64-10226 01

Detector circuit compensates for vidicon beam
current variations
GSFC-310 B65-10212 01

Vibration tests on vidicons made by improved
method
JPL-SC-115 B66-10042 01

New television camera eliminates vidicon tube
M-FS-472 B66-10112 01

Infrared television used to detect hydrogen
fires
M-FS-654 B66-10363 01

An improved method for testing performance of
vidicons during vibration
JPL-SC-113 B66-10442 01

Subminiature deflection circuit operates
integrated sweep circuits in TV camera
MSC-1263 B67-10155 01

Closed circuit TV system monitors welding
operations
MSC-11002 B67-10162 01

Plotter design simplifies determination of
image sensor transfer characteristic
NPO-10164 B67-10206 01

Improved television signal processing system
NPO-10140 B67-10246 01

IR vidicon scanner monitors many test
points
M-FS-1937 B67-10277 01

Ultraminiature television camera
M-FS-11967 B67-10469 01

Color-televised medical microscopy
MSC-13086 B68-10314 01

An infrared television system for hydrogen
flame detection
KSC-10368 B69-10354 01

VIEWING

Library of documents compressed into lap-held
display kit
MSC-125 B65-10030 01

Optical projectors simulate human eyes to
establish operator's field of view
WOO-250 B66-10010 02

Pocket-size manual tape reader device aids
computer tape checking
KSC-10058 B67-10361 01

VIGNETTING

Selective vignetting of Type 1 X-ray
telescopes
GSFC-10682 B69-10075 02

VINYL COPOLYMERS

Quick don-doff electrode pastes
MSC-13249 B69-10598 04

Calibration technique for electromagnetic flowmeters
LEWIS-10328 B67-10554 01

WAVE ATTENUATION
System precisely controls oscillation of vibrating mass
M-FS-1875 B67-10276 01

Stress-corrosion-induced property changes in aluminum alloys
M-FS-20209 B68-10568 03

WAVE DIFFRACTION
Optical frequency waveguide and ion transmission system
HQ-10541 B69-10746 01

WAVE DRAG
Program computes zero lift wave drag of entire aircraft
LANGLEY-10079 B67-10530 06

WAVE EQUATIONS
Acoustic wave analysis
M-FS-18076 B68-10265 02

Solution of differential equations by application of transformation groups
M-FS-14802 B68-10276 02

WAVE EXCITATION
Antenna configurations provide polarization diversity
GSFC-74 B66-10066 01

Glow discharge density sensor probe life is extended
M-FS-1707 B67-10229 01

Vibration testing and dynamic studies of relays
M-FS-14542 B68-10268 01

Evaluation of magnetic materials for static inverters and converters
LEWIS-10343 B69-10306 01

WAVE FUNCTIONS
Quantum mechanical calculations of reactive scattering cross sections in bimolecular encounters
M-FS-13594 B67-10527 03

WAVE GENERATION
Variable frequency magnetic multivibrator generates stable square-wave output
GSFC-AE-21 B65-10124 01

Glow discharge density sensor probe life is extended
M-FS-1707 B67-10229 01

A phonocardiogram simulator
KSC-67-94 B67-10239 01

Signal generator converts direct current to multiphase supplies
MSC-11043 B67-10368 01

Development of detonation reaction engine
M-FS-14020 B67-10652 01

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers
NUC-10024 B67-10664 05

Simple quasi-exponential slope generator
NPO-11130 B69-10439 01

WAVE INTERACTION
One-dimensional Coulomb-damped wave motion in prismatic bars

M-FS-14815 B68-10548 02

WAVE PROPAGATION
Ultrasonics used to measure residual stress
M-FS-12449 B67-10428 02

Study made of large amplitude fuel sloshing
M-FS-12381 B67-10439 03

Propagation of density disturbances in air-water flow
ARG-10260 B69-10043 02

Damping of thermoelastic structures
M-FS-20002 B69-10467 02

Millimeter-wave atmospheric loss prediction method
NPO-11054 B69-10584 01

WAVE REFLECTION
The effect of mismatched components on microwave noise-temperature calibrations
NPO-11163 B69-10333 01

WAVEFORMS
Low-power transistorized circuit provides staircase waveform
GSFC-48 B64-10007 01

Improved electrode gives high-quality biological recordings
MSC-17 B64-10025 04

Analog device simulates physiological waveforms
MSC-51 B64-10109 01

Pneumotachometer counts respiration rate of human subject
MSC-92 B64-10259 01

Circuit converts AM signals to FM for magnetic recording
GSFC-227 B65-10001 01

Simulator produces physiological waveforms
MSC-94 B65-10091 01

Transistorized circuit clamps voltage with 0.1 percent error
GSFC-196 B65-10118 01

Auxiliary circuit enables automatic monitoring of EKG'S
MSC-106 B65-10142 01

Frequency discriminator with binary output eliminates tuned circuits
M-FS-376 B65-10349 01

Function generator eliminates necessity of series summation
GSFC-214 B66-10351 01

Feedback loop compensates for rectifier nonlinearity
M-FS-384 B66-10382 01

Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
JPL-805 B66-10386 01

Subminiature deflection circuit operates integrated sweep circuits in TV camera
MSC-1263 B67-10155 01

Fast-response frequency-to-analog converter
M-FS-709 B67-10257 01

Electronic test instrument generates extremely small current signals
ARG-276 B67-10318 01

Logic circuit detects both present and missing negative pulses in superimposed wave trains
M-FS-12518 B67-10565 01

WHEATSTONE BRIDGES

SUBJECT INDEX

WHEATSTONE BRIDGES

Electronic ohmmeter provides direct digital output
GSPC-363 B65-10274 01

Differential pressure gauge has fast response
M-FS-358 B65-10285 05

Photoresistance analog multiplier has wide range
GSPC-360 B65-10287 01

Improved strain-wire flowmeter has fast response time
LEWIS-241 B65-10304 01

Angular acceleration measured by deflection in sensing ring
MSC-250 B66-10105 01

Subminiaturized gas chromatograph gives fast, efficient analysis
JPL-735 B66-10182 01

Detector measures power in 50 to 30,000 GHz radiation band
ERC-26 B66-10581 01

Resistance thermometer has linear resistance-temperature coefficient at low temperatures
WOO-190 B66-10612 01

Fast-acting calorimeter measures heat output of plasma gun accelerator
LEWIS-388 B67-10192 01

Electronic circuitry used to automate paper chromatography
JPL-840 B67-10201 01

Web belt load measuring instrument has excellent stability
MSC-921 B67-10242 01

Machine tests slow-speed sliding friction in high vacuum
M-FS-12341 B67-10379 05

Ratio matching of half-bridge weldable strain gages, computer program
FRC-10032 B69-10040 06

Design of a strain-gage probe
ARG-10338 B69-10343 05

WHEELS

Lateral ring metal elastic wheel absorbs shock loading
M-FS-1312 B66-10663 05

Shock-absorbing caster wheel is simple and compact
SAN-10019 B68-10266 05

Fifth-wheel fork truck adapter
M-FS-14460 B69-10021 05

WHISKER COMPOSITES

Radial furnace shows promise for growing straight boron carbide whiskers
HQ-50 B67-10070 03

WHISKERS (SINGLE CRYSTALS)

Boron carbide whiskers produced by vapor deposition
HQ-24 B65-10261 03

Efficient millimeter wave 1140 GHz/ diode for harmonic power generation
HQ-61 B67-10166 01

WHITE BLOOD CELLS

Foot-operated cell-counter
ARG-10315 B69-10351 01

WHITE NOISE

On the bound of first excursion probability
NPO-11158 B69-10334 06

Optimum FM pre-emphasis
KSC-10151 B69-10359 01

WICKS

Improved anode design for metal-oxygen cells
LEWIS-10871 B69-10318 01

WIDEBAND COMMUNICATION

Omnidirectional antennas transmit and receive over large bandwidth
GSPC-436 B66-10133 01

Wideband, high efficiency optical modulator requires less than 10 watts drive power
M-FS-12733 B67-10289 01

RF noise suppression using the photodielectric effect in semiconductors
MSC-12259 B69-10225 01

WIDTH

System enables dimensional inspection of very large structures
M-FS-2477 B67-10214 05

Eddy current probe measures size of cracks in nonmetallic materials
M-FS-14059 B67-10645 03

WINCHES

Compressed gas system operates semitrailer brakes during winching operation
JPL-0036 B64-10306 05

Hoisting frame facilitates handling of large objects
M-FS-16166 B68-10575 05

Two-axis winch installer for heavy ducts in confined space
M-FS-14254 B69-10062 05

Space-saving hoist for tank manholes
M-FS-16508 B69-10180 05

WIND (METEOROLOGY)

Small foamed polystyrene shield protects low-frequency microphones from wind noise
M-FS-123 B63-10579 01

WIND DIRECTION

Dewpoint temperature inversions analyzed
ARG-10316 B69-10057 02

WIND EFFECTS

Suspended chains damp wind-induced oscillations of tall flexible structures
LANGLEY-10193 B68-10042 05

WIND MEASUREMENT

New anemometer has fast response, measures dynamic pressure directly
LANGLEY-28 B63-10530 05

Fast-response cup anemometer features cosine response
ARG-90193 B68-10202 01

Wind tower influence study
M-FS-20239 B69-10653 01

WIND PROFILES

New anemometer has fast response, measures dynamic pressure directly
LANGLEY-28 B63-10530 05

Rough surface improves stability of air-sounding balloons
M-FS-320 B65-10326 05

A method of determining combustion gas flow
M-FS-13757 B67-10455 03

WIND SHEAR

Oil-smeared models aid wind tunnel measurements
LANGLEY-4 B63-10311 03

SUBJECT INDEX

WIRE

WIND TUNNEL APPARATUS

Electric arc heater is self starting
 LANGLEY-208 B66-10230 03

Jet engine powers large, high-temperature
 wind tunnel
 M-FS-13544 B67-10621 02

WIND TUNNEL MODELS

Welded pressure transducer made as small as
 1/8th-inch in diameter
 ARC-11 B63-10429 03

Built-in templates speed up process for making
 accurate models
 LANGLEY-23 B63-10526 05

Flexible fastener allows thermal expansion
 LANGLEY-40 B64-10145 05

Telescoping of instrumentation tubing
 eliminates swaging
 M-FS-546 B66-10116 05

WIND TUNNEL STABILITY TESTS

Rapid helium-air analyzer can measure other
 binary gas mixtures
 LANGLEY-16 B63-10557 03

WIND TUNNELS

Oil-smeared models aid wind tunnel
 measurements
 LANGLEY-4 B63-10311 03

Laser-Doppler gas-velocity instrument
 M-FS-20039 B68-10349 02

Experimental design for research on
 shock-turbulence interaction
 M-FS-20031 B69-10604 02

WIND VELOCITY

Dewpoint temperature inversions analyzed
 ARG-10316 B69-10057 02

Crossed-beam technique for measuring
 horizontal winds
 M-FS-20160 B69-10447 02

WIND VELOCITY MEASUREMENT

Independent doubly truncated gamma variables
 M-FS-20143 B68-10345 02

WINDING

Simple transducer measures low heat-transfer
 rates
 JPL-466 B64-10122 01

Variable frequency transistor inverters use
 multiple core transformers
 GSFC-183 B65-10119 01

Variable frequency magnetic multivibrator
 generates stable square-wave output
 GSFC-AE-21 B65-10124 01

Rotor position sensor switches currents in
 brushless dc motors
 GSFC-315 B65-10151 01

Spiral heater coils hand-formed with fixture
 LEWIS-208 B65-10192 05

High frequency wide-band transformer uses
 coax to achieve high turn ratio and flat
 response
 ARG-107 B66-10600 01

An improved magnetic tape recorder
 GSFC-08259 B67-10646 01

Improved control system power unit for
 large parachutes
 MSC-12052 B67-10677 05

Induction probe determines levels of
 liquid metals
 ARG-10348 B69-10256 03

WINDOWS (APERTURES)

Plastic scintillator converts standard
 photomultiplier to ultraviolet range
 ERC-9 B66-10108 02

High pressure cryogenic liquid flow sight
 assembly provides streamlined flow for easy
 observation
 LEWIS-310 B66-10394 01

Aluminized thin-window proportional-counter
 tube is stronger, more responsive in long
 wavelength region
 JPL-689 B67-10015 01

Detection of effect of deposits on optical
 windows of pyrometer measurements
 LEWIS-10366 B68-10367 01

WING CAMBER

Computer program analyzes and designs
 supersonic wing-body combinations
 ARC-10141 B68-10335 06

Modified Multhopp mean camber computer
 program
 LANGLEY-10376 B68-10446 06

WING PANELS

Computer program analyzes and designs
 supersonic wing-body combinations
 ARC-10141 B68-10335 06

WING PLANFORMS

Computer program calculates wing aerodynamic
 characteristics for fixed wings with dihedral
 and variable-sweep wings at subsonic speeds
 LANGLEY-10191 B67-10666 06

Modified Multhopp lifting surface loading
 program
 LANGLEY-10375 B68-10452 06

WING PROFILES

Computer program analyzes and designs
 supersonic wing-body combinations
 ARC-10141 B68-10335 06

WINGS

Program computes zero lift wave drag of
 entire aircraft
 LANGLEY-10079 B67-10530 06

WIRE

Thermocompression bonding produces efficient
 surface-barrier diode
 JPL-SC-066 B65-10007 05

Forming blocks speed production of strain gage
 grids
 LEWIS-182 B65-10009 05

Cantilever springs maintain tension in
 thermally expanded wires
 LEWIS-136 B65-10149 05

Improved solderless connector is easily
 disconnected
 JPL-SC-060 B65-10197 01

Improved wire memory matrix uses very little
 power
 JPL-SC-167 B65-10359 01

Vacuum chamber provides improved insulation
 and support for cryostat
 M-FS-415 B65-10368 02

Wire bundle formed into grids with minute
 interstices
 WOO-089 B65-10372 03

Tungsten wire and tubing joined by nickel
 brazing
 M-FS-394 B65-10391 05

Mechanism continuously measures static and
 dynamic cable loads
 MSC-217 B66-10107 05

WIRE BRIDGE CIRCUITS

SUBJECT INDEX

WRENCHES

WIRE CLOTH

Wire mesh isolator protects sensitive electronic components
GSFC-347 B65-10216 05

Plated nickel wire mesh makes superior catalyst bed
MSC-216 B65-10321 03

Three-dimensional wire-mesh capacitor system measures fluid density
WOO-194 B65-10379 01

Strainer fits inside flared-tube fittings
LANGLEY-180 B65-10388 05

Centrifugal device separates liquid from gas
MSC-282 B65-10394 05

Frangible electrochemical cell and sealing technique
XGS-10010 B69-10056 01

WIRE WINDING

Wire winding increases lifetime of oxide coated cathodes
LEWIS-154 B65-10032 03

Magnetic field test coils are temperature compensated
GSFC-294 B65-10081 02

Fiber glass parts cured during filament winding eliminates oven, saves time
M-FS-14 B65-10088 03

Automatic reel controls filler wire in welding machines
MSC-416 B66-10236 05

High transients suppressed in electromagnetic devices
KSC-66-13 B67-10031 01

Variable reluctance switch avoids contact corrosion and contact bounce
MSC-1178 B67-10137 01

WIRELESS COMMUNICATIONS

Phase shift frequency synthesizer is efficient, small in size
M-FS-250 B65-10169 01

Feasibility study of wireless power transmission systems
M-FS-14691 B68-10309 01

WIRING

Circuit reliability boosted by soldering pins of disconnect plugs to sockets
JPL-447 B64-10002 01

Modified RF coaxial connector ends vacuum chamber wiring problem
GSFC-150 B64-10010 01

Compact retractor protects cabling loops
M-FS-561 B66-10018 05

Copper wire plated with nickel and silver resists corrosion
M-FS-761 B66-10421 03

Electrical continuity scanner facilitates identification of wires for soldering to connectors
MSC-626 B66-10605 01

Instrument accurately measures small temperature changes on test surface
LANGLEY-174 B66-10637 01

Thermocouples easily installed in hard-to-get-to places
M-FS-1946 B66-10653 01

Logic circuitry used to automatically test shielded cables
HQ-60 B66-10659 01

Reparable, high-density microelectronic module provides effective heat sink
M-FS-13075 B67-10356 01

Flat pack interconnection structure simplifies modular electronic assemblies
JPL-819 B67-10560 01

Multichannel wireway adapter box
MSC-90645 B68-10052 05

Nondestructive evaluation of printed wiring boards by microhm resistance measurements
SAN-10034 B69-10272 01

Pressure transducer
NPO-10853 B69-10364 01

WOOD

Cork is used to make tooling patterns and molds
MSC-425 B66-10328 01

WOODEN STRUCTURES

Built-in templates speed up process for making accurate models
LANGLEY-23 B63-10526 05

Nylon bit removes cork insulation without damage to substrate
MSC-381 B66-10152 05

Alignment tool facilitates pin placement on irregular horizontal surfaces
LANGLEY-219 B66-10410 05

WOOL

Thermally conductive metal wool-silicone rubber material can be used as shock and vibration damper
JPL-321 B63-10207 03

WORDS (LANGUAGE)

Detection system ensures positive alarm activation in digital message loss
WOO-208 B66-10287 01

Improved memory word line configuration allows high storage density
GSFC-559 B66-10617 01

PCM synchronization by word stuffing
NPO-10688 B69-10695 01

WORK

Work platform is supported by self-locking blades
M-FS-2297 B67-10180 05

WORK FUNCTIONS

Photoelectric scanner makes detailed work function maps of metal surface
JPL-SC-176 B66-10440 01

Thermionic scanner pinpoints work function of emitter surfaces
JPL-SC-177 B66-10444 01

WORK HARDENING

Study made of explosive cutting in simulated space environments
M-FS-1597 B67-10040 01

Possible correlation between work-hardening and fatigue-failure
ARG-10371 B69-10414 03

WRENCHES

Torque wrench designed for restricted areas
LEWIS-246 B66-10011 05

T-handle wrench has torque-limiting action
MSC-280 B66-10065 05

Torque wrench allows readings from inaccessible locations
M-FS-598 B66-10204 05

Tool enables proper mating of accelerometer

minimized by minor elements
M-FS-18185 B68-10251 03

Rotary-knife stripper facilitates removal
of X-ray film from pack
M-FS-14837 B68-10509 05

Primary radical yields in pulse irradiated
alkaline aqueous solution
ARG-10322 B69-10167 02

Preferred-orientation analysis of
polycrystalline materials
NPO-10604 B69-10336 02

New shield for gamma-ray spectrometry
ARG-10388 B69-10344 02

A simple electrometer for measuring small
photoelectric currents
GSFC-10603 B69-10734 01

X-Y PLOTTERS

System remotely inspects, measures, and
records internal irregularities in piping
M-FS-14545 B68-10149 01

Two devices for analysis of nystagmus
HQ-10273 B69-10224 01

Automated plotting of equipotentials
NPO-11134 B69-10570 01

Direct determination of lead-210 by
liquid-scintillation counting
ARG-10462 B69-10611 03

XENON

Densitometer system for liquid hydrogen has
high accuracy, fast response
M-FS-909 B66-10438 01

An improved soft X-ray photoionization
detector
GSFC-540 B67-10072 02

High-temperature, gas-filled ceramic
rectifiers, thyratrons, and
voltage-reference tubes
LEWIS-90271 B69-10376 01

XENON COMPOUNDS

Xenon forms stable compound with fluorine
ARG-4 B66-10467 03

Xenon fluoride solutions effective as
fluorinating agents
ARG-217 B67-10133 03

Xenon fluorides show potential as
fluorinating agents
ARG-113 B67-10185 03

Pure xenon hexafluoride prepared for thermal
properties studies
ARG-10056 B67-10577 03

Metabolic and toxicological effects of
water-soluble xenon compounds are studied
ARG-90239 B68-10076 04

XENON LAMPS

High-intensity flashing beacon powered by
mercury cells
LANGLEY-8C B65-10361 01

Lamp enables measurement of oxygen
concentration in presence of water vapor
MSC-10043 B67-10387 01

Laser action from a terbium beta-ketoenolate
at room temperature
GSFC-10593 B69-10324 02

XEROGRAPHY

Shortened procedure for obtaining
reproducible copies of 35 mm color slides
KSC-09957 B68-10560 02

XYLENE

Special coatings control temperature of
structures
GSFC-444 B65-10337 03

Process produces chlorinated aromatic
isocyanate in high yield
M-FS-1658 B66-10646 03

Y

YAGI ANTENNAS

Modified interelement spacing improves Yagi
antenna array
LANGLEY-130 B65-10183 01

YAW

Knob linkage permits one-hand control of
several operations
MSC-30 B65-10022 05

Developmental instrument supplies accurate
attitude and attitude-rate data
HQ-57 B66-10607 01

YEAST

Ultraviolet microscopy aids in cytological
and biomedical research
ARG-178 B67-10590 04

YIELD STRENGTH

Novel shock absorber features varying yield
strengths
MSC-63A B64-10138 03

Lightweight aluminum casting alloy is useful
at cryogenic temperatures

SUBJECT INDEX

ZIRCONIUM COMPOUNDS

Aluminum core structures brazed without use of flux M-FS-659	B66-10360	05	Hot-wire detector for chemically active materials used in gas chromatography MSC-269	B66-10139	03
Solubility data are compiled for metals in liquid zinc ARG-149	B67-10191	03	New weldable high strength aluminum alloy developed for cryogenic service M-FS-737	B66-10613	05
Resistivity measurements of neutron-irradiated pure metals and Al-Zn alloys ARG-10108	B68-10200	03	Intergranular metal phase increases thermal shock resistance of ceramic coating M-FS-1862	B66-10651	03
ZINC COATINGS Galvanic corrosion reduced in aluminum fabrications M-FS-272	B65-10140	03	Fluid-bed fluoride volatility process recovers uranium from spent uranium alloy fuels ARG-232	B67-10032	03
ZINC COMPOUNDS New method used to fabricate gallium arsenide photovoltaic device HOO-062	B64-10019	01	Extrusion of small-diameter, thin-wall tungsten tubing LEWIS-90335	B67-10355	05
Inexpensive infrared source improvised from flashlight M-FS-494	B66-10096	02	Newly developed foam ceramic body shows promise as thermal insulation material at 3000 deg F M-FS-11968	B67-10441	03
White primer permits a corrosion-resistant coating of minimum weight M-FS-304	B66-10207	03	Reaction of steam with molybdenum is studied ARG-295	B67-10502	03
New class of compounds have very low vapor pressures ARG-115	B67-10184	03	Magnesium-zinc reduction is effective in preparation of metals ARG-10050	B67-10579	03
Aggregation of metallochlorophylls - Examination by spectroscopy ARG-10273	B69-10163	04	Studies in zirconium oxidation ARG-10099	B68-10199	03
ZINC OXIDES Anodization process produces opaque, reflective coatings on aluminum M-FS-348	B65-10336	03	High-speed camera synchronization M-FS-18062	B68-10282	02
Pigmented coating resists thermal shock JPL-SC-083	B65-10354	03	Nickel-base superalloy*s excellent properties promote its service to 2200 degrees F LEWIS-10355	B68-10380	03
Tool samples subsurface soil free of surface contaminants MSC-10988	B67-10473	05	High-emittance coatings on metal substrates LEWIS-10325	B68-10381	03
Concept for improved vacuum pressure measuring device M-FS-20172	B69-10421	02	Silicon carbide diode for increased light output M-FS-20063	B69-10096	01
ZINC SELENIDES Thin-film semiconductor rectifier has improved properties MSC-207	B66-10012	01	High strength, superplastic superalloy LEWIS-10805	B69-10293	03
ZINC SULFIDES Thermal neutron image intensifier tube provides brightly visible radiographic pattern ARG-120	B67-10296	02	Improved high-temperature-strength nickel-base superalloy LEWIS-10874	B69-10352	03
Preparation of silver-activated zinc sulfide thin films GSFC-10687	B68-10271	03	Improved inorganic ion exchange membranes LEWIS-10737	B69-10451	03
ZIPPER A new method for fabrication of flexible vacuum purge jackets M-FS-12646	B69-10564	03	ZIRCONIUM ALLOYS Nickel-base superalloys developed for high-temperature applications LEWIS-226	B66-10222	03
ZIRCALOYS (TRADEMARK) Metal tube reducer is inexpensive and simple to operate ARG-49	B67-10401	05	Brazing process provides high-strength bond between aluminum and stainless steel M-FS-803	B66-10352	05
ZIRCONATES Phonocardiograph microphone is rugged and moistureproof MSC-212	B66-10314	04	Zirconium alloys with small amounts of iron and copper or nickel show improved corrosion resistance in superheated steam ARG-226	B67-10050	03
ZIRCONIUM Refractory oxides evaluated for high-temperature use LANGLEY-121	B65-10167	03	Superconductivity in zirconium-rhodium alloys ARG-10223	B69-10010	03
			ZIRCONIUM COMPOUNDS Protective coating withstands high temperature in oxidizing atmosphere M-FS-529	B66-10044	03
			White primer permits a corrosion-resistant coating of minimum weight M-FS-304	B66-10207	03

ZIRCONIUM OXIDES

SUBJECT INDEX

ZIRCONIUM OXIDES

Ceramic-coated boat is chemically inert,
provides good heat transfer
LANGLEY-90 B65-10063 05

Refractory oxides evaluated for
high-temperature use
LANGLEY-121 B65-10167 03

Hydrogen-atmosphere induction furnace has
increased temperature range
LEWIS-153 B66-10055 05

Fibers of newly developed refractory ceramics
produced by improved process
WOO-169 B66-10196 03

Improved thermal insulation materials made of
foamed refractory oxides
M-FS-735 B66-10288 03

Oxide film on metal substrate reduced to
form metal-oxide-metal layer structure
ARG-48 B67-10187 03

A method of determining combustion gas
flow
M-FS-13757 B67-10455 03

Reinforced thermal-shock resistant ceramics
LEWIS-10376 B68-10085 03

ZONE MELTING

Single-crystal semiconductor films grown on
foreign substrates
WOO-076 B66-10225 01

Process yield Co-Fe alloys with superior
high temperature magnetic properties
LEWIS-333 B66-10535 03

Zone purification of potassium chloride
ARG-10377 B69-10241 03

Personal Author Index

This index is arranged alphabetically by author. The Tech Brief title is listed followed by the originating source number, e.g., MFS-293. The Tech Brief number, e.g., B65-10346 is followed by a two-digit number, e.g., 05, which designates the subject category.

A

- ABEL, R. S.
Analog voicing detector responds to pitch
GSFC-10085 B67-10571 01
- ABENS, S. G.
High-energy, high-power, long-life battery
LEWIS-10724 B69-10131 01
- ABLER, J.
Experimental scaling study of fluid
amplifier elements
M-FS-1882 B67-10088 02
- ABRAMSON, R. H.
Ion mass spectrometer for special uses
HQ-10418 B69-10510 02
- ABSALOM, J. G.
Analysis of dynamic systems with DAP4H
computer program
M-FS-13999 B67-10523 06
Dynamically stable check valve concept for
wide flow range
M-FS-14579 B68-10247 05
- ABU-SHUMAYS, I. K.
Structure of the isotropic transport
operators in three independent space
variables
ARG-10448 B69-10432 06
- ACKERMAN, R. J.
The thermodynamic properties of the wustite
phase are studied
ARG-10200 B68-10408 03
- ACORD, J. D.
Hydraulic drive system prevents backlash
JPL-371 B65-10351 05
- ADAMS, C. J.
Nondestructive testing of brazed rocket
engine components
M-FS-18191 B68-10394 03
- ADAMS, W. T.
Lightweight magnesium-lithium alloys show
promise
M-FS-17 B63-10389 03
- ADKINS, J. M.
Basal-plane metallography of deformed
pyrolytic carbon
NPO-11196 B69-10488 03
Automatic sample rotator for metallographic
polishing
NPO-11015 B69-10596 03
- ADLER, I.
Nondispersive X-ray emission analysis
for geochemical exploration
GSFC-10568 B69-10011 02
- ADUCCI, S. A.
Remotely operated clamping tool has positive
grip
NU-0020 B65-10254 05
- AFFENITO, F. J.
Phase plane displays detect incipient
failure in servo system testing
HQ-10018 B67-10662 01
- AFRICANO, R. C.
Algebraic Monte Carlo procedure reduces
statistical analysis time and cost factors
M-FS-1887 B67-10434 01
- AGEE, W. E.
LM lookangle program
MSC-13179 B69-10370 06
- AIRTH, H. B.
Circuit protects regulated power supply
against overload current
GSFC-453 B66-10292 01
- AISENBERG, S.
Optical integrating sphere operates at
visible and infrared wavelengths
M-FS-14248 B68-10126 02
- AKYUZ, F. A.
ELAS - A general purpose computer program
for the equilibrium problems of linear
structures
NPO-10598 B68-10187 06
- ALAN, A.
GERT EXCLUSIVE-OR combining paths and
loops of electrical networks
ERC-10206 B68-10435 06
GERT simulation program for GERT network
analysis
ERC-10209 B68-10457 06
- ALARIO, R.
Development of structural test articles
from magnesium-lithium and beryllium
M-FS-14959 B69-10417 03
- ALBRECHT, R. H.
White primer permits a corrosion-resistant
coating of minimum weight
M-FS-304 B66-10207 03
- ALBRIGHT, C. F.
New electrolyte may increase life of
polarographic oxygen sensors
MSC-1049 B67-10003 03
Electrolytic silver ion cell sterilizes
water supply
MSC-11827 B68-10555 01
Device separates hydrogen from solution in
water at ambient temperatures
MSC-13335 B69-10635 03
- ALBRIGHT, F. G.
Contact stresses calculated for miniature slip
rings
M-FS-280 B65-10098 05
- ALDRED, A. T.
Study reveals effect of aluminum on
saturation moment of Fe-Ni alloys
ARG-90259 B68-10172 03
- ALDRIDGE, C.
Development and test of flexible film
coupon strips for use as a sampling
technique
M-FS-20448 B69-10339 03
- ALEXANDER, M. J.
Computer program simulates design, test,
and analysis phases of sensitivity
experiments
M-FS-1496 B67-10077 01
Computer program reduces calculation time
of normal response functions
M-FS-1517 B67-10108 01
Computer program calculates monotonic

- maximum likelihood estimates using method of reversals
M-FS-1516 B67-10136 01
- ALEXANDER, W. M.
Microparticle impact sensor measures energy directly
GSFC-252 B65-10048 01
- ALFREDSON, P. G.
Computer program developed for flowsheet calculations and process data reduction
ARG-10134 B69-10023 06
- ALLAN, K. N.
Cooling of 2 kW H subscript 2-O subscript 2 fuel cell
M-FS-13737 B68-10544 01
- ALLEN, B. C.
Nonhazardous acid etches weld samples
M-FS-975 B66-10378 05
- ALLEN, B. C.
Semiconductors can be tested without removing them from circuitry
M-FS-1163 B66-10447 01
- ALLEN, G. P.
Spiral-grooved shaft seals substantially reduce leakage and wear
LEWIS-10397 B68-10270 05
- ALLEN, J. H., SR.
Lathe attachment used to machine elliptical cones
MSC-100 B65-10168 05
- ALLEN, L. D.
Insulation accelerates rate of cooling with cryogenic fluid
MSC-161 B65-10240 02
- ALLEN, L. H.
Method of directing a laser beam with very high accuracy
NPO-11087 B69-10508 02
- ALLEN, W. K.
Traveling-wave tube circuit simplifies microwave relay
GSFC-299 B65-10127 01
- ALLEN, W. W.
Automatic calibration apparatus for telemetry systems
NPO-10560 B68-10514 01
- ALLISTON, W.
Master control data handling program uses automatic data input
M-FS-2259 B67-10280 06
- ALMOND, J. C.
New computer program solves wide variety of heat flow problems
M-FS-421 B66-10404 01
- ALMROTH, B. O.
Computer program analyzes Buckling Of Shells Of Revolution with various wall construction, BOSOR
LANGLEY-10290 B68-10226 06
- Buckling Of Shells Of Revolution /BOSOR/ with various wall constructions
LANGLEY-10441 B69-10300 06
- ALSOVSKY, W. H.
Circuit enhances vertical resolution in raster scanning systems
MSC-12123 B68-10121 01
- ALTSHULER, T. L.
Reliable method for testing gross leaks in semiconductor component packages
ERC-10150 B68-10562 01
- ALVAREZ, M. M.
Instrument transmits vanishing point to illustration point
MSC-267A B66-10324 01
- AMBARUCH, R.
Digital computer technique for setup and checkout of an analog computer
M-FS-13969 B68-10576 06
- AMMANN, E. O.
Technique developed for measuring transmittance of optical birefringent networks
M-FS-14267 B68-10260 02
- Synthesis of electro-optic modulators for amplitude modulation of light
M-FS-14268 B68-10275 02
- Correction for losses in optical birefringent networks, a concept
M-FS-20088 B68-10571 02
- AMMERMAN, R. L.
Pressure variable orifice for hydraulic control valve
MSC-11323 B68-10120 05
- ANASTASIA, L. J.
Computer program developed for flowsheet calculations and process data reduction
ARG-10134 B69-10023 06
- ANDERS, R. A.
Electronic aperture control devised for solid state imaging system
M-FS-12428 B68-10028 01
- ANDERSON, G. E.
Portable detector set discloses helium leak rates
M-FS-1733 B67-10065 01
- ANDERSON, J. W.
Solenoid valve design has one moving part
NPO-10039 B67-10219 05
- ANDERSON, K. F.
Ratio matching of half-bridge weldable strain gages, computer program
PRC-10032 B69-10040 06
- ANDERSON, M. J.
Design eliminates radial thermal expansion in turbine stator components
M-FS-18146 B68-10531 05
- ANDERSON, R. W.
Neutron irradiation of Am-241 effectively produces curium
ARG-10030 B67-10501 03
- ANDERSON, T. O.
Improved circuit minimizes generation time of pseudonoise check bits
JPL-698 B65-10275 01
- Monitoring system determines amplitude and time of vibration channel peaks
JPL-879 B66-10699 01
- A conceptual, parallel operating data compression processor
NPO-10068 B67-10204 01
- Logic realization of simple majority voting connectives
JPL-727 B67-10511 06
- Simple first order data compression processor concept
NPO-10338 B67-10553 01
- Simplified, high-speed binary data decoder
NPO-10118 B68-10058 01
- A method for reducing sampling jitter in digital control systems
NPO-11088 B69-10338 01
- Simple quasi-exponential slope generator
NPO-11130 B69-10439 01
- Simplified, reliable circuit sorts binary numbers in order of magnitude
NPO-10112 B69-10503 01
- Design for a rapid automatic sync acquisition system
NPO-10214 B69-10538 01
- ANDERSON, W. J.
Control of component differential hardness increases bearing life
LEWIS-190 B65-10251 05
- Shallow grooves in journal improve air bearing performance
LEWIS-10396 B68-10134 05
- Bearings use dry self-lubricating cage materials
LEWIS-10432 B68-10165 05
- High-temperature bearing-cage materials
LEWIS-10403 B68-10176 05
- High-temperature bearing lubricants
LEWIS-10408 B68-10249 05
- ANDERSON, W. W., JR.
Calorimeter accurately measures thermal radiation energy
LANGLEY-173 B66-10058 02
- ANDREWS, C. A.
Improved first order interpolator
MSC-11085 B69-10291 02
- ANDREWS, S. J., JR.
Aerial-image enables diagrams and animation to be inserted in motion pictures
ARG-165 B67-10398 02
- ANGELE, W.
Contact-spring forming machine for flat

conductor cable receptacles M-FS-20126	B68-10550	05	ARNTZEN, J. D. Titanium-nitrogen reaction investigated for application to gettering systems ARG-10208	B68-10414	03
Tools for applying lead tape to flat conductor cabling for chemical stripping M-FS-20429	B69-10190	05	ARRANCE, F. C. Improved anode design for metal-oxygen cells LEWIS-10871	B69-10318	01
Leakage tester for flat conductor cable connector M-FS-20427	B69-10284	05	Improved inorganic ion exchange membranes LEWIS-10737	B69-10451	03
Checking flat conductor cable spacing by means of a moire pattern M-FS-20426	B69-10456	05	ARTHUR, J. S. Threading hook facilitates safe recovery of heavy loads MSC-46	B64-10185	05
ANGELL, C. A. Hydrated multivalent cations are new class of molten salt mixtures ARG-211	B67-10033	03	ASCHENBRENNER, R. A. Mossbauer-effect data-collection system ARG-10282	B69-10027	01
New class of compounds have very low vapor pressures ARG-115	B67-10184	03	ASHBROOK, R. L. New cobalt alloys have high-temperature strength and long life in vacuum environments LEWIS-47	B63-10351	03
ANNIS, J. F. Rate of heat extraction controller for environmental control HQ-10318	B69-10516	01	Cobalt-tungsten, ferromagnetic high-temperature alloy LEWIS-10378	B68-10095	03

studies with distilled water			
ARG-10409	B69-10413	03	
YU, Y.			
An unconventional magnetically-coupled			
multivibrator			
HQ-10226	B69-10480	01	

Z

ZACKAY, V. F.			
Retention of ductility in high-strength			
steels			
ARG-10497	B69-10616	03	
ZAPP, K.			
Occulting-filter method for obtaining			
flashing-light visibility data			
MSC-13097	B69-10107	02	
ZAREMBA, J. G.			
Gimbal angle sensor			
GSFC-10305	B68-10315	01	
ZARETSKY, E. V.			
Control of component differential hardness			
increases bearing life			
LEWIS-190	B65-10251	05	
Tester for study of rolling element			
bearings			
LEWIS-305	B67-10009	01	
High-temperature bearing-cage materials			
LEWIS-10403	B68-10176	05	
High-temperature bearing lubricants			
LEWIS-10408	B68-10249	05	
ZAVADA, E.			
Break-up of metal tube makes one-time shock			
absorber, bars rebound			
LANGLEY-1A	B63-10304	05	
ZAWADSKI, G. Z.			
Friction brake cushions acceleration and			
vibration loads			
MSC-715	B66-10608	05	
ZEGLER, S. T.			
Superconductivity in zirconium-rhodium			
alloys			
ARG-10223	B69-10010	03	
ZEHMPFENNIG, T.			
Imaging slitless spectrometer for X-ray			
astronomy			
M-FS-14309	B68-10546	02	
ZEINER, R. L.			
Effect of surface irregularities on bellows			
fatigue life			
M-FS-14480	B68-10229	05	
ZELDIN, S.			
Beam splitter used in dual filming technique			
M-FS-501	B66-10072	02	

ORIGINATOR/TECH BRIEF NUMBER INDEX

ZBLEZNIK, F. J.

PERSONAL AUTHOR INDEX

Author	Title	Report Number	Year	Page Count
ZELEZNIK, P. J.	Computer program determines chemical equilibria in complex systems	LEWIS-281	B66-10671	01
ZELLER, J. R.	Low-cost, fast-response drive circuit for electromagnetic torque motors	LEWIS-10143	B68-10386	01
ZELLNER, G. J.	Multipurpose instrumentation cable provides integral thermocouple circuit	NU-0108	B67-10046	01
	High temperature thermocouple design provides gas cooling without increasing overall size of unit	NUC-10515	B67-10497	01
	Vapor deposition process provides new method for fabricating high temperature thermocouples	NUC-10152	B67-10616	01
	Thoriated tungsten tube provides improved high temperature thermocouple sheath	NUC-10145	B67-10627	03
	Silicon solar cell monitors high temperature furnace operation	NUC-10163	B68-10148	01
ZEREN, T. Z.	Refractory oxide insulated thermocouple designed and analyzed for high temperature applications	ARG-10202	B69-10053	03
ZEYDEL, E. F. E.	Aerodynamic forces of fluttering cylindrical and/or planar structures	M-FS-20497	B69-10781	02
ZIBRITOSKY, G.	Friction loading device enables accurate testing of brittle materials	NU-0051	B66-10345	05
ZIEGELMEIER, P.	Cold machining of high density tungsten and other materials	ARG-10289	B69-10110	05
ZIMMERMAN, J. M.	Computer program simulates design, test, and analysis phases of sensitivity experiments	M-FS-1496	B67-10077	01
	Computer program reduces calculation time of normal response functions	M-FS-1517	B67-10108	01
ZIMMERMAN, J. S.	Computer program conducts facilities utilization and occupancy survey	NPO-10326	B67-10476	06
	Computer program conducts facilities utilization and occupancy survey	NPO-10438	B68-10137	06
ZIMMERMAN, P. A.	Rack mount device quickly inserts or extracts chassis units	MSC-244	B65-10385	05
ZIRIN, M. H.	Radon gas, useful for medical purposes, safely fixed in quartz	ARG-2	B66-10468	04
ZOIKE, H. M.	Surface irregularities detected by flare inspection instrument	M-FS-20157	B69-10152	01
ZOTTARELLI, L. J.	Current steering commutator offers versatility	JPL-812	B67-10410	01
	Computer memory access technique	NPO-10201	B67-10585	01
ZRUBEK, W. E.	Schmitt trigger multivibrator	MSC-10955	B69-10143	01
ZUCCARO, J. J.	Helmet system broadcasts

Originator/Tech Brief Number Index

The left hand column identifies the originator number; to the right of each originator number is the Tech Brief number, e.g., B69-10063, followed by a two-digit number, e.g., 01, which identifies the subject category containing the entire citation.

Tech Brief/Originator Number Index

The left hand column identifies the Tech Brief number, e.g., B69-10063, followed by a two-digit number, e.g., 01, which identifies the subject category containing the entire citation. Following the subject category number is the originator number.

POSTMASTER: If Undeliverable (Section 158
Postal Manual) Do Not Return

"The aeronautical and space activities of the United States shall be conducted so as to contribute . . . to the expansion of human knowledge of phenomena in the atmosphere and space. The Administration shall provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof."

— NATIONAL AERONAUTICS AND SPACE ACT OF 1958

NASA TECHNOLOGY UTILIZATION PUBLICATIONS

These describe science or technology derived from NASA's activities that may be of particular interest in commercial and other non-aerospace applications. Publications include:

TECH BRIEFS: Single-page descriptions of individual innovations, devices, methods, or concepts.

TECHNOLOGY SURVEYS: Selected surveys of NASA contributions to entire areas of technology.

OTHER TU PUBLICATIONS: These include handbooks, reports, conference proceedings, special studies, and selected bibliographies.

Technology Utilization publications are part of NASA's formal series of scientific and technical publications. Others include Technical Reports, Technical Notes, Technical Memorandums, Contractor Reports, Technical Translations, and Special Publications.

Details on their availability may be obtained from:
